LEAP YEAR BIRTHDAY

Wednesday, February 29th, is a welcome day in the lives of those whose birthday occur on that date. Mrs. Mary Moon, of town, celebrated her birthday on that date last week.

Early in the evening about forty neighbors and friends of Mrs. Moon surprised her by meeting at her home to spend a few hours. After a short time spent in social intercourse Mrs. B. Richmond, as the oldest neighbor, read the following address and Mrs. Moon's two grandchildren, Margaret and Gordon, presented her with a Windsor chair and sofa cushion.

Dear Mrs. Moon:—

As every body knows we are here to-night to celebrate a very important and happy occasion, your birthday. As this only occurs once in four years of course you must be very, very young. But we want to give you our congratulations and best wishes, and express our appreciation of what a very good neighbor you have been. Through all these years we have found you one to depend on when any help was needed and you have been in every way all that a neighbor should.

Please accept this token of our regard and esteem; (a chair and cushion) and may we wish you the best of health and happiness, and very many happy returns of the day.

The address was signed by everyone present. Although Mrs. Moon was taken by surprise she thanked the visitors for their kindness.

The balance of the evening was spent in games and contests and all seemed to enjoy the time.

A dainty lunch was served. Mrs. Moon was presented with a birthday cake with four lighted candles on it. The visitors enjoyed getting a button, ring, money, thimble horse-shoe or wish-bone in their piece of the cake.

As the visitors left for their homes they wished Mrs. Moon many happy returns of the day.

FOUR YEARS FOR RAYNOR

Picton, Ont., Mar. 5—Four years in Kingston Penitentiary was the sentence imposed on Ralph Harry Raynor, bankrupt automobile dealer of Picton and Belleville, whose trial before Judge McLean in County Judges' Criminal Court here, terminated Saturday afternoon. Raynor was convicted on three separate charges of selling motor cars contrary to agreement, and converting the proceeds to his own use. On each count he was given four years, the terms to run concurrently.

Resigned to his fate, Raynor accepted his punishment in silence, but it was apparent that he felt the disgrace very keenly. After shaking hands with his counsel, he walked from the court room followed by a police officer, and was at once locked up in the county jail. No appeal is filed—and none is anticipated—he will likely be conveyed to Kingston Penitentiary within a month.

In passing sentence Judge McLean described the prisoner as a generous, big-hearted reckless fellow who became pressed for money and resorted to bad business methods in an effort to recoup his losses. He had looked into Raynor's past record and did not believe him to be the criminal type.

PRESENTATION AND ADDRESS

On Monday evening, February 27th, members and friends of Bethesda United Church gathered in the basement for a social evening. The basement was well filled, and a very enjoyable time was spent.

The gathering being called to order, Mr. R. J. Noyes was chosen as chairman, and after a short program, given by local talent, the real reason for the gathering was revealed. Mr. and Mrs. Cecil Cavanaugh and Gerald were asked to take seats before the audience, and an address of farewell was read by Mrs. F. E. Geary and they were presented with a handsome electric floor lamp and Gerald with a pair of military brushes. The following is the address.

Mr. and Mrs. Cavanaugh

Dear Friends:—

It is with very deep regret that we have learned of your intention of leaving our community and we feel we cannot let you go without expressing in some tangible form our feelings of friendship toward you and our deep appreciation of your services in all branches of our church's work since coming amongst us.

Although your sojourn here has been comparatively short, yet we have learned to count on you in all our activities in church and community work. Your cheerful and hearty support of all that is best and highest here has been a source of great satisfaction to those upon whom the burden of the work has rested, and has proven to all that Our Master's work holds first place in your hearts.

We are very reluctant to see you go. We shall miss you more than we can say but we know our loss will be others' gain. The same sterling qualities that have cemented friendships here will surround you with true friendships in your new home, and we feel sure you will be busy and useful in the Master's work whenever and wherever you have an opportunity.

We wish you to carry away with you our sincere best wishes for the future of health, prosperity and happiness.

We ask you to accept these gifts as tokens of our friendship and goodwill, that you may use them and that among new friends they may remind you of old friends, old scenes, and old times among the people of Bethesda Church and community.

Although taken completely by surprise, Mr. Cavanaugh replied briefly expressing his sincere thanks. Different members of the church were called upon and gave expression of regret at the loss to the church of such valued members as they had proved to be.

TRUCK DRIVERS ASKED TO HELP

The co-operation of all truck drivers is requested during the spring season stated Highway Traffic Officer Frink to the Ontario. Half load must be carried during the spring months according to certain sections of the Highway Traffic Act. The officer stated that more damage is done by heavy traffic during spring season when frost is coming out of the ground than all the rest of the year. Prosecutions will follow if the regulations are not obeyed.—Belleville Ontario.

SUCCESSFUL EUCHRE

A very successful euchre party was held in the fire hall on Friday evening last, under the auspices of the Women's Institute.

Mrs. R. Weliman and Mr. J. Burns were the prize winners.

Y. M. P. C. DANCE

A number of the lady members of the Married Peoples' Club held a dance in the club rooms on Thursday evening last.

Music was furnished by Messrs. Sills and Barrager and Mrs. V. Reid. A good crowd was present and a very enjoyable evening spent.

Belleville Won Third Game and Took Round 8--6

BELLEVILLE AND MADOC H. S. RAN SPECIAL TRAINS— BELLEVILLE WON GAME 2-0—OVER 600 IN ATTENDANCE

Before giving a report of the final game between Madoc and Belleville high schools, we believe in fairness to the Madoc team the following should be published.

Madoc won the Trent Valley League, and defeated Havelock in the first round of the semi finals and the right to meet Belleville in the second round.

Belleville and Madoc agreed to play home and home games to decide the winners of the second round, and the right to meet Peterboro in the finals.

Madoc won the first game 3-2; which was played in Belleville.

The second game was to have been played in Madoc. Manager Howard of the Belleville team, took the matter up with Mr. Stickwood, President of the Interscholastic league, who notified Madoc, that as there was no covered rink in Madoc, the game could not be played here, as the O. H. A. rules said that all games must be played on a covered rink. Madoc chose Stirling for their home game. The Belleville team won the game in Stirling 4-3, but failed to live up to the O. H. A. rules and Madoc protested the game. A meeting of the executive was called to decide the protest. The protest was thrown out, on the grounds that the interscholastic league was not being governed by the O. H. A. rules, and Madoc was ordered by Mr. Stickwood to play the third game in Stirling on Monday night. One would think that if the O. H. A. rules were to govern in some cases they would have in all the cases, but such was not the case. Mr. Stickwood, as President of the league, simply used them when they would be of advantage to the Belleville team.

Had the second game been played in Madoc, there would have been no protest, and a third game necessary. The hockey fans of Madoc were certainly surprised to think that the Belleville board of Education would allow their team to win by such unfair methods.

The final game in Stirling was the best seen between the two schools. Both teams played beautiful combination and the pace was fast from beginning to end. The Belleville boys were faster and had a little the better of it throughout the whole game. Although Madoc failed to tally, it was only because luck was against them, as Caverly was through twice. The first time he missed the corner of the net by a hair and the second time the Belleville goalie threw his stick.

Belleville's first goal was a lucky shot which beat Wallbridge, the second one was well earned, playing combination brought the puck to the Madoc defence, when Young shot, Wallbridge made a beautiful save, but Galway came in the rebound and made Belleville's second counter.

Both goalies played good games and Madoc's lose cannot be blamed to Wallbridge, while Collings saved the day for Belleville.

Caverly and Whytock were the best for Madoc, with Rupert a close second. Phillips played a good game on the defense, but was weak on the rushes. Ross didn't get going, until the final period when he worked hard, but failed to stick to his wing leaving his check uncovered.

In the first period Madoc missed many chances to score, but were inclined to make individual rushes when counters might have been made if the puck had been passed.

The Belleville team played a different game than in the two previous matches, more combination was used and the individual play forgotten.

In the second period Belleville had the most of the play and ran in their second counter.

The third period Madoc was the best and only the splendid work of Collings kept them off the score sheet.

Jackson, of Peterboro, referred a beautiful game and both teams left the ice, knowing that they had received a fair deal and that the better team on the night's play had won.

Puckerings

By defeating Tweed 5-1 on the round, Stirling won the Trent Valley League honours.

In an exhibition game Campbellford defeated Stirling 3-1. Hoskins, Campbellford's world beater, scored twice.

Peterboro defeated Belleville H. S. 5-3, in the first game of the finals. Peterboro plays in Belleville Saturday night.

Over $2000 has been spent for special trains to hockey matches, in this league, Madoc having had four out of the six trains run.

We understand that the county intend buying a snow plow next winter and that the roads will be kept open for motor traved. If such is the case, the covered rinks in this district will not be able to accommodate the crowds. Many were turned away from Stirling last Friday night.

CANADIAN WOMEN OF NOTE AND THEIR WORK

The following paper was read at the January meeting of the Women's Institute, by Mrs. J. B. Hough.

When one attempts to even enumerate the Canadian Women of Note, let alone discuss their work, one finds herself wandering afield, not knowing whither to turn for a beginning and utterly hopeless to see the goal in view.

Although a comparatively young country, renderfully endowed with natural resources of minerals, forests and soil, Canada is just as fully rich in resplendent womanhood, that has meant and will mean a continued ascendency of Canadian Citizenship. I would, therefore, briefly mention a few of the leading ladies in various walks of Canadian Life and perhaps discuss the lives of some of them. No doubt many of you are well acquainted with the lives and works of several of these.

Two of the leading artists are Mary Heister Reid and Mrs. F. MacGillivray Knowles. Mary Heister Reid was deeply absorbed in her work, never wholly satisfied with what she had done and always striving after perfection. Perhaps she was reticent about her work because she realized how painful is the way to perfection, in one's art, and how few there be who find it. She derived her inspiration from lovely things such as glimpses of spring and autumn woodland, moonlight vistas, gorgeously colourful gardens, lovely skies divinely tinted, ends of evening, and the countless flowers of the fields. Mrs. Reid did many charming little landscapes, but one will remember her flower pieces. One is glad to know that some of her finest work has been bought for the nation by both Dominion and Provincial governments. A number of her paintings are in possession at Annesley Hall, Toronto. While not a Canadian by birth, she was a self-adopted Canadian. She was truly a Canadian painter, for her life's work was done in this country and she became a Canadian as early as 1885 through her marriage with the distinguished painter, George Agnew Reid, R. C. A. She died in 1921 at the age of 67.

AUTHORS AND POETS—L. M. Montgomery—author of the Anne Books, Emily Books, The Blue Castle, Kilmeny of the Orchard and the Story Girl. She was the daughter of the late Hugh John and Clara Woolner Montgomery. Her mother died before she was two years old and she went to live with

LOCAL AND PERSONAL

Mr. W. T. Nugent was in Cobourg on Friday.

Mrs. Kenneth Foster, of Moira, is spending a few days in town.

Mr. W. H. Nugent, of Belleville, spent the week-end in town.

Mr. Frank Ballard is visiting his sister in Peterboro, for a few weeks.

Miss Grace Aylsworth, R.N., of Niagara Falls, is visiting at her home in town.

Miss Inez Carswell, of O. B. C., Belleville, has been spending a week in town.

Mr. Raymond P. Rivers, of Albert College, Belleville, spent the week-end at his home here.

Mr. Courith Foster, of Toronto, is visiting at the home of his parents, Mr. and Mrs. J. Foster.

Mrs. L. Curtin, of Port Hope, is spending a few days with her parents, Mr. and Mrs. G. Foote.

Rev. T. G. Marshall and Mr. Geo. West are attending the Presbytery of Kingston in Belleville this week.

Mr. and Mrs. George Empey, of Madoc Township, have been spending a few days with relatives in Belleville.

Mr. Karl Whytock, of Queen's University, Kingston, spent a few days with Mr. and Mrs. Charles Whytock.

Mr. and Mrs. Allen Hailstone and family have returned to their home in the west, after spending the past three months in Madoc.

Mrs. G. W. Rivers attended the annual convention of the Ont. Prohibition Union in Toronto last week as delegate from the W. C. T. U.

Mr. George Burkitt returned to Toronto on Friday last, after spending the past two weeks in the Jarvis Settlement, the guest of Mr. Harry Rooke.

—Ladies' Guild of St. John's church are holding a Sale of Home Cooking in Tufts & Kelly's store on March 17th. 9-2

Mrs. W. T. Nugent returned to her home in town on Thursday last after spending several months in Belleville through illness. She was accompanied by Mrs. W. H. Nugent.

GOLDEN WEDDING

Fifty years ago, the 27th of February, Sara Moorcroft and C. A. Sager were joined in holy matrimony and on Monday their children and grandchildren, with other friends gathered at their home in Queensboro to celebrate their Golden Wedding and present them with a purse of gold.

There were present at this happy gathering, their four sons and one daughter, also thirteen of their grandchildren; all being present except one grandson, McLaren, of Ottawa, and their adopted daughter, Mrs. W. E. Barr, of Newark, N. J.

The children were Thos. and Robt., of Queensboro, Harry, of Ottawa, and Fred on the old homestead, from which his father retired twenty-three years ago. The daughter is Mrs. B. Leslie, also of Queensboro. Mr. and Mrs. Thos. Moorcroft, Mr. and Mrs. Thos. Tanner and Mrs. (Rev.) Parker were also present.

Mr. and Mrs. Sager were also the recipients of many congratulatory messages from friends at outside points.

MADOC TO HAVE COVERED RINK

Mr. Frank Smith, Madoc's covered rink promoter, assured the Review to-day that Madoc would have a covered rink before next winter. Thirty-five hundred dollars has been secured and the balance of the money is in sight.

Mr. Smith said that although no canvass would be made anyone wishing to support the rink financially could do so.

In the last league game of the season Stirling took in over $640. When one game brings a gate as large as that surely money invested in a rink would draw good interest.

TRINITY W. M. S.

The March meeting of the Women's Missionary Society of Trinity Church was held in the Ladies' Aid room with the President in charge. Mrs. H. Bailey and Mrs. A. Reid led in the devotional exercises.

A letter was read from the supply secretary, giving Madoc's allocation as one dollar, for freight, and clothing for children. Layettes, clothing for aged people, and hospital supplies for western stations are also acceptable.

The ladies decided to serve a hot supper down town on Saturday afternoon, March 24th, committees being appointed to make the necessary preparations.

It was decided that all the ladies of the congregation be invited to the Easter meeting, and that light refreshments be served.

The president, Mrs. L. Ashley, spoke a few words of sympathy for the sick.

Mrs. Geo. Huffman gave thoughts from the study book, in an instructive and interesting manner. The poem "Our Best," read by Mrs. J. B. Hough, completed the program. Mrs. T. L. Nickle closed the meeting with prayer.

FOOT INJURED

On Sunday morning last in Trinity United Church Mr. George Huffman slipped and fell down the steps on the west side of the church and twisted his left foot. The ligaments are broken and it is very painful. It will be some weeks before Mr. Huffman is able to use the injured member.

COMING EVENTS

OAKDALE REBEKAH LODGE will hold a Euchre on Friday, March 16th, in I. O. O. F. Hall. Rebekahs come and bring your friends. Admission 25c 10-2

THE WOMEN'S MISSIONARY Society of Trinity Church intend serving a hot supper, on Sat. Mar. 24, in the store formerly occupied by Mr. T. Tucker. 10-1

THE W. M. S. OF THE PRESBYterian Church will hold a sale of Home Cooking, on Saturday, March 10th, in Mr. Weliman's store. Proceeds to go to Expense Fund.

AN OLD TIME CONCERT WILL be given under auspices of Hazzard's United Church on March 16th. St. Patrick's Eve, in Hazzard's Orange Hall. Admission 25c. Lunch served. 10-2

Baby Chicks for delivery any time after April 1st, 15 cents each or $15.00 per 100 in any quantity. We guarantee 100% live delivery, replace all losses on the first day Free, and replace all further losses up to the thirtieth day at half price with 10% deposit to insure prompt delivery. Buy from Crans on Only one grade. The best. Cranston's Poultry Farm, Shipping Cut 9 tf.

A PERFECT PEACH

Or Love Among the Ledgers

By J. P. Loughnan

She had a fascinating little nose. It turned up a trifle at the tip in a way which seemed to give her mouth more perfect shape. As she stood beside my desk in the private office, all the questions I had meant to ask her went clean out of my head. So, instead of asking if she knew how to make up a ledger, I said: "Do sit down," and placed a chair for her near my own.

"I see your name is Daphne Heather," I went on, consulting the note Jimmy Marsh, our head clerk, had given me.

"Yes, sir."

She spoke timidly, but her voice was musical.

"Well," I told her, "my name's Bill Lawton. I'm looking after the firm because my uncle's on the Continent for a month. That's why you're interviewing me."

"I see, sir," she said, with just the faintest smile which made her lips curve adorably.

"Please don't call me 'sir.' Now, about this job you want, Miss Heather. Here's the difficulty. My uncle's not very keen about lady book-keepers; in fact, he's rather prejudiced against them. Still, if you're very efficient, that might alter the case."

The large blue eyes regarded me rather pathetically.

"To be perfectly honest, Mr. Lawton," she said, "I'm not yet very efficient. But I am keen to get a job, and—and"—a faint wave of color touched her cheeks — "Mr. James Marsh has promised to coach me if you'll give me a trial."

"Indeed!" My tone was rather stern. "Indeed! Now let me give you a word of advice on the brink of your business career, Miss Heather. Don't be too ready to accept these offers of help from male clerks. Men are—er—that is, they're not—er—I mean you've got to be careful."

An expression of the prettiest horror touched her sweet little face.

"Careful of Mr. Marsh?" she faltered.

"Oh, Jimmy's all right in his way," I admitted, "if you understand his point of view. He's kind and all that, but a bit of a woman-hater. You must not go falling in love with him, Miss Heather. That's what I really mean."

I looked at her in a paternal sort of way, but she only laughed.

"Then you will give me a trial, Mr. Lawton?"

"I'll give you a month's trial. Whether or not you get the job then will depend partly on yourself, partly on my uncle. When he comes back I'm no longer in charge. You see?"

"Quite. Thank you very much indeed. May I start at once?"

"You may. Mr. Marsh will set you going. Please say I want to see him when he has a moment to spare."

Again she thanked me prettily and tripped out of the room. I tried to concentrate on business, but found it difficult. And a full twenty minutes passed before he came to see me.

"Mornin', Marsh!" I said dryly. "I've been interviewing that young woman you recommended as book-keeper. She does not pretend to be very efficint."

Jimmy is thirty-five, though he looks young for his age. His black hair has a silly natural wave, the sort of thing a girl might admire. He seemed even younger than usual today.

"Miss Heather is a straightforward girl," he said. "That's why she told you the truth. I'll undertake to make her efficient enough by the time the Old Man comes back."

"Seems rather like turning the office into a kindergarten," I grumbled. "My own fault for giving her a trial. Now look here, Marsh, understand this right away. There's to be no flirtation."

A twinkle of amusement flickered in his eye. However, he answered gravely enough:

"I should not dream of such a thing, Mr. William."

The days which followed were trying ones for me. Often I stayed a bit late at the office. On every occasion when at last I packed up to go home there at the ledger-desk sat Jimmy close beside Daphne Heather. It was impossible for me to find fault because he was always explaining some book-keeping rule when I appeared. But the strain was awful. So at last I determined to put down my foot.

It was on a Monday, when she'd been at the office a week. When closing-time came I stayed on, although I had nothing to do. For twenty minutes I waited, then jumped up and entered the book-keeper's room. Yes, there they were!

"Marsh," I exclaimed severely, "this won't do. You can't burn the candle at both ends. You're a hard-working, efficient, reliable managing clerk; you do quite enough work in a day without having the extra strain of this overtime tuition. Go home at once!"

"I assure you, Mr. William, it's no strain ——"

"Don't argue. Go home!"

"But I promised to coach Miss Heather."

"Marsh," I said solemnly, "Miss Heather shall not suffer through lack of tuition. Take your hat and coat and go home at once. I will coach Miss Heather!"

For a moment he seemed inclined to continue the argument. Then he thought better of it, got up, bade us good-night, and went away.

I seated myself beside the girl, and we both went over the open ledger. A tiny frown lined her white forehead as she stared at the rows of figures from under her curly black lashes.

"Better put a straight nose on your sevens," I advised softly. "Otherwise they look rather like nines. This is what I mean." I laid my hand over hers and guided the pen.

"Yes, that is a plainer seven," she agreed, and gently disengaged her hand.

Well, we made quite good progress that evening with the ledger. Afterwards I asked her to dine with me. She hesitated. But when she realized that I wanted to discuss the theory of book-keeping, all was well. We dined at a quiet little restaurant I know, in the light of a pink-shaded lamp. On second thought, I postponed the book-keeping discussion.

Next morning a letter turned up from one of our clients in Derbyshire raising many important questions. I sent for Jimmy.

"Marsh," I said briskly, "you must run down and see old Bevan at once. I'll wire and say you're coming. Here's his letter. You'll have to stay the night in Derby, so cut along home and pack your bag. If it should be necessary to stay away a couple of nights do so. I shall understand."

He appeared a trifle taken aback. This was the kind of job I usually liked to take on myself.

The day seemed uncommonly long, but at last came closing-time. Being now responsible for Jimmy's work, I visited the general office and saw them all out. Daphne, entrenched behind ledgers, hesitated. I pulled up a stool and joined her.

"Do you approve of new sevens?" she asked shyly.

I studied the figures with close attention.

"They certainly are less like nines," I admitted. "But what about a little tilt to their noses? This is what I mean."

I laid a hand over hers and guided the pen.

"But I thought you preferred straight noses, Mr. Lawton?"

"Oh, no-o-o! A tip-tilted nose for me every time!" I declared, with veiled enthusiasm, looking deep into her big blue eyes.

Down came the curly lashes, while a delicious blush swept her smooth cheeks. It was just about dinner-time when the ledgers were finally posted. We got the same table. She looked lovelier than ever under the pink lamp.

Next morning I went to the office with a feeling of relief. Jimmy would still be in Derbyshire. Then I found a letter from him to say he was returning that night. Well, this meant another dinner with Daphne, and perhaps—— Could I screw up my courage? She had given me no reason to hope. But he who hesitates is lost.

That evening I entered the general office with a beating heart. The clerks shoved away their books briskly. Then I gave a gasp of dismay. The ledgers were al closed, and one of our fellows was shoving them into the strong-room. Daphne had slipped from her stool and turned towards the door. I hurried after her.

"Miss Heather, what about pour—er—tuition?"

"If you please, Mr. Lawton, I particularly want to get away to-night." The blue eyes were pleading.

"By all means, Miss Heather. But I say, what about the spot of dinner presently?"

"Thanks ever so much, I'm engaged to-night, Mr. Lawton.

As she left the office, a horrid suspicion gripped me. Jimmy's train would reach St. Pancras at 6.45. I decided to meet him.

I reached the station just on time, and—yes, there she was! While I hesitated at the barrier the train rolled up. Jimmy jumped out and ran to her. Next moment they were in each other's arms. I dashed out of the station and took the first bus home.

Next morning Jimmy reported that the Bevan business was O.K. When he had finished I told him to send Daphne along. She came in looking as lovely as ever.

"You won't want to stay at the office much longer?" I suggested.

"Oh, yes, I do—if you'll let me?" she contradicted.

"But look here," I argued. 'Marsh earns a good salary, he has a comfortable flat, and no relations to support"

"Well?" she breathed.

"Well, you—er—you love him, don't you?"

"Yes, of course I do!"

"Then I'm sure he won't want you to go on working here."

"But I want to, and that's enough for him. He's always been most frightfully kind ever since I can remember."

"You've known him all that time?"

"Of course! Oh, but you don't know. We thought it would be rather fun not to tell you——" She broke off, bubbling with laughter.

"You mean you've been engaged to Jimmy all along?"

"No, I mean his mother married twice."

"Well?"

"And I'm the baby of the family."

I fairly leapt from my chair.

"Do you mean," I demanded, trying to keep my voice steady, "that Jimmy is your half-brother?"

She gave a demure little nod. She hadn't time for more, because next moment she was in his arms.

"You precious sweet!" I stammered, "you will not want this job!" And I kissed the tip of her dear little tilted nose.—(Answers.)

The way to get rich is to lay up part of your income and as much as possible of other people's.

MAURITANIA'S PROPELLER

The world's fastest ocean liner is undergoing a thorough overhauling in the floating dock at Southampton.

Geese

Oh, swans are lovely; lovely, too, are geese
White in a greensward, dreaming on a stream,
On whose calm surface lilies they might seem.
I have seen geese in proud procession gleam
Bright as high sailing clouds, whiter than fleece
Or crested seas, white as the soft increase
Of tranquil snowfall and as filled with peace;
Their beauty is like beauty in a dream.

I have seen them, when summer's heat brings rain
In driving gusts, stand with their heads held high
Facing the downpour—O, before you die,
Would you might see them when the sun again
Shines on their dazzling whiteness, and they fain,
Impelled by some wild ecstasy, would fly.

—Charles Winks.

Labor and Immigration

Le monde Ouvrier (Ind.): From the strictly labor point of view, the immigration queston can be summed up as follows: Free citizens should not be hindered from seeking to improve their condition by emgrating from one country to another, provded their transference to the other country does not constitute an economic danger to the worker of that country. It should be established with all possible accuracy what each industry can absorb in the way of additional hands without compromising existing conditions of industry. As soon as this point is passed, the balance is broken and the surplus labor becomes a menace not only to the country's workers but to the immigrant workers themselves, who are compelled by he force of circumstances to accept lower wages and are thus prevented from adopting our standard of living, becoming pariahs who cannot be assimilated.

With Mr. Coolidge positively out of the running, we make a bid for the concession of checking hats at the ringside.

Sumernian Queen Owned Vanity Case 5000 Years Ago

Excavations at Ur by Joint Expedition of U.S. and British Explorers Discover Richest Treasures Ever Found in Tomb

Philadelphia—Queen Shub-Ad, Sumernian ruler of approximately 5,000 years ago, wore golden garters, golden ear rings, a wig surmounted by a golden ornament resembling a large Spanish comb, a heavily beaded cloak and carried her rouge in vanity cases of the period—cockle shells.

Discovery of the queen's body near that of her king was announced in a report from Leonard Woolley, director of the joint expedition of the Museum of the University of Pennsylvania and the British museum in Ur, of the Chaldees. Mr. Woolley said the treasures found in the tomb were the richest ever unearthed in Ur.

The tomb of the queen was found abutting the king's burial vault which had been robbed of its treasures, and in the centre was a burial pit containing the bodies of more than 50 men and women, the warders of the tomb. A sloping ramp led down into the pit, the report stated and on the slope lay the bodies of six soldiers of the guard, their crushed skulls encased in copper helmets and their spears shouldered. They been killed in their places to remain as sentinels of the dead.

Part of Grave is Shambles

"The rest of the grave area was a shambles," Mr. Woolley said, "for in the narrow space were strewn 50 bodies of those sacrified to the spirit of the dead. Along one side were men, their daggers on their hips; against the foot of the tomb lay the chief ladies of the harem, eleven of them wearing what must have been full court regalia, consisting of elaborate head dress of gold ribbon, wreaths of gold mulberry leaves hung from strings of lapis lazuli and Cornelian beads, silver pins with lapis heads and great gold earrings.

"Above the hair of each woman was a silver palm with long point ending in solid rosettes of gold, shell and lapis and beside each lay cackleshells containing face paint and little alabaster ungent vases."

Returned With Thanks.

As he was passing beneath a ladder reaching up to the windows of a recently built house the irascible colonel was struck on the head by a large piece of putty.

He seized the putty in one hand and, racing up the staricase of the house, entered the room from which it had been thrown. He was confronted by three stalwart men.

"Who threw this?" he cried, angrily.

"I did," retorted the biggest of the three. "What are ye goin' to do about it, eh?"

After a moment's sober reflection the colonel murmured: "Oh, I just thought I'd return your putty."

'Could I see the captain of this ship?" "He's forward, miss." "I'm not afraid. I'm used to men."

Medical science, we read, is still hunting for the cold germ, hoping, we presume, if it is found, to make things hot for it.

Society pays for its sins. It once made Willie speak pieces on Friday afternoon, and now it must listen to his after-dinner speeches.

Strange Uses For the Airplane

Passing strange are some of the uses to which the airplane is now being put in certain far corners of the world, we read in an Associated Press dispatch form Croydon, England, that great aviation center in Great Britain. Of course we are familiar with the use of airplanes for destroying deleterious insects by scattering clouds of poison, and with the use of the airplane in mapping localities otherwise difficult of access. It is more surprising to hear that—

In Formosa, airplanes have played the part of messengers from the gods. Head-hunters were in the habit of ambushing lumbermen in the jungles. Having first circulated a report that stupendous bird creatures of Formosa mythology were soon to be dispatched by the gods as a warning, the Japanese Governor-General sent a pair of such celestial birds over the haunts of the head-hunters. They dropped a nest of explosive eggs—and the head-hunters are now as quiet as a dud shell.

When the gulf of Finland froze over and the sailors on thirty-eight ships locked fast in the ice seemed in danger of starving, Finnish army airplanes carried food to the beleaguered craft.

Airplanes work with whalers in the North Pacific in discovering the leviathans of the deep. Norse fishermen off Stavanger use the airplane for "spotting" shoals.

The forests of Alsace-Lorraine are sprayed from the air to kill plagues of caterpillars. In woods, near Berlin, poison-gas bombs have been dropped from airplanes for the same purpose. In south Russia airplanes scouted for hosts of locusts. One such host was found five miles long by three miles wide. Troops made all human beings and cattle evacuate the territory, and the airmen then flew at night over the locusts, spraying them with poison gas.

The seaplane of the Dutch-American party which explored Western New Guinea was of great use, particularly in overawing the fierce Papuan tribesmen. The tribesmen on being asked if they had seen the plane ran up and down in great glee, with arms outstretched, as if playing at a child's game.

Hydroplanes are surveying protographically the Great Barrier Reef, off Australia. The same method is being used to survey the great jungle of Borneo and the delta o fthe Irrawadi, in Burma.

In Eastetrn Siberia the Russians have been using airplanes to connect their remotely situated gold-fields in the Aldan territory. The planes carry the gold in five hours, whereas formerly the journey by horres, through almost impenetrable forests, required thirty-five days.

Like the "Pidgys"

Londoners Help Pigeons Escape City's Pied Piper at St. Paul's

London. — While London disapproves and bystanders do all they can to hinder the work of the city's official Pied Piper, some 2,000 pigeons of St. Paul's are finding they way into pigeon pies.

The London City Corporation having decreed that 2,000 of the pigeons which cluster before the steps and pillars of St. Pauls as an item of every tourist's London program must go, it became the duty of one Dalton, the city's rat-catcher, to trap them.

He first built a wire cage measuring 14 by 6 feet and provided himself with corps of "expert trappers."

His first day, however, was like the first bag of a hunter with a bent shotgun. He caught, all told, twelve. The crowd that gathered was wholeheartedly on the side of the pigeons. They fed the pigeons so that the grain trail which led into the trap would not lure them. And they engineered noises and movements to scare the pigeons away from the trap.

Trapper Dalton thereupon resorted to subterfuge. First, he came back early Sunday morning while most people were abed. Secondly, his assistants had for hours the night before been sweeping away the crumbs of bread which good-hearted people had strewn before the pigeons. Third, the assistants stood in such a way as to hide the standards of the cage from the birds. He netted 250 birds in the catch.

The pigeons are being sold to a poultry dealer.

Windfall.

An honest speeder had just hit a dog and had returned to settle for damages, if possible. He looked at the dog a moment and addressed the man with a gun.

"Looks as if I'd killed yer dog."

"Certainly looks that way."

"Very valuable dog?"

"Not very."

"Will five dollars be enough?"

"Well—I guess so."

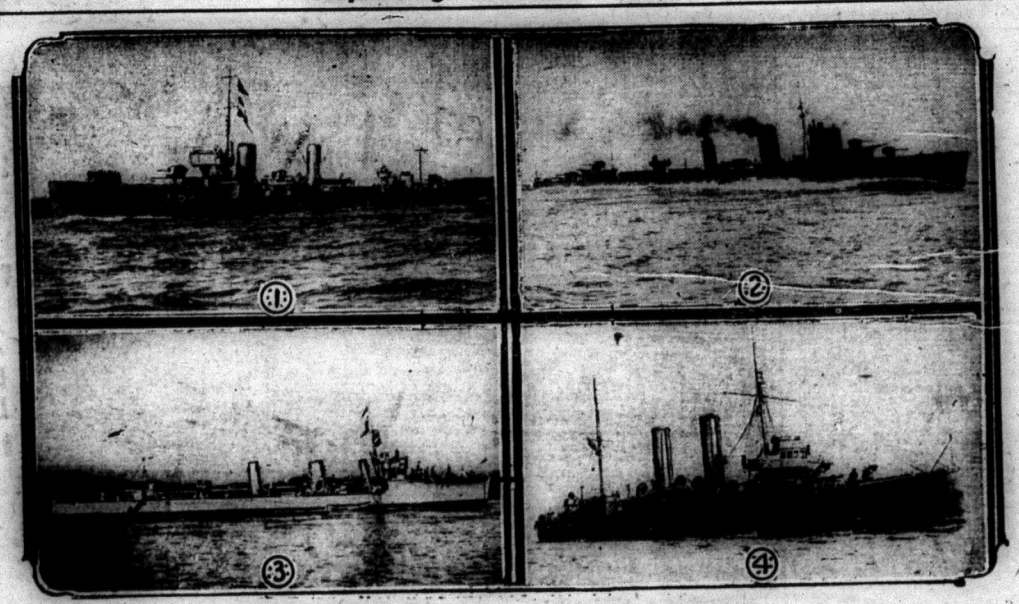
"Sorry to have broken up the hunt," said the motorist pleasantly as he handed the owner a crisp five dollar bill.

"I wasn't going hunting—just out in the woods to shoot the dog."

"Motor War on Hand."—Headline. But that doesn't make it any safer for those on foot.

The rumble seat of a coupe is better than the grumble seat of a limousine.

Replacing Canada's Navy



PATRICIAN AND PATRIOT GO TO THE WRECKERS AS OBSOLETE

With obsolete vessels being scrapped and replaced, Canada's navy is being brought up to date. The first picture in the ABOVE layout shows H.M.S. Vancouver, one of a pair of destroyers which are being loaned to Canada for the time, between the scrapping of old vessels and the building of new ones. The other destroyer of the pair is the Champlain. They were formerly the Torcador and the Torbay. Picture No. 2 shows the new British destroyer Amazon, a type which is being suggested as possible for Canada's replacements. A destroyer of this type takes 21 months to build, and is of more complicated construction than the battleships. No. 3 shows a Canadian destroyer which is now meeting the ungrateful fate of age, H.M.C.S. Patrician, called after Canada's royal princess, this gallant vessel has outlived its usefulness and is now being stripped of guns and equipment to be sold as junk. A similar fate has overtaken the destroyer Patriot. No. 4 shows the light cruiser Rainbow, Canada's first naval unit.

HOW DELICATE GIRLS ARE MADE STRONG

Rich, Red Blood Needed to Keep Up Their Vitality.

It should be borne in mind that pale, bloodless girls need plenty of nourishment, plenty of sleep and regular out-of-doors exercise. But a lack of appetite and tired, aching limbs tend to hinder progress. To save the weak, thin-blooded sufferer, she must have new, rich blood, and nothing meets a case of this kind so well as Dr. Williams' Pink Pills. These pills not only enrich and increase the blood supply, they help the appetite and aid digestion, relieve the weary back and limbs, thus bringing new health and strength and transforming anaemic girls and women into cheerful, happy people.

The value of Dr. Williams' Pink Pills in the case of anaemic girls is proved by the case of Miss Lucy Stoddart, Margaretville, N.B., who says: "From the age of 12 to 15, I was in an anaemic condition. I was very thin and nervous, had no appetite and had no desire to take part in the doings of those of my age. My mother got tonic after tonic for me, but they did me very little good. Then Dr. Williams' Pink Pills were recommended and almost from the first they seemed to be just what was needed to restore my strength. After taking the pills for a time I felt an altogether different girl. I got up in the morning feeling bright and active, and ready for work or play. Since then I have always taken a couple of boxes of Dr. Williams' Pink Pills in the spring as a tonic and have thus kept in the best of condition."

Every weak girl should promptly follow the example of Miss Stoddart, feeling sure that the pills will renew her health. You can get the pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The modern idea in fashion, so far as we have been able to observe, seems to show everything but the brains.

The dominating personality doesn't help much, if the other fellow is driving a truck.

To-day's unfinished task is a mortgage on to-morrow.

Politicians live off the fathead of the land—and everybody else too!

OWL-LAFFS

And this is what we'd like to be;
Good and kind and neighborly.
Big of heart and broad of mind,
Glad with every joy we find,
Friendly as we go our way,
Generous handed day by day,
Keeping though we rise or fall
The love and good esteem of all.

He—"Are you cold?"
She—"'Bout to freeze."
He—"Want my coat?"
She—"If you please."
He—"Want it full?"
She—"Just the sleeves."

"It's been a hard grind," sighed the mechanic as he replaced the valves.

"Daddy, mother is a wicked woman. She burned the Bible this morning."

"Never mind. We can get another Bible, but there was only one record in existence that said your mother was born in 1888."

Kissing, according to scientists, is unknown among the savage tribes. And some day we are going to figure out whether this constitutes an argument against kissing or in favor of it.

Higher Mathematics.

Auto — Autonomy — Autopsy.

The girl in the movie ticket office said that the usher in the theatre is the leading man.

Freedom of the Sea.

Girls, when they went out to swim,
Once dressed like Mother Hubbard;
Now they have a bolder whim:
They dress more like her cupboard.

The best way to outlaw war would be to hang the outlaws who cause it.

Husky Twice Saves Master's Life

"Mountie," leader of the Chateau Frontenac dog-team, has many friends, but none who watch his career with more interest than Sergeant William Grennon of the Royal Canadian Mounted Police. The Sergeant, who is sixfoot-three and the crack marksman of the force, tells, with tears of pride in his eyes, how "Mountie," whom he raised from a pup, saved his life on two occasions.

An early freeze in the North Country. The team with "Mountie" in the lead crossing Sturgeon Lake. Then the realization that the ice was cracking and bending and the knowledge that it was too thin to allow the sleigh and driver to stand still long enough to turn. There was no retracing, they must go on. "Mountie" waited for no word of command. He lead the team on, on at a breakneck speed across an expanse of seven miles, with death facing them at every step, and reaching the opposite shore in safety.

Once again, the following year, the Sergeant claims that "Mountie" saved his life, when he cleared with one bound a cut in the ice, six feet wide caused by the swift current, the others following.

Over thousands of miles through the snow bound north, on missions of life and death, Mountie has accompanied Sergeant Grennon. When Mountie left five years ago for Quebec the Sergeant was heard to say that he had lost his most faithful and his most beloved friend.

RED ROSE TEA "is good tea"

Red Rose Orange Pekoe is supreme

Frostbites

Minard's Liniment counteracts inflammation, eases the pain, soothes and heals.

MINARD'S "KING OF PAIN" LINIMENT

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them uphalf the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic; or constipation; or diarrhea. Or those many times when you just don't know what is the matter. For real sickness, call the doctor, always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just as pure, just as free from dangerous drugs, but why experiment? Besides, the book on care and feeding of babies that comes with Fletcher's Catstoria is worth its weight in gold!

EXPECTANT MOTHERS

Read Mrs. Menard's Letter. Her Experience May Help

Chatham, Ontario.—"I want to tell you how much good your medicine has done me. Before my baby came I felt so weak and run-down that I could hardly do my work. My head ached continually and I was so discouraged that I could cry from morning till night. I had another baby just one year and a half old and it gave me a lot to do. So I thought I would try Lydia E. Pinkham's Vegetable Compound, as I had read so much about it in the little books. I found a difference right away as my head was relieved and my tired feelings gone. My sister had been doing my washing and she continued doing it, as she said it might set me back if I started to do it again. It sure did help me and I had taken just two bottles when my baby came. He is a fine big boy, now nearly five months old. I am taking your medicine again and I am able to do my work all by myself now. I always recommend the Vegetable Compound to women, and especially to expectant mothers, as I believe they need help at these times."—Mrs. OLIVER MENARD, 24 Harvey St., Chatham, Ontario.

High School Boards and Boards of Education

Are authorized by law to establish

INDUSTRIAL, TECHNICAL AND ART SCHOOLS

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

MANY MOTHERS RECOMMEND THEM

Baby's Own Tablets Are Fine for Nervous, Sleepless Children.

From Canada the fame of Baby's Own Tablets is spreading over the world. Mothers recommend them to other mothers and wherever they are tried nothing but words of praise are heard for these pleasant tasting little tablets that promptly relieve the minor ailments of young children.

"Baby's Own Tablets are one of the best remedies for children's ailments I have ever used," says Mrs. Arthur T. Allen, of Auburn, Me. "My little girl was nervous and could not sleep. I tried the Tablets and she was relieved at once. She was also troubled with constipation and nothing seemed to help her. I had used the Tablets but a short time before her bowels were regular. All mothers should keep Baby's Own Tablets in the house for they are a valuable remedy."

Baby's Own Tablets are sold by all druggists or will be mailed on receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

Why Prince of Wales Was Named David

London.—Most of us know the Prince of Wales is called "David" by his relatives and never "Eddie," there will be some interest in the Dowager Lady Radnor's claim in her newly published book of reminiscenses that it was she who suggested this name.

Lady Radnor believes the Britons are descended from the ten lost tribes and the royal family from King David, the chap who slew Goliath. She sent a message to the Queen, then Duchess of York, asking that if a son was born to her he should be called David. The Duchess liked the name, but "wondered what reason she could give" for calling her son by it.

Lady Radnor suggested that it could be included among the other names of the four patron saints of these islands and that, she writes, "is how the Prince of Wales came by the name of David."

When They Were 26

The great Alexander had overthrown the Persian Empire. Washington led the advance guard of the British army toward Fort Duquesne. Napoleon was second in command to Barras. Franklin started "Poor Richard's Almanac." Fox had been First Lord in both the Admiralty and the Treasury. Gladstone was a junior Lord of the Treasury. Byron was writing "Childe Harold." Macaulay had published his essay on Milton. Delane was editor of the London Times. Emmet was in a grave without an epitaph.

Minard's Liniment for sick animals.

Making Winter Popular

A few years ago Canadians were inclined to be apologetic concerning their Winter climate and to resent public mention of its seasonal peculiarities—as Kipling learned when he wrote about "Our Lady of the Snows." Now it is all different. We have learned to capitalize our Winters and the publicity agencies tell the world in words and pictures about the beauties of the ski trails and the invigorating and beneficent influences of zero temperatures.

This is more than merely making the best of an inevitable situation. Canadians themselves have been sold on their own Winters and out of the fulness of personal experience they recommend them to those of softer climates. Ottawa, for instance, takes to its skis with the first snowfall, and on afternoons and week-ends the wooded hills and open spaces in the vicinity are dotted with thousands of the young and middle aged venturing their skill on the precarious runners against the forces of gravity and the perils of hidden stumps. Summer to them is but an inconvenient interval between skiing seasons.

Canada and the Empire

Toronto Globe (Lib.): The "new status" question is entitled to a rest. Canada has done well in the last sixty years, as waa made plain during Diamond Jubilee year. Her progress has been remarkable, whatever has been her status, and to continue this progress along broad lines and on a solid foundation should be the chief objective of Parliament. If it is the desire to help the Empire by making this country a strong component part, with the Imperial ties becoming firmer each year—as they should—attention ought to be directed to that end instead of o the texture of he bonds. Canada is of he Empire in fact and in sympathies.

The Falls of Niagara are reported to be wearing out. There will of course be somebody to charge that they were not built right in the first place.

De Valera wants to start a newspaper. The Irish always were gluttons for punishment. — New York Evening Post.

ASTHMA Successfully Relieved

Use Dr. Guild's Green Mountain Asthma Compound. Originated by Dr. J. H. Guild, specialist in respiratory affections. Quickly relieves the distressing torments that cause suffering and loss of sleep. The whole world knows Aspirin as an effective antidote for pain. *But it's just as important to know that there is only one genuine Aspirin.* The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

The happy merchant

Never before in the history of the world has it been possible for a merchant in good credit to do so much business with so little capital locked up in stock.

One important reason for the present prosperity is, that instead of having to buy a big stock at the beginning of each season, he is now able to buy small stocks and replenish them promptly by Long Distance.

Keep your customers for miles areund coming to you for whatever they need. Invent ways of inducing them to visit your store, or to order from you by Long Distance and — they tell us —you will not be seriously bothered by competition.

Long Distance is making happy merchants in some towns. Don't overlook its great possibilities.

THE BELL TELEPHONE COMPANY OF CANADA

PRESENTATION AND ADDRESS

Continued from page one

But surprises seemed to be the order of the evening for following closely as possible upon the first presentation, the people of the church took this occasion to present to Mrs. F. E. Geary for her services as organist, an address of appreciation for the service she had rendered throughout the years, presenting her as well with a beautiful oak writing desk. The following is the address.

Crookston, Feb. 27. 1928.

Dear Mrs. Geary:—

As members of the Bethesda Church we would at this time like to express our appreciation of your services as organist for a number of years. In fact you have ever been on hand, always willing and ready for every kind of work that would lead to the welfare of this church and our community.

We have realized the value of one that is so earnest and commendable. We know that your labours in this connection with our church will continue and we trust that you will consider this little token as our way of showing how we appreciate the services you have rendered as co-worker of our church.

The prayer of your fellow workers is that you may be spared many years in your Master's service.

Signed on behalf of the members of Bethesda Church. C. E. Cavanaugh, C. Tummon.

That this was a real surprise was very evident as Mrs.Geary was only able to reply briefly, thanking the congregation, saying that any service she had rendered was gladly given as the work of the Master was near to her heart.

In the absence of the Pastor, Rev. J. N. Laclace, the Superintendent of the Sunday School, and choir leader, along with others, spoke briefly, all bearing testimony to the excellent and exceptional service Mrs. Geary, through the years, had contributed to the life of Bethesda Church.

After refreshments were served the gathering broke up by singing, "Blest be the tie that binds," closing with National Anthem.

Belleville papers please copy.

The Red Cross Hospital, Bancroft, is filled to the doors.

Y. P. S. OF TRINITY CHURCH

The Tuesday evening meeting of the Young People's Society of Trinity Church was conducted by the Christian Fellowship department. In the absence of the president, Mr. Rivers presided, and led in prayer, which was followed by the Lord's prayer in unison. The Scripture lesson was read by Mrs. C. Henderson.

A vocal solo by Mrs. C. Whytock and a reading by Mrs. L. Ashley were much enjoyed. The topic was taken by Mrs. F. Dafoe, who chose "Youth" for her theme, pointing out its great possibilities for good. Her paper was well prepared and very helpful. "He has achieved success," she quoted, "who leaves the world better than he found it."

A pleasing duet by Miss Kerr and Mrs. L. Ashley, and a reading by Miss Roushorn brought the program to a close.

Mr. Rivers then called on Miss Kerr and Miss Aylesworth for a few words. Both were workers in the League some years ago, and expressed their happiness at being present once more, also speaking words of encouragement to the present workers.

BELLEVILLE MARKET

SATURDAY

The market today was noticeably larger with more products for sale and more vendors.

Hogs sold at $4.50 to $5.00 a head, wood $8.00 a load, and potatoes $1.00 a crate. Apples sold at 25c and 30c a peck and 75c a bushel.

Beef was 14c a lb. and pork 15c the half. In the vegetable line beets were going at 40c a peck, cabbage 5c and 10c a head, parsnips 40c a peck, turnips 30c a peck and carrots 40c a peck. Onions sold at 60c a peck with the larger and better variety 80c. This is a new precedent.

Fruit was practically priced the same as last week, lemons going at 30c the dozen, oranges 30c, 40c and 50c the dozen and grapefruit 10c each. Lettuce sold at 15c and 20c a head and celery 15c and 20c.

Eggs were slightly cheaper at 37c a dozen, butter 45c lb. roll and chickens $1.25 each.

Honey (dark) could be bought for 45c a small pail and 80c the larger.

OBITUARY

ROBERT HARVEY YOUNG

At six-thirty on Friday, Feb. 24, another aged resident passed away in the person of Robert Harvey Young, death claiming him in the 77th year of his age. Deceased had been in failing health for the past three years. He was of a quiet retiring disposition, following the occupation of farmer and mason in past years. He was a resident of Marmora for 11 years having lived previously at Cavan and Cooper. He was thrice married, his widow being Sarah, daughter of Mrs. John Gray, Sr.

Nine children of the first marriage are left to mourn his loss. They are: William, of Cooper, Fred of Campbellford, Walter, of Port Colborne, Mrs. Edward Martin, of L'Amable, Mrs. Will Bowen and Mrs. Sam Bowen, of Stirling, Mrs. Herbert Bowen, of Campbellford, Mrs. Arthur Smith, of North Bay, and Mrs. Charles Woods, of Frankford. He is also survived by two sisters, Mrs. John Moore, of Queensboro, and Mrs. Charles McCaw, of Niagara Falls, Ont.

Deceased was a member of the United Church and a Conservative in politics. The funeral took place on Sunday leaving his late residence at 10 a.m. for Hazzard's Corners United Church where the obsequies were conducted by Rev. J. N. Whyte, of Eldorado.— Marmora Herald.

HERE AND THERE

Last week the Steel Trough and Machine Co., Tweed, shipped a carload of their products, bath-tubs etc., to Vancouver, via C. N. R. to Halifax and Canadian Merchant Marines the Panama Canal and thence to the Canadian coast.

Dr. Embury, M.P. for Hastings-Peterboro, and E. A. Peck, M.P. for Peterboro, have been appointed members of the Miscellaneous Private Bills and Printing Committees of the House.

...EN OF ...OVE AND THEIR WORK

Continued from page 1

her grandmother, which no doubt gave her her sympathetic understanding of Anne's little problems in a home with only elderly people. Her home was on a farm near Cavendish on the north shore of Prince Edward Island. It is not surprising that she loves the sea. Yet with all fondness for the outdoors we gather that little Maude must have been a dark and eerie child, wandering off by herself to commune with imaginary people or revelling in whatever books were available and already creating her own little stories. When she grew up, Miss Montgomery taught school for three years. She was already writing stories and this was probably when she did her hardest work, getting up at five o'clock in the morning and writing till seven, "and on winter mornings before the fire had warmed the farm house through, it was some chore," she admits. Later she spent one winter at newspaper work in Halifax but at the death of her grandfather she went home to be with her grandmother. Perhaps this was a fortunate thing as it led her to give all her time to story writing. "The first story I was ever paid for," she says, "was published in 'Golden Days' a Philadelphia magazine which has since gone under. I don't know whether my stories killed it or not. They gave me five dollars and I have never been so rich in my life. It was while I was making my living writing short stories that I sneaked in time to do "Anne of Green Gables", just to please myself. Five times I sent it out and five times it was returned, I put it away and left it for awhile. One day at house-cleaning time I brought it out again and looked it over, as girl's stuff, I thought, that's not too bad and I tried again. I had an alphabetical list of publishers, had tried everything that seemed possible down to the P's so I sent it to Page and it was accepted." About the time Miss Montgomery wrote Anne of Avonlea she was married to Rev. MacDonald and came to the manse at Leaskdale. Mr. Mac Donald had formerly been the minister in her home church at Cavendish. Since coming to Ontario, she has written, The Golden Road Anne of the Island, Annes' House of Dreams, Rainbow Valley.

The author of Anne does not devote herself entirely to the making of books. She is a woman of personal charm and winsomeness, as broadminded and practical as she is imaginative, with a keen sense of humour, happy in the keeping of her home and the interest of the parish. She is a mother who mothers her children personally, they have always been considered before her books. When she has efficient help in the house she locks herself in her room and writes for two hours every morning, at other times she does her own housekeeping with the skill and despatch of a woman trained to it. She even takes her knitting with her on her pastoral visits. It was soldiers' socks in war time, and other fancy work since that time. She is just about what you would expect the author of Anne to be. She has written some beautiful poems, When the Dark Comes Down, Sunrise Along Shore, Oh We Will Walk With Spring To-day, and others.

Nellie McClung, a novelist and politician, wrote, Sowing Seeds in Danny, The Second Chance, Times Like These, Black Creek Stopping House, Purple Springs, Painted Fires, All We Like Sheep.

Mrs. Everard Cotes (Sarah Jeanette Duncan), a novelist, wrote Delightful Americans, Social Departure, Path of the Star, The Imperialist, On the Other Side of the Latch, An American Girl in London, The Pool in the Desert.

Agnes Laut was a distinguished historian and novelist. She has written, Story of the Trapper, Heralds of the Empire, Pathfinders of the West, Lords of the North.

Maza De La Roche wrote Delight, Jalne.

Marshall Saunders author of Beautiful Joe, was born in the Annapolis Valley, Queens' County Nova Scotia. Her father was pastor of a large country church. When she was seven years old they moved to Halifax. At the age of fifteen she was sent to a boarding school that she so well described in Esther de Warren. After a year in Scotland she was sent to the old city of Joan of Arc. A year in a French pension was followed by a visit to Scotland and England, then she returned home and taught school for a few years. She at this time wrote many articles and stories, for by the advice of her father's friend Chancellor Theodore Rand, of MacMaster University, she chose an author's life. Her first book was not Beautiful Joe but a novel called My Spanish Sailor, which was favourably reviewed by the Edinburgh Scotsman and had a fairly good circulation in the old country. However she decided that her forte was not the writing of love stories and after a visit to Meaford, Ontario, where she met the wonderful old dog called Beautiful Joe, she took him for a hero, and with him celebrated the virtues of some Nova Scotia animals. So Joe was sent begging among publishers, finally finding a hearty welcome from the Baptist Publication Society of Philadelphia, since when she has had the honour of leading the Old Ontario dog around the world on a chain of translations and she rejoices in the report that he has become quite a propagandist for humanitarianism. As the years went by she wrote one book after another, assuring her indulgent parents that it was absolutely necessary that she should be on the scene where her story was laid. Hence trips to Boston, New York, Southern States, Germany, Belgium, California, until now in her pleasant home in the almost model city of Toronto she says, "I let my fancy rove, but keep my body chez-moi."

Miss Saunders latest work is Esther de Warren, others, Alpatok, the story of the Eskimo dog, Beautiful Joe's Paradise, Bonnie Prince Fetlar, Doran, For His Country, King of the Park, Nita, the story of an Irish Setter, Pussy Black Face, Story of the Gravelys, Tilda Jane, Tilda Jane's Orphans.

Isabel Eccleston Mackay, a poet and novelist, writing Fires of Driftwood, The Window Gazer, Up the Hills in Dover, Mist of the Morning.

Marion Keith wrote Duncan Polite, The Gentleman Adventurer, Under the Grey Olives, Little Miss Melody, The Bells of St. Stephen.

A few of our present writers, Katherine Parr Traill, author of Lost in the Back Woods, Canadian Crusoes.

Pauline Johnson, of Indian birth, writing Legends of Vancouver.

Marta Ostendo, writing Wild Geese, Dark Dawn, The Mad Carews.

Miss Marjorie Pickthall, a poetess, but wrote a few novels. Some of her work are The Drift of Pinions, The Lamp of Poor Souls, Pere Lalemant, The Little Sister of the Prophet, St. Yoes Poor, A Mother in Egypt, The Bridge, The Carvers' Wife. Of the poets of this generation we count Miss Pickthall easily first. Her poems are of rare, fine quality. Her earliest poems appeared in Mail and Empire twenty years ago and then appeared from time to time in the most exclusive of the Magazines, University Magazine, Harpers, The Century, Atlantic Monthly, and others of that ilk. She was certainly the most individual poet of Canada. She died in 1922 at the age of thirty-nine years. The women poets of Canada alone fill a large volume, Helena Coleman, Verna Sheard, Jean Blewett, Laura McCully, Katherine Hale, (Mrs. John Garvin), who wrote Morning in the West, Norah Holland, Eloise Street.

Florence Randall Livesay, who is also a novelist as well as poetess, her latest book being Savour of Salt, was born in a lovely pastoral country of an Eastern Township of Quebec, the daughter of Stephen and Mary Randall, of Compton. She grew up in an atmosphere which was at every turn suggestive to one gifted with poetic talent. She was educated at Compton Ladies' College, a Church of England school for girls, now Kings' Hall. It was in a newspaper milieu that she met her future husband, J. F. B. Livesay, now general manager of the Canadian Press. Leaving Winnipeg for Toronto in 1920, Mr. and Mrs. Livesay have since made their home in that city. Mrs. Livesays' original work as a poet was revealed in Shepherds Purse, 1923.

Now I would consider the prominence attained by our sisters in other walks of life.

Dr. Margaret Patterson was made Toronto's first woman Magistrate Dec. 28, 1921. She was a pioneer in securing reforms in the courts of women, being responsible for the establishment of a womans' court, just previous to the outbreak of the war. She has spent the greater part of her life investigating, lecturing, and writing on girls' and womens' problems. During the epidemic of the flu in Toronto, she trained two thousand volunteer nurses, lecturing twice daily and assisted in combating the epidemic. Dr. Patterson was born in South Perth and graduated in medicine from the North Western University, Chicago, later taking a post graduate course in Europe. She went to India, where she became superintendent of the Allahabad Hos-

OBITUARY

LUELLA STAPLEY

Relatives and friends far and near were shocked Feb. 26th to hear that death had visited the home of Mr. and Mrs. Russell Stapley and taken their oldest daughter, Luella, a little girl between eleven and twelve years of age. Much sympathy is extended to the bereaved father and mother in their sorrow. The family have been shut in most of the time since November and the father is in bed at present with two nurses in attendance making it an unusually sad case. The funeral was held on Tuesday afternoon at the home and many friends and relatives from a distance attended from Madoc, Corbyville, Picton, Stirling and Sidney. The pastor, Rev. Mr. Truscott, delivered a very comforting message, taking for Scripture lesson the story of the young daughter of Jarius being raised to life. There was also a note of warning to the living to not forget that God often has to call a halt when we get so interested in other things that we forget to be guided by Him in all things great or small. An appropriate selection "Sometime We'll Understand," was rendered by Mrs. Andrews and Mrs. Clarence Fitchett. The floral tributes were most beautiful and filled the little room where the casket was also covered. We have not a complete list, but among them were a wreath from the public school Luella attended; another from the grandparents, Mr. and Mrs. J. Bronson, who are both heartbroken; with pillows and sprays and baskets from the uncles and aunts among whom were Mr. and Mrs. Leslie Dodds, of Viking, Alberta, who left home a few weeks ago for a holiday and have spent it caring for the sick.

"SALADA" TEA

ORANGE PEKOE BLEND

859

"Pekoe" comes from the Chinese word "Pak-ho", meaning silver hair, which was applied to the tip leaves on the Chinese tea bush. Tip leaves are wiry in shape. In India they were more orange in colour, so were called "Orange Pekoe" (Pak-ho).

Fashion

1711

ATTRACTIVE NEW FROCK.

This charmingly simple frock is suitable for many occasions and is a style the home modiste will find quite simple to fashion. The two-piece skirt is shirred to the bodice, and contrasting material is used for the shaped collar, applied band at the centre-front opening and the wristbands that tie in bows on the long gathered sleeves. No. 1711 is for Ladies and Misses, and is in sizes 16 years, 36, 38, 40 and 42 inches bust. Size 38 requires 3⅛ yards 36-inch, or 2⅞ yards 54-inch figured material, and ½ yard 36-inch contrasting. Price 20c the pattern.

Our Fashion Book, illustrating the newest and most practical style, will be of interest to every home dressmaker. Price of the book 10c the copy.

HOW TO ORDER PATTERNS.

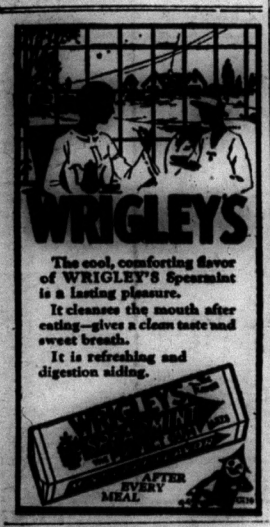
Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

Minard's Liniment relieves pain.

Uncle Sam has earned the credit of introducing two kinds of diplomacy: shirt-sleeve and airplane.

"At bridge, a great deal depends on the player," says an expert. Yes, and the player depends on a great deal!

Flick—"It seems that the most successful marriages are those between people who are unalike." Flock—"Yes, that is why I insist on marrying a girl with money."



The cool, comforting flavor of WRIGLEY'S Spearmint is a lasting pleasure.

It cleanses the mouth after eating—gives a clean taste and sweet breath.

It is refreshing and digestion aiding.

Use Replaces Looks

The Lance as a War Weapon Now Meets Its Second Doom

FOR SHOW ONLY

The lance is doomed. England, its stronghold during the centuries of its prime, before its importance in battle was ever questioned and again during the years of its revived popularity, now uses it only for tradition's sake in ceremonies and parades.

Thus passes from the practice field a weapon almost as ancient as fighters themselves. When the crack of gunpowder was first heard on the field of battle its prestige was blasted. Before the arquebus it rapidly declined in importance, and by the end of the sixteenth century it had been almost entirely laid aside in Europe.

There remained for it only a few prominent partisans. At the battle of Ivry, in 1590, "Egmont's Flemish spears," as Macaulay named them, fought for the Catholic League under the Duke of Mavenna, and it was said that Henry IV. feared those thousand more than double the number of any of the league cavalry. Some of the Scotch cavalry in Cromwell's army bore lances, too, at the battle of Marston Moor, and the Spaniards also showed themselves loath to give them up.

After the beginning of the seventeenth century, however, the lance was little seen or heard of in Western Europe until Napoleon brought it back. The Turks, however, kept it in use in Eastern Europe. They themselves had abandoned it, but their enemies found it the most effective weapon against the scimitars in the hands of their swift and skilful horsemen; and so the Poles, the Croats and the Cossacks refused to give it up. Marshal Saxe, experienced in warring with the Turk, attempted to revive the lance in France by putting it into the hands of one regiment of dragoons, but after his death it disappeared again. Frederick the Great hired a regiment of Wallachian lancers, but he took away their lances and armed them as huzzars instead. When Poland was divided, however, her troops, absorbed into the armies of her masters, were allowed to keep their national dress and weapons; and so Uhlans, the Polish word for lancers, appeared in the cavalry of Russia, Prussia and Austria.

Napoleon's Polish Lancers of the Guard, formed after he constituted the Grand Duchy of Warsaw, became so famous that later he formed six more lancer regiments, uniforming them in green and crimson with leather helmets crowned with comb and crest of fur. In Spain and against the Russian Cossacks they greatly increased the reputation of the weapon they bore. Polish lancers acted as Napoleon's bodyguard at Elba and returned with him, carrying their saddles until they could find horses. They did such damage during the Peninsular campaign and at Waterloo that after the victory the British also reintroduced lancers into their army.

The lance continued in British favor through the nineteenth century, especially for the Anglo-Indian army. Opinion was set against it at Sadowa and Sedan by the breech-loader, and the French and Austrian armies gave it up soon afterward. Russia followed their lead, leaving lances only to the Cossacks and the Imperial Guard. It was found that a regiment had need of carbines as well as lances, but the combination left them overarmed. The British plan of using lances as a front rank weapon, with carbines for the men in the rear, won the favor of Emperor William II. of Germany; and France, too, employed the lance in this way to a limited extent, though she had condemned it as useless twenty years before.

In the Boer War the lance proved useless before an enemy that would not fight at close quarters; and so the weapon fell into disrepute in England in the early part of the twentieth century. The War Office then declared for its abandonment. But army men still held it the "queen of cold steel weapons" and pleaded for its place until the World War finally put it on the antiquated list.

Minard's Liniment for asthma.

1928 Auto Models Built for Women

Upholstery Luxurious and Instruments Placed So as Not to Require "Reach"

Inspection of the various models of automobiles now will show that most manufacturers are continuing their policy of adapting motor cars to women drivers.

As one goes from showroom to showroom, one will find in the models for 1928 refinements which will appeal to the exacting feminine driver are numerous.

Special care has been given to the upholstering of the interior and materials are the finest of mohairs, broadcloths and leathers. Cushions are soft and comfortable, set at just the right angle so that women can ride all day in perfect comfort.

In the various driving compartments, refinements are everywhere in evidence. Many models have the new and thinner steering wheel, which fits diminutive hands as comfortably as those of men. Centralization of light controls on top of the steering post, and arrangements for the adjustment of the post itself to suit the individual driver, also are found in many models.

Still another refinement is the grouping of instruments on the dash so that a single glance tells the story of gasoline and oil supply, engine heat, speed, mileage and rate of charge.

NURSES WANTED

The Toronto Hospital for Incurables, in affiliation with Bellevue and Allied Hospitals, New York City, offers a three years' Course of Training to young women, having the required education, and desirous of becoming nurses. This Hospital has adopted the eight-hour system. The pupils receive uniforms of the School, a monthly allowance and traveling expenses to and from New York. For further information write the Superintendent.

One will find accelerators of the large treadle type, rubber covered so as not to mar milady's shoes and set at just the right angle so as not to tire the ankle. Clutch and brake pedals also are rubber covered.

Gear shift levers are long and easily reached, and parking brakes are operated in some models by a long lever with spoon latch that is also within easy reach. In fact there is no operation incidental to the control of most of the 1928 models requiring a "reach," a point which women appreciate.

"Your uncle seems rather hard of hearing?" 'Hard of hearing! Why, once he conducted family prayers kneeling on the cat!"

'Hundreds of Queens Workers Rally to Connolly's Support."—Headline. Possibly to the tune of "Fifty thousand henchmen can't be wrong."

Mussolini has agreed to write the story of his life, and it will probably be called "Me."

SUN LIFE SETS NEW RECORD

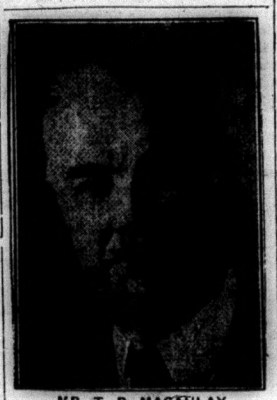
Canadian Company With World Wide Organization a Great Credit to This Country. Increase in New Business For Year Greatest on Continent.

The extraordinary expansion of the Sun Life Assurance Company of Canada during the last few years has caused its annual report to be awaited with unusual interest, not only by the policyholders of the Company, but by a large section of the general public.

The annual report which the President has just submitted, and which appears in this issue, must have surpassed the expectations of the most sanguine. The total amount of assurances in force with the Company now approaches the billion and a half figure, $1,487,000,000, an increase for the year of over $231,500,000. The total net income for the year exceeded $100,000,000—five times what it was ten years ago and more than $23,000,000 in excess of the income for the previous year.

Such statistics as are available for 1927 indicate that the aggregate new business of all the companies operating in North America last year barely exceeds the total new business of the previous year. The increase in the new business of the Sun Life of Canada, on the other hand, was twenty-three per cent. Assurances in force on the books of the Company have doubled in four years—new business has trebled in that period.

This wonderful expansion has been paralleled by a great increase in the



MR. T. B. MACAULAY
President
Sun Life of Canada

already proverbial strength and resources of the Company. The assets have been increased by over $56,000,000, and now reach the impressive total of over $400,000,000. The Company's assets approximate the amount of the total assurances in force only eight years ago.

The wisdom of the Company's investment policy is reflected in the fact that it has no arrears in interest or dividend on either its bonds or preferred stocks, while the dividends accruing in its common stocks are greatly in excess of those payable on those stocks at the time of their purchase. The care and foresight exercised in this branch of the business is indicated by an appraisal of company securities, the market value of which has increased by over $19,000,000 during this year.

The surplus earned during the year amounted to over $38,500,000. The Company has followed its conservative policy with respect to this surplus and deducted $5,000,000 from the market value of its securities as a further provision against possible future fluctuations, the total amount set aside for this purpose now standing at $10,000,000. The account to provide for unforeseen contingencies has been increased by $1,500,000 and now amounts to $12,500,000. The sum of $1,000,000 has been written off the Company's properties; an additional $500,000 has been set aside in anticipation of the greater longevity of annuities—the total provision under this head now being $2,000,000. Another $50,000 has been set aside to provide for claims with respect to total disability cases as yet unreported. $11,000,000 has been paid or alloted as profits to policyholders during the year, and over $6,000,000 has been contingently allotted to deferred dividend policies issued prior to 1911 and to five-year distribution policies to provide for profits accrued but not yet payable.

After making these liberal deduction and allocations, over $11,000,000 has been added to the undivided surplus, which now stands at more than $45,000,000.

There is good news again for the participating policyholders of the Company in the announcement that the scale of dividends to be paid to policyholders during the year commencing April 1st next will be again increased—this for the eighth successive year. The interest rate on dividends left with the Company will be maintained at 5½ per cent. per annum during the new dividend year.

There were paid to policyholders and beneficiaries, in respect to death claims, matured endowments, etc., during the year over $42,000,000. The Company has paid out since its organization, under this head, over $300,000,000.

It is indicative of the efficiency and morale of the world-wide organization of the Sun Life that the increases in its income are from every department of its business and from every territorial division, namely, Canada; United States; South America and West Indies; Great Britain, South Africa and the Near East; China, Japan, India and the Far East. Such a showing is not alone a tribute to President Macaulay, but a striking proof of the high quality of the personnel of his organization.

The Head Office building in Montreal is to be increased to mammoth proportions, the first unit of the new building being now under construction. This building is designed, when completed, to accommodate 10,000 employees. Almost equally interesting is the action of the Company this year in purchasing one of the most central sites in London, just off Trafalgar Square and adjoining Canada House. Here is being erected what will be undoubtedly one of the finest office buildings in the world's metropolis and from which the business of the British Isles will be administered.

The strength and solidity of our large insurance companys, banks, etc., is a source of great pride to all Canadians, and it is in the best interests of the country that these institutions remain Canadian in ownership and not pass to foreign control, as have many of our large business enterprises.

Speakers Br... In Many Languages

European Station Announcer Must Use From 2 to 5 Tongues Because of Size of Countries

Paris—Most announcers in Europe must be linguists, for many stations, especially those of small countries, send their programs beyond the borders of their own countries.

The station of Barcelona announces in Spanish, Catalan, English, French, Italian and German, Hilversum, in Holland, and Zagreb, in Jugoslavia, announce in five languages. The Holland station uses Dutch, French, German, English and Spanish, and the Serbian station, Serbian, Slovene, German, Italian and Greek.

The Turkish station, at Stamboul, makes announcements in Turkish, French, English and German. Five other European stations transmit in three languages; eight in two languages. Dublin transmits in Irish and English.

"Why Worry."—For Politicians

Starting as a plain citizen, you have two alternatives:

Either you are interested in public affairs or you are not.

If you are not, you have nothing to worry about.

If you are interested, you have two alternatives:

Either you engage actively or you do not.

If you do not, you have nothing to worry about.

If you do engage actively, you have two alternatives:

Either your work is recognized by your party and you are given more work to do or you are not.

If you are recognized, you are taken into the inner circle or you are not.

If you are not in the inner circle, you have nothing to worry about.

If you are in the inner circle, you will finally be nominated for public office or you will not.

If you are not nominated, you have nothing to worry about.

If you are nominated, you have two alternatives:

Either you will be seated or you will not.

If you are not, you have nothing to worry about.

If you are elected, you have two alternatives:

Either you will be seated or you will not.

If you are seated, you have nothing to worry about.

If you are not seated, you will again be a plain citizen with nothing to worry about.

The man who blew hot to warm his hands and cold to cool his soup had nothing on the candidate who is personally dry and politically wet.—Boston Herald.

Mrs.—"I won't be long, dear. I'll be ready in a minute." Mr.—"Well, for goodness' sake do pick out a minute that's not more than half-an-hour away."

English Court Humor

The London courts perform their allotted function of tempering justice with humor:

Witness (asked to identify a prisoner)—I'm not certain. He seems to have washed his face since I last saw him.

Defendant in bigamy case—I am feeling rather queer to-day. I really ought not to be here at all.

Motorist summoned for exceeding speed limit—I was stamping my feet because they were cold, and I must have touched the accelerator!

Magistrate—If you don't go home to your wife I shall make an order against you.

Defendant—I'm already paying under an order.

Magistrate—Who made the order?

Defendant—The missus herself.

Sunday School Teacher—"Johnny, what can you tell me about Aaron?" Johnny—"His name was the first in the telephone book."

Was Fast Falling to Ruins

Scene of Tam O'Shanter's Adventure Saved for Posterity

London—It will be gratifying to admirers of Robert Burns to know that the famous "auld haunted kirk" at Alloway in Scotland has been reclaimed from its recently neglected state.

After an appeal for its better guardianship as made to King George V. by Capt. Edward Page Gaston, F. R. G. S., an Illinoisan of Scottish descent long resident in London, the British Government has taken over the property as an ancient monument to be under official protection in perpetuity as a memorial to Scotia's greatest poet and most widely beloved son.

"Being of Scottish ancestry and an admirer of 'the ploughman poet,' I have visited the Ayr district repeatedly during the last twenty-five years," said Gaston. "Some time ago I was astonished at observing the neglected state of the old church which was the scene of 'Tam O'Shanter,' the most popular of Burns's poems.

"By a recent general parliamentary act affecting old burying grounds, the care of Alloway Kirk had been taken from the Burns Trust, which had capably looked after it for many years, and its control had been vested in the local parish council, whose official duties consist largely in looking after the poor.

Almost Reduced to Pauperism

"Thus (as regards its means of support out of the limited poor fund) the world-famed church and churchyard were technically degraded to the level of parish paupers! As practically nothing was being done toward keeping it in repair a part of the seventeenth century structure was in danger of collapse at the time of my visit, and many loose stones were almost falling from the walls.

"The situation was so arresting that consultation was had with various representative people interested in preserving the Burns associations in their highest sense, these including a lineal decendant from the poet. It was agreed that an attempt should be made to deal with the existing anomalous state of affairs.

"The proposal which I accordingly ventured to lay before the King was that the structure be officially adopted as an ancient monument and hence be taken over and protected in perpetuity by the British Government. As a result of the discernment shown by the King and his advisers, another of Britain's priceless literary mementos has been thus preserved from further deterioration, for the benefit of posterity.

Looted By Relic Hunters

"This official action was taken none too soon, for local builders and relic hunters long ago made off with the timbers of the fallen roof, together with other removables, and each year was adding its toll of vandalism to the sum total. I suggested to King George that the church might be restored as a sacred shrine to which Burns devotees from any lands could repair, on occasion. Such restoration would need to be done by private persons, however, as the Office of Works has no funds at its disposal from which expenditure can be incurred on the preservation of Alloway Kirk; but it would of course, be pleased if an effort were made, say, by societies interested in Robert Burns to provide funds for preserving this monument.

"As the Burns cult increases continually, the hundreds of Burns clubs, and other Scottish societies, in America, Canada, Australasia and elsewhere, should readily supply ample funds for restoration and maintenance, if so desired.

"Fully 100,000 sightseers annually visit Alloway on the average, 79,000 persons having paid admission to the Burns monument there in one year, while other thousands make the free visit to

Alloway's auld haunted kirk . . .
Where ghaists and houlets nightly cry.

Burns's Desired Burial Place

Robert Burns wished to finally rest at Alloway by "the banks and braes o' bonnie Doon," instead of at Dumfries, where he lies. This was he plainly expressed in connection with the burial of his father in Alloway churchyard in 1784, when the poet had inscribed upon the still standing modest tombstone the tribute:

O y'e whose cheek the tear of pity stains
Draw near with pious rev'rence and attend!
Here lie the loving husband's dear remains,
The tender father and the gen'rous friend
The pitying heart that felt for human woe;
The dauntless heart that feared no human pride;
The friend of man, to vice alone a foe;
For 'ev'n his failings leaned to virtue's side.'

Burns's Religious Nature

"Aside from being a Burns enthusiast,' concluded Capt. Gaston, "this interest in Alloway Church arises from my Covenanter ancestry, who fled from Scottish religious persecution in those parts to the Irish Protestant planations of Ulster, whence my paternal grandfather emigrated from Ballymena to the backwoods of Ohio a century ago. In common with others, I hope that something practical may now be done in the way of paying the suggested additional tribute at Alloway Church to one whose nature was, in truth, a deeply religious one."

Guest—"Who is that awful-looking frump over there" Host—"Why, that's my wife." Guest—"Oh—er—beg pardon. My mistake." Host (sadly)—"No, mine!"

To be a success, a political issue must be like a bond issue: It must draw interest.

Returning tourists call the Cuban capital "What'llyouhavana."

Dividends to Policyholders increased for eighth successive year

EXTRACTS FROM DIRECTORS' REPORT

Substantial advances have been made in all departments during the year. . .

The total net income for the year exceeded one hundred million dollars . . .

The strength and resources of the Company have been further enhanced . . .

The high earning power of the Company's investments has been again demonstrated. The net rate of interest earned on the mean invested assets, after fully providing for investment expenses, was 6.47 per cent. This gratifying result has been made possible by dividend increases, bonuses and stock privileges accruing on many of the Company's holdings.

The wisdom of the investment policy which has been consistently followed in past years, in favouring long term bonds and the stocks of outstanding and very carefully selected corporations, has been once more emphasized. The appraisal of our securities shows that the excess of market values over cost increased during the year by $19,235,889.99. In addition, a net profit of $5,028,033.20 accrued from the redemption or sale of securities which had risen to high premiums.

The quality of the investments listed in the assets is testified by the fact that on both bonds and preferred stocks not one dollar, due either as interest or dividend, is in arrear for even one day, while the dividends accruing to common stocks are greatly in excess of the dividends payable on the same stocks at the time of purchase.

The surplus earned during the year amounted to $38,511,029.67 from which the following appropriations have been made:

$5,000,000 has been deducted from the market value of our securities as a further provision against possible future fluctuations, increasing the amount so set aside to $10,000,000.

$1,500,000 has been added to the account to provide for unforeseen contingencies, which now stands at $12,500,000.

$1,000,000 has been written off the Company's Head Office building and other properties.

$500,000 has been set aside to provide for the greater longevity of annuitants, bringing the total provision under this heading to $2,000,000.

$50,000 has been set aside to provide for claims in respect of total disability as yet unreported.

$11,090,056.61 has been paid or allotted as profits to policyholders during the year. In addition, $6,205,573.00 has been contingently allotted to deferred dividend policies issued prior to 1911, and to five year distribution policies, to provide for profits accrued but not yet payable.

After making these deductions and allocations, $11,269,330.89 has been added to the undivided surplus, bringing the total over all liabilities, contingency account and capital stock to $45,280,896.14.

Your Directors are gratified to announce, for the eighth successive year, a substantial increase in the scale of profits to be distributed to participating policyholders during the ensuing year.

SUN LIFE ASSURANCE COMPANY OF CANADA

Aerial Survey

45,000 Square Miles of Photographs Taken Last Year

Government camera men in our country photographed 45,850 square miles of territory last year from the air. Of this, 28,650 square miles was by oblique photography and 17,200 square miles by vertical photography. The oblique photographs numbered 16,246 and the vertical photographs 46,340.

The work was carried on in eight of the nine Provinces, according to a review of the Dominion Department of the Interior. Individual operations included such items as the extension of oblique photographs over an area of 15,200 square miles west of Lake Winnipeg for forestry purposes; an oblique photograph operation covering an area of 8,000 square miles over the Wood Buffalo Park, near Fort Smith, N.W.T., and a considerable number of vertical photographic operations of smaller areas in various parts of Canada.

"Since the inauguration of aerial photography in Canada six years ago by the Topographical Survey, Department of Interior, working in co-operation with the Royal Canadian Air Force, this art has repeatedly demonstrated its value in its application to mapping,' says the Interior Department. "This method fits in admirably with conditions that prevail in a new country of the extent of Canada, since by its use speed and economy are effected in mapping lands that by the ordinary methods of ground survey would involve a tremendous expenditure of time and effort.

"One of the interesting features in connection with the season's work was the covering by vertical photographs of the route of the New Welland Canal through the Niagara Peninsula. This was undertaken at the request of the Department of Railways and Canals for the purpose of showing the progress of the work in pictorial form. The advance made was readily seen by comparison with photographs of the same area which had been taken in 1921.

"Another interesting operation was the photographing, both vertical and oblique, of Niagara Falls, at the request of the Dominion Water Power and Reclamation Service, for the purpose of studying various features relating to the effect of ice conditions, the recession of the brink, etc.

"The value of the aerial photographs taken on this work does not cease with their use in the actual mapping operations. The information upon them is of importance in all problems relating to development and in a study of such problems generally obviates the necessity of much personal investigation over the territory in question. The Topographical Survey has been made a central bureau for the collecting and indexing of all aerial photographs. Here the ever increasing number of these photographs are first converted into maps and are then kept on file for reference and record purposes."

Capped the Lot.

Three artists were telling tall stories of their work.

'The other day,' said one, "I painted a deal board in imitation marble with such effect that it sank immediately when thrown into the water."

"That's nothing," said another. "Yesterday I hung a thermometer on the easel suporting my picture of the Polar regions and it fell at once to twenty degrees below zero."

"Go on,' remarked the third. "My portrait of a millionaire was so realistic that it had to be shaved every morning."

HAZZARD'S CORNERS

A very successful meeting was held by the W. M. S. at the home of Mrs. R. N. Broad, on Thursday afternoon, twelve members being present. At the conclusion of the general business the president, Mrs. Tumelty, conducted a questionaire on the annual report, after which a synopsis of a chapter of the study book was read by Miss Marion Love, Mrs. Philo Harris and Mrs. Stanley Hayton. The meeting closed with a Hymn and the Lords' Prayer was repeated in unison.

Lunch was then served and before leaving the hostess was tendered a very hearty vote of thanks by the ladies.

Mr. Parker was absent last Sunday having been called to Detroit to attend the funeral of his brother. During his absence the pulpit was occupied by Mr. Arkinsall and Mr. Byres, students of Queen's Univeraity.

Miss Jennie Harris, of Tweed, spent the week-end with her parents, Mr. and Mrs. Geo. Harris.

Mr. and Mrs. Fred Davis, of Melrose have been visiting their daughter, Mrs. J. Burnside.

Miss Mutton spent the week-end with Miss Vera McGhee, at Madoc.

Miss E. Reid, Mr. Leeland Richardson and Master Mac Richardson of Marmora, spent the week-end with Mr. and Mrs. R. N. Broad.

Mr. J. Love has sold his farm to to Mr. Harry Love and is holding a sale of farm stock and implements this week. We welcome our new neighbours, but we are sorry to lose Mr. and Mrs. Love and Miss Love from the community.

Mr. and Mrs. Joe Hayton spent Thursday evening at the home of Mr. and Mrs. J. S. Hayton.

Miss Kate Keene spent last week with Mr. and Mrs. Wm. Keene.

COOPER

The W. M. S. met March 1st at the home of Mrs. Arthur Parks with Mrs. H. Rollins, Jr. in the chair, opened meeting with Hymn (A better day is coming). Prayer by Mrs. G. Holmes, Lord's Prayer in concert. Scripture lesson, 8th psalm, was read by Mrs. W. J. Rollins. Hymn, "The whole world was lost in darkness of sin." Roll call was responded to with verse from the Bible containing the word Honor. Minutes were read by Mrs. A. Parks. Mrs. Frank Reynolds gave a very interesting and helpful report of the Presbyterial held in Jan. Reading by Mrs. H. Rollins Sr., Mrs. Ellwood's holiday and how it became a Holy day. Solo by Miss Vera Canniff, reading by Mrs. Oscar Taylor. Attendance 22 and collection $2.00, closing hymn, Jesus Saves, followed by short prayer by Mrs. H. Rollins, Jr.

A social half hour was spent and lunch was served by Mrs. A. Parks assisted by her sister, Mrs. E. Rieu. There were also enough blocks brought in to complete another quilt.

We were sorry to hear Miss Dora Young has had a serious attack of appendicitis but is getting along nicely again, also Reggie Trotter is on the sick list.

Dr. Dafoe was called up to see Mrs. Robt. Rollins, who is on the sick list, on Sunday last.

Quite a number from here took advantage of the excursions last week to see the hockey matches between Stirling, Tweed and Campbellford. All present report a good time but a bit too crowded for comfort.

The Hydro have a double gang on trying to complete the work through the swamps before spring.

Mr. and Mrs. Hark Rollins, Jr. spent Sunday noon hour at Mr. Fred Rollins, Queensboro.

Mr. Hark Rollins, Sr., was kicked in the stomach but we are pleased to learn he is not seriously hurt.

Mr. Gibson Bailey was home for the week-end.

The farmers had some work after the big blow on Sunday to find the roads. Our mail man couldn't get through. We are having real winter weather.

CROOKSTON

About twenty five of Crookston's hockey fans took advantage of the special train to Stirling last week and are again planning to go this week. Some attended the Stirling—Tweed match on Friday evening, in Stirling.

Miss Victoria Vincent spent Saturday in Belleville.

Mr. S. O. Patterson has returned to Niagara Falls, Ont.

Mr. and Mrs. H. Ashley, of West Huntingdon spent Thursday evening with Mr. and Mrs. Clayton Tummon.

Mr. Vincent Baker spent a few days last week in Oshawa.

Mr. and Mrs. C. E. Cavanaugh spent Wed. eve. last, with Mr. and Mrs. C. Tummon, prior to leaving for Caledon, where Mr. Cavanaugh will take up his new duties.

Miss Elizabeth Wickens, of New York City, is holidaying with relatives here.

Mr. and Mrs. John Cassibo have returned to Crookston to live.

QUEENSBORO

Queensboro to the last man turned out to the three hockey matches at Tweed and Stirling last week and all seemed to feel well repaid with their effort. The special train put on by the C. N. R. Co. for the occasion was not long enough for the accommodation of the crowd.

Miss Minnie Green, Peterboro, spent the week-end at home.

Mr. Stephen Cox spent a couple of days in Bancroft visiting his brother, Mr. J. Cox, who is very ill in the hospital there.

Mr. James Delyea spent a few days in Tweed last week.

Francis Thompson, Tweed high school, spent the week-end at home.

Miss A. Howe spent the week-end in Bannockburn.

Toronto, Mar. 3.—Mrs. W. Cope of this city, has recovered the use of her voice after being speechless for two years due to a local nervous condition in the throat and larynx. Dr. Ferrier, who attended Mrs. Cope, says that the form of treatment used was more educational than anything else, the patient's self-confidence being gradually restored.

DETLOR

The I. B. O. train has been making regular freight trips to Bessemer up to Feb. 18th, when it was with difficulty owing to storm they were able to make a through trip. However, the work staff were put on, and road cleaned out, and on Tuesday, 21st, brought out a goodly number of loaded cars of different classes of timber, of different timber merchants, 22 cars having been left loaded for shipment when on the trip of Feb. 18. No more trips since and we understand, no more until middle of April.

Master Ross Foster, who has been working at Corbyville for some time past, had the misfortune to sustain a double fracture of one of his limbs and returned to his home on Feb. 20th, after spending several weeks at Belleville Medical Aid Hall.

Mr. Fred Kingyens in spite of bad weather makes the usual trips in drawing timber for F. Conlin from woods to mill yard, at Detlor vicinity.

We learn that the fall of heavy snow caused the flat roof of Mr. George Turncliffe's mill to fall in. The same thing happened to a verandah at Bancroft, belonging to Mr. Alex McGibbon.

Miss Amy Bentley, lately returned from Belleville, is engaged as clerk and housekeeper for Mr. T. C. Turriff.

Another of the quite popular young women, in the person of Miss Gertie Hennessy, eldest daughter of Mr. and Mrs. Ernest Hennessy, was united in marriage to Mr. Roy Kingyens, on Wednesday of last week. The ceremony was performed by Rev. Stocker, of Bancroft, at the home of the bride's parents and a reception held at The Cliff House, the home of the groom's parents. The couple left on the train on Thursday a.m., for Belleville, where the groom has been engaged for sometime.

The Farmers Co-operative Assoc held a Club meeting on Saturday night of last week. It would need some heated discussions in order to warm the atmosphere a little.

Mr. John Corneal has recovered from the injury to his knee to be able to get about again.

Mr. and Mrs. J. Price, of Bancroft, spent Saturday week past at the home of her sister, Mrs. G. A. Jordison.

Mr. and Mrs. Sydney Smith made a short visit at the home of the Misses B. and A. and Mr. P. A. Bradshaw last week.

Mr. Thoms, of Gilmour, spent the week-end of last week with his brother-in-law, Mr. Sydney Smith.

A faint rumor of mining interest revived is heard again. It may get louder or die outright.

One leap year baby was born in Belleville general hospital, on Feb. 29th, in the person of an infant son to Provincial Constable Price Morris and Mrs. Morris (nee Miss Annie Wickson), of Picton. This was the only Leap Year baby born in the city.

PRESENTATION AND ADDRESS

On Tuesday evening, March 13, a number of friends and neighbors of Mrs. Robert Bird and family, met at her home in Jarvis Settlement to spend an evening prior to their departure for their new home in West Huntingdon.

The following address was read by Miss Sarah Rook after which they were presented with a beautiful wicker parlor table.

Dear Mrs. Bird and family:—

It is with great regret that we have learned of your intention of leaving our community. We feel we cannot let you go without expressing in some form our feelings of friendship.

We are reluctant to see you go but we realize that our loss will be another's gain.

We are sure that the qualities which won friends for you here will win true friendships for you in your new home.

We wish you to carry away with you our sincere best wishes for a future of happiness, health and prosperity.

We would ask you to accept this gift as a small token of our friendship and good will, that you may use it, and that among your new friends it will remind you of old friends.

Signed on behalf of the community, Ernest Devolin, Bob Ault.

Mrs. Bird and Carl made suitable replies voicing their regret at leaving their friends and thanking them for their kindness.

Refreshments were served and the balance of the evening was spent in social intercourse, cards and dancing and all departed wishing Mrs. Bird and family much happiness and prosperity in their new home.

LAST GAME OF SEASON

To end the hockey season in Madoc, a hockey match was staged last Thursday evening between the M. S. School team and the Senior team. The school were the victors, the score being 8-1. The large crowd present was well handled by the rink manager, Mr. J. Hailstone, while the game was kept enlivened by some "Irish wit." McConnell and Lenahan were the most spectacular for the seniors, while Ruperi, who played inside home, staged a battle along the east boards, with his brother Alex. McConnell started a beautiful rush but the puck landed in his own net. In the last period Lenahan, the goalie, made a couple of nice rushes but was blocked by Wallbridge. Nicol handled the first period and last period, while N. Whytock ruled Don "off" in the second.

HONESTY EPIDEMIC IN NEW YORK

New York, March 1.—Thirteen-year-old Max Snyder, of Manhattan, the son of a painter out of work, found an old rusty can today while playing in High Bridge Park, which was found to contain $771 in small bills.

After considerable difficulty, the lad succeeded in opening the can, and was overwhelmed by the large number of one-dollar bills. He [illegible] that thought of Alexander Lub[illegible] the unemployed painter [illegible] few days ago found $52,000 [illegible] street and returned it to the [illegible], moved him to take the can [illegible] contents to the Wadsworth [illegible] Police Station.

[illegible]tenant Levy, who was on [illegible]uty at the time, commended [illegible]y for his honesty, and told [illegible]at if the can and its contents [illegible]t properly claimed by the [illegible] owner within six months, [illegible]perty would revert to him.

T WHILE FALLING TREE

[illegible] E. Trotter is suffering from [illegible]jury, which he received re[illegible]. Mr. Trotter was falling a [illegible] which hit him, smashing his [illegible]one.

WEDDING BELLS

DEAN—MARTIN

A quiet but pretty wedding was solemnized by Rev. J. M. Whyte at the parsonage of the United Church, of Eldorado, on the evening of February 25th, when Ruby Lydia, eldest daughter of Mr. and Mrs. George Martin, of Bancroft, was united in the bonds of holy matrimony to Adam Henry Dean, eldest son of Mr. Adam Dean and the late Mrs. Dean, of Madoc. The bride was dressed in a very becoming dress of navy French crepe trimmed with sand. Sand hose and black patent shoes completed the costume. Miss Hilda Dean, sister of the groom, was maid of honour and looked very charming in a gown of valencio silk trimmed with rhinestones and flowers and wore grey kid shoes and hose to match.

Tea was served to the happy couple and a few friends on their return from the parsonage. They will reside at Madoc. We all join in wishing the happy couple bon voyage through life.— Bancroft Times.

DALEY—FOBEAR

On Monday, February 20, 1928, a very pretty wedding of much interest took place at St. Michael's Church when Della Fobear, daughter of Mr. and Mrs. Fobear, of Madoc, was united in marriage to Mr. Frank Daley, son of Mr. and Mrs. James Daley, of Tyendinaga, Rev. Father Killeen officiating.

The bride looked charming in a dress of brown crepe with gold brocade trimming and carried a bunch of forget-me-nots and lillies of the valley. She was attended by her sister, Miss Helen Fobear, who looked very pretty in brown shot taffeta in Period style. The groom was supported by his brother, Mr. Thomas Daley.

After leaving the church the usual showers of confetti and rice were substituted by showers of barley. They then left for the home of the groom's aunt, Mrs. John Barrett, Colleege St., where a delicious wedding breakfast was served to the immediate friends of the contracting parties. They then left by motor for the bride's home at Madoc but on account of the heavy snowfall were obliged to take the the train from Stirling to Madoc, where they were met by Mr. Fobear with a team and sleigh decorated with white ribbons which took them to the bride's home where they were received with a hearty welcome and everyone took part in the wedding dinner which awaited them.

After spending a very enjoyable time at the bride's home, where much dancing and feasting was partaken of, they returned on Wednesday to Belleville, thence leaving for the groom's home where a very enjoyable time was spent.

The groom's gift to the bride was a subs antial cheque, to the bridesmaid a necklace of pearls, and to the groomsman gold cuff links. The many out-of-town guests that attended the wedding were M. Phillips, Miss Daley, Mr. O'Connell and Miss O'Connell, Miss Cronin, Mr. O'Connor.—Intelligencer.

VIMY BALL AT PICTON

On Easter Monday the officers of C. Company Hastings and Prince Edward Regiment are planning a Vimy Ball to be held in the Armories, Picton. It is a singular coincidence that Easter Monday this year falls on April 9th which is the tenth anniversary of the Vimy Ridge battle which Canadians overseas so well remember. Invitations are being widely distributed to former members of the C. E. F., and the dancing public at large, so that the Vimy Ball should be a largely attended affair.

C. Company officers have been fortunate in securing Harold Rich-Morris London Versatile Canadians of Toronto as an orchestra, for the dance. This orchestra is one of Canada's foremost dance organizations, and is well known to radio fans who hear its music broadcast over C. F. C. A. from the Palais Royale, Toronto, regularly.

COUNCIL MEETING

The following are the minutes of the meeting of Madoc Village Council held in Town Hall, Monday March 12th.

Present—Reeve E. C. Tufts and all members of the Council.

Minutes of the last meeting were read and adopted.

Communications were received from Mrs. J. Burns, G. M. Wallbridge and Library Board.

Moved by Counc. Wallbridge, seconded by Counc. Connor—that the Reeve and Counc. Connor be a committee to deal with communication from Library Board, with power to act.

Connor—Smith—that the following Electric Light accounts be paid —C'd.

H. E. P. Comm.	$358.65
Can. Line, materials	29.70
W. L. Smith, work	7.20

Wallbridge— Connor— that the following Fire Protection accounts be paid.—C'd.

Smith Bros., work, supplies	$20.41
Tanner Bros., draying	9.50
Walter Whytock, coal	42.80
John Burkitt	14.55

Smith— Wallbridge— that the following general accounts be paid. —C'd.

E. T. Nayler	$12.00
Tanner Bros.	3.00
A. S. Cochran	26.90
J. E. Hailstone	28.45
The Municipal World	4.70
John Burkitt	36.60
R. Weir	17.75
A. Brady	8.75
E. Sexsmith	7.50
D. Golan	9.00

Mr. G. C. Moon presented the Auditors' Report.

Wallbridge— Smith— that Auditors' Report be received and published, and auditors receive their salary, the printing of the report to be left to the Finance committee.—C'd.

Connor— Smith— that Treasurers of Village and Electric Lights be bonded at the minimum amount, the matter to be left in the hands of the chairman of Finance.—C'd.

Smith—Connor— that this council purchase a fire pump.

Moved in amendment by Counc. Bristol, seconded by Reeve E. C. Tufts, that this Council go on record to purchase a fire pump at some future date, after a thorough investigation of fire apparatus and insurance rates.

The Reeve declared the motion carried.

Wallbridge— Connor—that Council purchase a No. 4 Sawyer-Massey road grader.—C'd.

Counc. Smith gave notice of motion that he would introduce at next regular meeting of Council a by-law re taxation on new rink.

Wallbridge— Smith—that Madoc Bakery be allowed rebate on electric rates to conform with other similar rates.—C'd.

Smith— Wallbridge— that Council adjourn until next regular meeting.—C'd.

A.S. Cochran, Clerk.

FIRE BRIGADE OUT

During the storm last Friday afternoon, the fire brigade was called to the residence of Mr. P. Fitzgerald, where a chimney was burning out. No damage was done.

NEW COAL BUSINESS

Mr. W. R. Rierdon, who recently disposed of his drug store in Madoc to other interests and moved to the city, commenced work on the new coal sheds on South Front Street. A siding will be run from the Pinnacle St. track and Mr. Rierdon expects to lay in a supply when navigation opens next month. The new coal warehouse will be erected near the home of the late John C. Weir and will be modern in every respect. Mr. Rierdon has a unique war record and after returning from overseas conducted a drug store in Madoc.—Belleville Intelligencer.

Mr. Oliver Plane had the misfortune of having his hand cut while sawing wood with a circular saw.

W. C. T. U. Meeting

The W. C. T. U. of Madoc held their open meeting in the Sunday school rooms of Trinity United church on Wednesday evening, the regular prayer meetings in the church being withdrawn. A Francis Willard Memorial program was planned and the report of the delegate to the prohibition union convention held in Toronto last week was given.

Mrs. J. McCaffrey, president of the W. C. T. U., took charge and in a few brief words explained the object of the meeting and after the singing of "Onward, Christian Soldiers," called on Mrs. F. Dafoe for the Scripture lesson, for which Romans XII had been chosen, these having been used at the opening of the convention. A very earnest prayer for guidance and inspiration was offered by Miss Irwin, and then the readings and papers on the life and work of Miss Francis E. Willard as Organizer, Lover of Folks and Flowers, and as a Great Teacher were given by Mesdames A. Milne, G. Huffman, E. West and T. L. Nickle.

A vocal duet by Misses M. Ferguson and M. Rousehorn, "Dear Lord, be patient with me still," was sweetly rendered, and the most important item on the program was called for.

Mrs. G. W. Rivers, though suffering from a cold, gave a glowing account of the convention, and made her hearers feel that they were being included in the inspiration, cheer and activities of those great gatherings in Toronto.

She spoke of the splendid music given by "Ye Olde Time Village Quartette" and the excellent services of Mr. Chapman, the leader, as song leader throughout the convention, then went on to give some of the leading thoughts of the speeches of the many eminent speakers, carrying her audience along until all felt that they had indeed been given something of the uplift and spirit of those great gatherings.

Something of the business part was also given and all joined in the hearty vote of thanks tendered to Mrs. Rivers on motion of Mrs. Jenkins and Mrs. Milne. Thanks were also tendered to the board of Trinity church and all who assisted in presenting the program of the evening.

Miss M.Kerr, of Tweed, a visitor, but an old friend, was then called on for a solo, which she gravely explained was a trio, and she, with Mrs. C. N. Whytock, and Mrs. L. Ashley sang, "Jesus is all the world to me," with Miss A. Wood as accompanist, to the great enjoyment of all.

The Hymn, "Stand up, stand up for Jesus" was followed by prayer and benediction by Rev. G. W. Rivers, bringing a wonderful evening to a close.

ST. PETER'S CHURCH NOTES

On Thursday afternoon the March meeting of the Presbyterian W. M. S. was held at the home of Mrs. Walter Whytock. The nice day brought out a good attendance. After the devotional period, which was taken by Mrs. Pollard and Mrs. McCaffrey, the third chapter of the Study Book, "The Royal Road," was thoroughly explained by Mrs. Jenkins, and Mrs. G. Wright told the beautiful story of Lucy Baker, our first Western Missionary. The duet sung by Mrs. Ashley and Mrs. James Whytock was much appreciated. With the singing of a hymn the meeting was brought to a close.

EASTERN STAR HOLD DANCE AND EUCHRE

The members of the local Chapter of the Eastern Star entertained about one hundred of their friends to a social evening on Monday last in the Orange Hall.

Cards, refreshments and dancing was enjoyed by all present. Mrs. Ambrose Smith and Mr. George White were the successful prize winners.

Mr. and Mrs. G. Wallbridge are spending a few days in Toronto.

LOCAL AND PERSONAL

Miss Lela Cook, of Minto, is visiting friends in Madoc township.

Miss Helen Frances, of Stirling, is visiting relatives in town.

Mr. and Mrs. J. English spent the week-end in town with friends.

Miss Way, of town, is visiting friends at West Lake, Picton, and Carrying Place.

Miss W. Morton, of Stirling is visiting in town, the guest of her sister, Mrs. J. A. Watson.

Mr. Fred Rodgers, of Tweed, spent a few days last week at the home of Mrs. E. Comerford.

Mrs. F. McFadden and baby were week-end guests of Mr. and Mrs. Edwin Parks, Charles street, Belleville.

Miss Sarah Rook has returned to Toronto, after spending a couple of weeks at her home in the Jarvis Settlement.

Mr. and Mrs. T. Callery and children, of Penetanguishene, are visiting their mother, Mrs. J. Callery, in town.

Rev. W. R. Merrick, of Morven, formerly of the Queensboro circuit, has accepted an invitation to the Cannifton circuit.

Mr. and Mrs. John McMullen, of Port Arthur, are the guests of the former's brother, Mr. Thomas McMullen, Havelock.

Mr. and Mrs. F. A. McFadden left town on Monday for the Western Province, when they will reside in future.

—Ladies' Guild of St. John's church are holding a Sale of Home Cooking in Tufts & Kelly's store on March 17th. 9-2

Two hundred and forty-eight children in the Belleville public schools are 10 per cent or more underweight according to the monthly report of the school nurse.

At the spring Assizes for County of Hastings held in Belleville the following are among those who will serve on the jury:—Leonard Keene and C. M. Wallbridge.

According to a report from Toronto, W. J. Taylor, well known publisher of the Sentinel-Review, Woodstock, suffered a slight stroke while on a business trip to Toronto this month.—Printing Review.

Rev. C. J. Young left recently for Vancouver, B. C., where he will spend some months with his son, Mr. Young has spent over forty years in the ministry in this diocese and Bishop Seager has granted him six months' leave of absence.

FORMER MADOC BOY CREDIT TO ONTARIO

In Frederick Bamforth we have a young man of whom our province should well be proud. He was born in Kingston, the son of Rev. Richard and Mrs. Bamforth, well and worthily known for many years in the Bay of Quinte Conference of the Methodist Church, and now retired and living in Peterboro.

Fred's star first rose above the educational horizon when he matriculated in 1918 from Cobourg C. I. into Queen's University with first place in Mathematics and also the honor of the Ellen Nickle Memorial Scholarship. Three years later he graduated as Medalist in Mathematics, and in the following year took his Master's degree. For three years he was in charge of the Mathematical studies of Albert College, Belleville, whence he was allured to Chicago University, where in September, 1927, he won the title of Ph. D. with much distinction. He has been for some time on the staff of Chicago University and has refused several tempting professorships. His latest honor is a "National Research Fellowship" in Harvard University, where he will go next October.

His scholarship is by no means his greatest attraction: his character shines with purity, honor and service.

We are justly proud of such young men, but cannot more be done to retain in our own beloved land such valuable asse's?—Deseronto Post.

Y. P. S. OF TRINITY CHURCH

An interesting meeting was held on Tuesday evening. After the usual business, the Bible reading was taken by Miss Florence Hale, and the members repeated the one hundred and twenty third Psalm in unison, from memory.

Readings by Miss Bernice Bailey and Mrs. D. Brown were very helpful. Two groups of songs by the popular orchestra, Misses Schofield, Ferguson and Ludbrook were a happy addition to the program.

Miss G. McRory, Missionary Vice President took for her topic a chapter from "The Christ of the Indian Road." This pointed a timely warning to us of the western world, for while the Asiatics love our Christ, they cannot respect our Christian civilization.

The Hudson car led in the part of the race run Tuesday evening.

COMING EVENTS

MADOC AGRICULTURAL SOCIETY are putting on a Dance in the Armouries on Easter Monday. Keep the date open. 11-2

OAKDALE REBEKAH LODGE will hold a Euchre on Friday, March 30th, in I. O. O. F. Hall. Rebekahs come and bring your friends. Admission 25c 10-3

THE WOMEN'S MISSIONARY Society of Trinity Church intend serving a hot supper, on Saturday March 24, in the store formerly occupied by Mr. T. Tucker. Supper 35c. 10-3

AN OLD TIME CONCERT WILL be given under auspices of Hazzard's United Church on March 16th, St. Patrick's Eve, in Hazzard's Orange Hall. Admission 25c. Lunch served. 10-2

NEW ADVERTISEMENTS

ADVTS. inserted in this column are 50c for first insertion, 25c. for each subsequent insertion for 5 lines or less. 10c a line for each additional line for first insertion, 5c for each subsequent insertion. No cheaper way to reach hundreds

FOR SALE.—span of Horses. Apply to Bert McCarey, Eldorado, R. R. No. 1, Phone 64 r 5 11-2

FOR SALE:— Bed, Refrigerator, Wringer, Bassinet, Carriage and other articles. Apply afternoons to Mrs. Duncan Brown, Phone 178. 10-tf

Buy from Cranston. Only one grade. The best. Cranston's Poultry Farm, Stirling, Ont. 5 tf.

The colour and exquisite flavour of "SALADA" Green Tea are natural—Only the process of curing is different from Black Tea—Both are equally pure—"SALADA" Green Tea is sealed in air-tight aluminum—fresh—delicious—satisfying—35c per ½-lb. at all grocers. Ask for this tea.

"SALADA" GREEN TEA 299

AN OLD PRAYER STILL GOOD

Here is an interesting old prayer in verse, which dates from the eighteenth century at least. It is of English origin, but its author is unknown. It is as appropriate to-day as when written, as a petition for divine help in living a happy, healthy and useful life here on earth.

Give me a good digestion, Lord, and also something to digest.
Give me a healthy body, Lord, with sense enough to keep it at its best.
Give me a healthy mind, good Lord, to keep the good and pure in sight,
Which, seeing sin, is not appalled but finds a way to set it right.
Give me a mind that is notbound, that does not whimper, whine or sigh.
Don't let me worry overmuch about the fussy thing called I.
Give me a sense of humor, Lord; give me the grace to see a joke,
To get some happiness out of life and pass it on to other folk.

—The Churchman (New York).

Col. Lawrence Arabia's Friend In New Light

Some Tales of the Modest Englishman Who Converted the Arabs into England's Allies

HE HATED SNOBS

In a new series on the "Mystery Man," Lawrence, Robert Graves, in The World's Work, tells some new stories which cast a new light on Col. Lawrence's character. Col. Lawrence, as we all know, was a most undisciplined person. He cared nothing for rank or decorations for himself and he hated the man who "swanked" under a military title without brains to back it up.

Lawrence's lieutenant-colonelcy came early in 1918, to put him on the same level as Lieutenant-Colonel Joyce, who was graded as General Staff Officer, First Class, for liason with the Arab Regular Army; Lawrence was General Staff Officer, First Class, for liaison with the Bedouin Arabs. It would not be correct to say that Lawrence accepted this rank; he just went on working, whatever they called him. The Distinguished Service Order, to which he was gazetted, was a present for the Tafileh battle. His full-colonelcy Lawrence himself applied for (just after the capture of Damascus), much to the surprise of General Headquarters, where his indifference to rank and awards was a standing joke. But he explained that he wanted the rank (special, temporary, acting, and with all other possible qualifications) merely to secure for himself a berth on the staff-train through Italy, which accepted no officers of lower rank than full colonels. He got his way. He called it his "Taranto rank."

So far as I know, he only once used the privileges of his rank for other than traveling. Once at a rest-camp he stopped to watch a bullying officer bawling at two wretched privates, battle-wearied men, who were passing on the far side of the barrack square: "Come here, you two loungers! Take your hands out of your pockets! Why the hell didn't you salute me? Don't you know I'm a Major?" The poor fellows mumbled something. "Now stand over there," said the Major, "and let me see you march past and salute." They obeyed and were walking off hurriedly when the Major recalled them. "Now come back and do it again properly." They did it again. One moment, Major," said a voice behind him, "there is something you have forgotten." The Major wheeled round and saw a rather haggard-looking bare-headed boy in a tonic starred and crowned, on the shoulders, with badges of rank: Lawrence. The Major saluted in confusion; the soldiers, happier now, were shuffling off, but Lawrence beckoned them to stop.

"The thing that you have forgotten, Major," Lawrence went on gently, "is that in this army the salute is paid not to the man but to the rank, and the officer saluted is ordered by the King, whom he represents, to return the salute. But, of course, you know that." The Major was speechless. "You will therefore salute these men," said Lawrence, "whose salutes just now you failed to return." The Major saluted, choking with rage. But the merciless Lawrence continued: "Major, those private soldiers saluted you twice. You will, therefore, return their salutes a second time." And the Major had to obey. . . . .

This story recalls another: Lawrence, shortly after the war ended, was in Oxford Street, London, one night, walking head-down in the drizzling rain. He was pulled up a Lieutenant-Colonel for not saluting him. The Lieutenant-Colonel was accompanied by a woman, obviously a new acquaintance. Lawrence slowly peeled off the badgeless rain-coat that he was wearing and showed his rank. The Lieutenant-Colonel grew red in the face. Lawrence said, "You can go away." . . . The woman went a third way.

Lord Riddell has kindly given me the following story: "After the final debate at Versailles I had a talk with Feisal and Lawrence. The latter ascribed to Feisal the following observation: 'In the Desert, overtaking a long caravan of camels, you find each camel tied by his nose-rope to the tail of the camel in front of him; but when you reach the head of the string after a long walk you find that it is led by a little donkey!' The implication was of course that the stately ones were dull and lacking in brains, and that the leaders were artful but not profound."

Lawrence was still helping his Arab friends in the years after the war. His assistance was divided between H. Feisal, King of Irak, and his brother, Abdulla, who was ruling Trans-Jordania.

Abdulla originally came to Transjordania with the idea of making war on the French to avenge his brother's expulsion, but has suspended his hostile intentions. An amusing incident occurred in 1921, when he found two French Catholic priests stirring up anti-British propaganda. He dismissed them from his kingdom and put in their places two American Presbyterian missionaries. When a furious protest came from the Vatican, Abdulla replied innocently, pleading his ignorance of the difference between the various Christian sects; however, as Lawrence happened to be with him at the time, we may doubt this.

Of Lawrence during this political period there are many stories that one day will be collected, true and false together, in a full-length "Life and Letters." I can vouch for the truth of two or three typical ones. Lawrence went to Jedda in June, 1921, and tried to make the treaty with Hussein to which he refers in the letter that I have quoted. Hussein kept him arguing for two months in the heat, hoping to break down British opposition to his claim for a paramount position above other Arab princes, and finally put him off altogether, suggesting taht he continue the negotiations with his son Abdulla in Amman.

Lawrence sent a cipher cable to Lord Curzon, the Foreign Minister. "Can do nothing with Hussein. Are you fed up or shall I carry on with Abdulla?" Curzon, who was a stickler for the diplomatic phrasing of official dispatches, asked his secretary: "Pray, what does this term, 'fed up', signify?" The secretary, who had a sense of humor, replied: "I believe, my lord, that it is equivalent to 'disgruntled.'" "Ah," said Curzon, "I suppose that it is a trem in use among the middle classes." When "carry on" had also been explained, Curzon gave consent to the Abdulla negotiations and Lawrence carried them on. Meanwhile, the secretary, a friend, had told him in a private letter of the "fed up" episode. So Lawrence, having successfully concluded his negotiations with Abdulla, again cabled to Curzon in cipher: "Have wangled things with Abdulla. Details follow by letter. Note, the necessary verb 'wangle' is absent from the diplomatic cipher. I submit that a letter-group be allotted to it to save spelling it each time." The word is now in the cipher book.

A former member of the Foreign Office staff, who wishes to remain anonymous, had told me an even stranger story of Lawrence and Lord Curzon. "It twas at the first meeting of the British Cabinet held to discuss the Middle Eastern situation. Curzon made a well-turned speech in Lawrence's praise, introducing him. I could see Lawrence squirming at the praise, which he seemed to think was misplaced, and at the patronage. Lawrence already knew most of the ministers present. It was a very long speech and when it ended Curzon turned to Lawrence and asked him if he wished to say anything. Lawrence answered sharply: 'Yes, let's get to business. You people'—(imagine Curzon addressed as 'you people'!)—'don't understand yet the hole you have put us all into!' Then a remarkable thing happened. Curzon burst into tears, great drops running down his cheeks, to an accompaniment of slow sobs.

"It was horribly like a mediaeval miracle, the weeping of a church image. I felt dreadful; probably Lawrence did too. However, Lord Robert Cecil, who seemed to be hardened to such scenes, of which hitherto I knew only by hearsay, interposed roughly: 'Now, old man, none of that!' Curzon wiped his eyes, blew his nose in a silk handkerchief, and business proceeded."

Throughout these years Lawrence lived in great retirement. The advertising of this Arabian adventure both by the press and by Lowell Thomas's cinema lecture-tour proved most unwelcome to him. He received an enormous mail, including, it is said, more than fifty offers of marriage from unknown women, and was relentlessly and unsuccessfully pursued by lion-hunting hostesses.

In his visit to the East in 1921, treaty-making, he did return by air as had been prophesied, and found a crowd still waiting at the aerodrome to greet him with "Aurans at last!" A friend of mine was talking to him shortly afterward, at Jerusalem, when an Arab came up and saluted. It was a member of the bodyguard, "an awful-looking scoundrel, with love-locks and a sash-full of weapons." Lawrence asked if he was doing anything important now. The man, trembling with pleasure at seeing Lawrence, answered: "No, lord, nothing important." "Then you must go to Basra and enroll in the service of Lord Feisal, who will want your services and the services of the rest."

Lawrence met Foch at Paris. It is related that Foch remarked in a friendly way to Lawrence: "I suppose now that there will soon be war in Syria between my country and your Arabs. Will you be leading their armies?" "No," Lawrence answered, unless you promise to lead the French armies in person. Then I should enjoy it." The old Marshal wagged his finger at Lawrence. "My young friend, if you think that I am going to sacrifice the reputation that I have so carefully compiled on the Western Front by fighting you on your own ground and under conditions imposed by yourself, you are very much mistaken." Asked whether this story were true, Lawrence has replied that "the event has faded from my retentive memory," which can mean anything that any one likes it to mean.

One more story (out of its place but recalled by this discussion of international affairs): When Lawrence was working up from Akaba into Syria he once took a mobile hospital with him on a raid. All the stretcher-cemels were, for economy of transport, loaded up with dynamite. The Royal Army Medical Corps Headquarters in Palestine heard of this and telegraphed expecting that the Arab Army would in future observe the Geneva Convention, which insists that the transport devoted to fighting shall be kept distinct from that devoted to medical work. Lawrence on his next raid therefore left both hospital and doctor behind. The Medical Headquarters again protested, and Lawrence replied that transport could not be wasted on non-coombatants. This enraged the Surgeon-General, who tried to catch Lawrence by wiring a peremptory request to know how Lawrence proposed, in the absence of his medical officer, to dispose of his wounded. Lawrence then replied tersely: "Will shoot all cases too hurt to ride off." This closed the argument.

Fashion

A NEW BLOOMER DRESS.

This charming little bloomer dress has a square neck, and short kimono sleeves, or long sleeves attached and gathered to narrow wrist-bands. A shirred set-in frill in the front provides for the necessary fulness, and the back is in one piece. Both views are trimmed with an attractive cross-stitch design. The bloomers have elastic run through the top and leg casings. The dress is No. 1550 and is in sizes 2, 4, 6 and 8 years. Size 4 requires 2 yards 36-inch material, or 1½ yards 54inch. Price 20c the pattern.

The Transfer Design No. 1163 has two strips of cross-stitch border, each 15½ inches long, two narrow borders 8 inches long. Blue or yellow. Price 25c the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10c the copy.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

Mounted Police and Fur Posts Listen for Arctic Programs

Radio—especially that service provided by Westinghouse stations—is now an important factor in the daily lives of the people of the Far North. Just how vital this means of communication has become, where whole communities are isolated by trackless wastes of ice, is related by Jim Boa, Canadian rifleman and member of Canada's Bisley team to England, where he set up new records for marksmanship.

Mr. Boa charted a three months' trip into the Hudson Bay and James Bay districts. He did not go in by Hudson's Straits on the fur boats, but instead went into Northern Ontario and thence by canoe down one of the great rivers flowing into Hudson Bay.

There was no possible way that he could notify any one of his arrival, yet everywhere was surprised to learn that he had been expected. The mystery was solved when he learned that the message had been sent North from the Westinghouse transmitter KDKA as part of its yearly service to the Arctic and Antarctic. Mr. Boa discovered that all posts of the Hudson's Bay Company, the Royal Canadian Mounted Police and Revillon Freres stand by every Saturday night for emergency messages from the Westinghouse radio stations.

The sharp-shooting explorer reports that nowhere did he go throughout his three and a half months' wanderings without hearing glowing accounts of what such radio service has done to brighten the lives of lonely denizens of the ice fields in the Far North

Rivals in the Arctic

Captain George H. Wilkins, the Australian aviator and explorer, who sailed recently from Seattle for Seward, Alaska, to reach the unmapped Arctic sea for land, should prove a dangerous rival to the Italian General Nobile. The latter is planning to do the same thing in a dirigible. Wilkins is a vetetran in polar exploration both in the Arctic and the Antarctic, although still less than 40. To understand the kind of man who will match the airplane against the dirigible in the Arctic the coming Spring, it may be said that George H. Wilkins was second in command of Stefansson's Canadian expedition of 1913-1918, also second in command of the British Imperial Antarctic Expedition of 1920-1921, naturalist of Shackleton's last Antarctic expedition of 1921-1922, and in 1926 and 1927 made Point Barrow his base for flights in the Arctic Sea in quest of new land. Last year he took desperate chances as late as June to explore the region northeast of Point Barrow, but had to succumb to the weather. Earlier in a flight of 550 miles to the northwest he made soundings of 5,440 meters in 77 degrees 45 minutes north and 175 degrees west, which seemed to indicate that if there was land in that part of the polar basin it was a long way off.

It is worth while reproducing the opinions of Captain Wilkins about flying conditions in the Arctitc Sea. No man living is better informed. In the American Geographical Society's 'Problems of Polar Research" (1928) Captain Wilkins says, from a wide experience, that "long-distance flying in the Arctic is not more hazardous than long-distance flying in other regions." He adds:

There are, judging from records collected, no smoother aid conditions in the world than those over the Arctic Sea during the late Winter and Spring. . . . The best months for aircraft exploration in the Arctic are March and April.

Captain Wilkins declares that difficulties due to temperature "are less in high Arctic latitudes than those contended with daily on mail routes in various other parts of the world" After April the aviator is handicapped by fogs, which increase as the temperature rises. No one knew better than Captain Wilkins that his attempt to fly from Point Barrow to Greenland the first week in June was a forlorn hope. Equally bold and tenacious is his fellow-pilot, Carl B. Eielson, who was with him in two previous Arctic expeditions. It is their purpose again to fly from Fairbanks over the Endicott Mountains, 10,000 feet high, to Point Barrow. They know exactly what they wil have to expect in assembling supplies, so that on this third expedition less time should be lost in preparations Captain Wilkins is so versourceful that, with the experience of two expeditions to draw on, the prospect that he will settle one Arctic problem—whether there is land in the polar basin now unknown to geographers—should be more than fair.

"Well, dear, what kind of part have you got in the new revue?" "Oh, I merely have to go on and look pretty, as usual." "Poor girl! They do make you work hard!"

Midland man: "I worked hard during all last summer." Magistrate: "But we had no summer."

Loss of Trousers Threatened Beecham During Concert There

London.—To be directing a vast orchestra vigorously before a critical audience, and thus employing both hands, and to do all this with an unpleasant consciousness that one's suspenders had broken and his trousers were coming down—that was not a nightmare but the actual experience of Sir Thomas Beecham at Carnegie Hall in New York during his recent American tour.

According to what he told friends, Sir Thomas was putting all his wonted fire into a fortissimo passage when suddenly he heard a rending sound and felt his trousers beginning to sag dangerously at the knees. What was he to do, be man or musician? He decided to be musician to the last, and so he bravely carried on. His bravery was rewarded.

The tremendous finale was followed by an outburst of applause, under cover of which Sir Thomas was able to hobble from the platform with one trousers leg sagging over his shoe but with his honor both as man and musician narrowly preserved.

More Home-Made Candies

To make stuffed prunes select large prunes, wash thoroughly and let soak in cold water for two hours. Remove the stones and dry the prunes on clean cloth. Fill centres with nuts only, fondant and nuts, candied fruit or preserved ginger. Roll in granulated sugar.

Stuffed Figs.

½ pound dried figs, ½ cup orange juice, 2 tablespoons sugar, 1 teaspoon lemon juice, Maraschino cherries, Pecan meats. Mix the orange juice, lemon juice and sugar and cook the figs very slowly in the liquid, turning and basting them often, until they are tender. Drain, cool, open and stuff each fig with two maraschino cherries cut in halves and five pecan meats, broken. Close, press into shape and roll in powdered sugar.

Date Sweets.

1 pound dates, ½ cup walnut meats, 2 tablespoons candied ginger. Stone the dates and put them through a food chopper. Add the walnuts and ginger, coarsely chopped. Knead the mixture on a sugared board and shape into a roll. Cut in thin slices with a knife and roll the slices in powdered sugar.

Chocolate Dates.

Stone choice dates and steam them for five minutes. Remove from the steamer and when cool enough to handle close each date firmly. When cold, coat with sweet chocolate. As a variation the centres may be filled with a quarter of an English walnut or with a bit of candied ginger.

French Date Bonbons.

Stone large dates and steam them for five minutes. When they are cool stuff them with fondant. Cut pistachio nut meats in halves and press two or three pieces into the fondant of each date so that the nut meats show. Almonds, blanched and toasted, may be used in other dates. Place each date in a paper bonbon cup

Chocolate Prunes.

Wash choice prunes thoroughly, cover with cold water and soak overnight. Bring to the boiling point, remove from the fire and drain. Remove the pits and allow the prunes to dry. Fill each prune with a salted pecan meat and dip in melted chocolate. Let stand until the chocolate has dried and then wrap in waxed paper.

There is an almost infinite variety of combinations possible in dipping candies from plain nuts to elaborate centers of creams and nougat. These recipes are for simple centres but they make very attractive confections.

Chocolate Delights.

1 cup butter, 1½ pounds confectioners' sugar, ¾ ounces (about 1 1/3 cups) cocoa. Wash and cream the butter, add the confectioners' sugar gradually and then add the cocoa which has been sifted. Shape into balls, coat with melted sweet chocolate and roll in cocoa.

Mocha Chocolates.

¼ pound butter, ¾ pound confectioners' sugar, ½ cup cocoa, 2 tablespoons coffee extract. Cream the butter—use unsalted butter, if possible—and add the confectioners' sugar gradually. Then add the cocoa and the coffee extract. Add more sugar if necessary to make the mixture stiff enough to handle and shape in balls. Coat with sweet chocolate.

Pistachio Chocolates.

Flavor fondant with pistachio extract made by combining lemon and almond extracts and mix in one-fourth cup (one ounce) of blanched pistachio nuts. Roll into balls; coat with sweet chocolate; sprinkle the top of each candy with chopped nuts as soon as it is coated.

Almond Acorns.

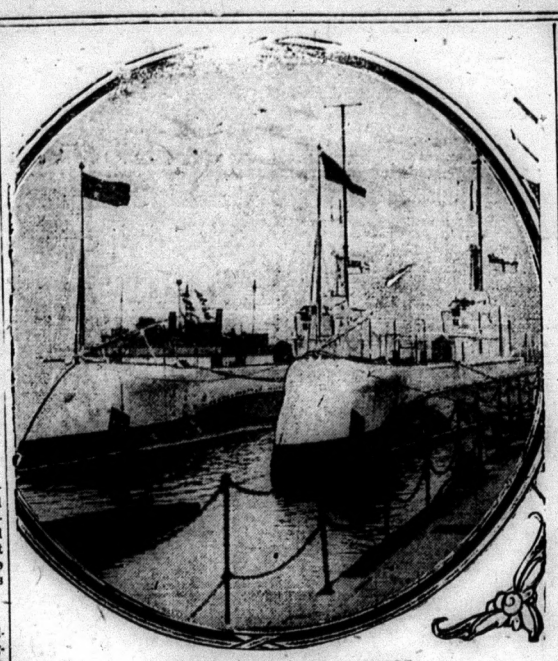
Blanch the desired quantity of almonds. Melt a little sweet dipping-chocolate over hot water. With the tips of the fingers dip the almonds into the chocolate, coating them not more than two-thirds of the way down. Dip them immediately into chopped pistachio nuts. Place on a waxed paper to dry.

Grilled Almonds.

Blanch one cup of almonds and dry them thoroughly. Boil one cup of sugar with the same amount of water until it reaches 234 degrees or threads from the tip of a spoon. Add the almonds and let simmer, stirring frequently, until they turn a yellow brown color. Remove from the fire at once, and stir vigorously until the nuts are covered with a sugary coating.

Honey Fruit Squares.

½ pound dessicated cocoanut, 1 pound strained honey, ½ cup washed currants, milk. Cover the cocoanut with milk and let it stand for a few minutes. Cook the honey until it boils, add the cocoanut and continue cooking until it is very thick. Then stir in the currants and pour into an oiled tin. When cold, cut into inch squares.



SUBMARINES ON LONG VOYAGE

H.M.S. Otway and H.M.S. Oxley, giant British submarines, photographed at Gosport shortly before their departure upon the first unescorted voyage made by submarines from England to Australia.

King Amanullah To Be Received With Splendor at London Court

Visit of Afghan Monarch and Queen Expected to Cost British Ruler £10,000; New Scarlet Liveries, Floral Decorations, State Banquet Among Items

London.—More than ordinary preparations are being made at Buckingham Palace for the reception of King Amanullah and his Queen.

Since the Afghan monarch has been received elsewhere with so much splendor, it is considered that it would be impolitic if the manner of his reception at the court of the monarch who is Emperor of India should seem to the royal visitor from the East less splendid than those arranged for him elsewhere.

When King Fuad visited the English Court last summer, although he was received as any European monarch would have been, it became known that he was a little disappointed at what appeared to him to be a lack of splendor at the court of the richest and greatest of living sovereigns.

The officials at Buckingham Palace are exerting themselves to see that King Ahanullah shall not depart under a similar impression and his visit is going to be an expensive one for his host.

All the indoor footmen at the palace are to be provided with new scarlet liveries, the tunics of which will be specially decorated for the occasion with gold lace. There are sixty footmen, when the staff is at full strength, and the bill for the liveries will average £50 each, totaling £3,000, and this is but one item in the expenses of the visit.

The visitor and his queen will occupy the royal visitors' suite containing eight apartments. The walls of the bedroom, drawing room and writing room in this suite have been relined with silk of colors and designs specially liked by the Afghan sovereigns.

The walls of the bedroom will be scarlet, with a gold dado. The relining of the walls of these rooms has cost £1,200. The floral decorations probably will be the most costly ever seen at Buckingham Palace. Two contracts for the supply of floral decorations for the visit have been entered into at a cost of nearly £2,000.

The reception will be carried out with the greatest splendor when they arrive. All the court officials in their uniforms will attend and the King's guard formed by picked men from the Life Guards will stand three deep around the walls of the spacious hall.

King Amanullah is traveling with a large suite of attendants, most of whom will be housed in expensive rooms about St. James's Palace at King George's expense and they will be suitably entertained every evening.

Then there will be the cost of the state banquet, the extra carriages and horses and motor cars, a special service of messengers and Scotland Yard "extras" for looking after the safety of the Royal visitors. The expenses of the visit are expected to be at least £10,000. In pre-war days a royal visit was supposed to cost £3,000.

London's Lottery Craze

Famous "Flutters" of the Past

Although the first Westminster Bridge was built by money raised by a lottery, it can hardly be said that the method of raising funds was an unqualified success. Indeed, the first lottery failed, and it required a dozen lotteries in all to raise the necessary £389,500.

One wonders how many lotteries would be required to raise £27,500,000 which is the total estimated cost of all the schemes recommended by the Royal Commission on Cross-River Traffic!

It is just over a century since the Englishman was deprived of the power to take part in lotteries. In October, 1826, at Cooper's Hall, Basinghall Street, was drawn the last State lottery. The first public lottery had taken place in 1569, when the Government of the day organized one to raise funds for repairing the national harbors, the prizes being "plate and certain sorts of merchandises." It took place at the western door of St. Paul's Cathedral.

"Publick Nuisances"

After 1569 lotteries swiftly achieved an amazing popularity. They were organized for the supply of water to London, for assisting royalties and pretenders to the throne, for disposing of famous jewels, for the purchase of picture galleries.

Eventually they must have interfered considerably with the work of the nation. The "London Spy" said: "The Gazette and Post-Papers lay by neglected and nothing was Pur'd over in the Coffee Houses, but the Ticket-Catalogue. No talking of the Jubilee, the want of Current Trade with France, or the Scotch settlement at Darien; Nothing Buz'd about by the Purblind Trumpeters of State News, put Blank and Benefit."

And in 1698 Parliament, coming to the conclusion that lotteries were "common and publick nuisances," passed a Bill prohibiting them. But the thirst for a "flutter" caused the State lotteries to be resumed in 1709. Obdidren, usually the picturesque Blue-coat boys, were often brought in to do the drawing. On more than one occasion attempts were made by "adventurers," as ticket-holders were called, to bribe the boys to draw in an irregular manner.

It was evident that the evils attending lotteries far outweighed the benefits to the revenue, although the average yearly profit between 1793 and 1824 was £346,765.

In 1808 a committee reported that: "The foundation of the lottery system is so radically vicious that . . . under no system of regulations which can be devised will it be possible for Parliament to adopt it as an efficacious source of revenue, and, at the same time, divest it of all the evils which it has hitherto proved so baneful a source."

Since 1826 (writes H. V. C. in "The Evening News") every kind of lottery, public or private, charitable or otherwise, has been illegal.

Would Put Farming On Business Basis

"We are as far below in the business end of farming as in any other phase of agriculture," affirmed Hon. John S. Martin, Minister of Agriculture for Ontario, in an address made at a meeting of the University of Toronto Commerce Club recently. "The farmers must learn to manage their affairs in a businesslike way," he continued, "and the old system of everybody rushing his produce on to the market at once, and thereby causing a glut, must come to an end. Co-operative marketing is the ideal toward which all energies should be directed, and the importance of this is, I think, beginning to be realized, for the United Farmers of Ontario have established a co-operative school, and are working in harmony with the Government in bringing about an improved state of affairs."

It is important that one should like sincere things and not flummery and rubbish which blows away at the first touch.—Lady Oxford.

Engineer Killed But Stops Train

Brakes Set as Lackawanna Pilot is Struck by Pole Near Kearny, N.J.

Was Leaning From His Cab

An engineer of a Lackawanna Railroad passenger train, struck down in his cab recently, probably saved the lives of a number of persons when, even in death, his hands closed on the emergency brakes and stopped the speeding train.

The engineer, David Bowen of North Bergen, N.J., was killed in one of the most peculiar accidents in Lackawanna records.

Earlier two freight cars of the Pennsylvania Railroad were derailed on the meadows just outside Kearny, N.J. The cars crashed into an electric light pole and bent it in such a way that it projected slightly over the Lackawanna tracks paralleling those of the Pennsylvania.

When Bowen's train approached, three hours later, the engineer leaned out of his cab. The bent pole struck his head, crushing it, and physicians who examined him later said he must have died almost instantaneously. Nevertheless, the train jerked to a stop, and trainmen found Bowen's hand clenched over the set emergency brake.

Pullman Service for Germany

Berlin.—The running schedule for Germany's first Pullman train, which will be put into service on May 15, has been made up. The train will leave The Hook of Holland and make stops at Rotterdam, Amsterdam, Utrecht, Diusburg, Dusseldorf, Cologne, Mainz, Mannheim, Carlsruhe, Baden-Oos, Freiburg and Basle.

Salesman: "We have a car that will climb any hill." Motorist: "I don't doubt it. The one you sold me last year was over-ambitious and tried to climb a tree."

Turning Wood Into Metal

Wonder Material for Aircraft

I examined recently what may possibly prove to be the most revolutionary invention in aircraft design since the Wright brothers first flew a heavier-than-air machine (says a writer in "The Daily Express")'

Mr. Wladimir J. Einstein, who is at present in London, is the inventor of the process, which, in its simplest terms, is to dip any substance in a metal bath. The result is an object which, it is claimed, is from five to ten times as strong as the original, is weatherproof, and of three times greater durability.

A noted engineer who accompanied me expressed himself satisfied that the project is worthy of further investigation.

Duplicates of the samples I saw are now in the possession of the Air Ministry. Their experts are the only people in the country in a position adequately to test the new process.

If the claims made by the inventor are substantiated, it is proposed to construct of this material the envelope of the new British semi-rigid airship now being designed.

The Magic Bath

Mr. Einstein is not seeking capital, but orders, with a view to building a factory here. He handed me a small spar of wood. I snapped it with my fingers. He gave me a similar spar of the same wood metallized. It was little heavier, but, so far as my efforts were concerned, it was unbreakable.

He showed me fabric treated in a metallic bath. It was of ordinary linen, so thin that one could have torn it to pieces. I tried and failed to tear the metallized fabric.

His invention is not only applicable to aviation. He showed me a teapot dipped in a bath of gold. It is almost unbreakable. So showed me a set of siphons, worked in gold filigree, which are being made for the acceptance of the Royal Family.

"The metal bath is more than a 'dope'," he said. "It becomes married to and an integral part of the core, hence there is no fear of shrinkage or expansion of the core causing the metal coating to part from the inner surface or to crack."

The truth of the statement was demonstrated by the fact that the grain of the wood core of a plate appeared plainly through the metal coating.

Mr. Einstein claims to be able to build an aeroplane of half the present weight in a third of the present time, with double the factor of safety at little additional cost.

King Names Prince of Wales Master of Merchant Navy

London—The Prince of Wales recently received a new title specially created for him by his royal father. Henceforth he will be known as "Master of the Merchant Navy and Fishing Fleets."

The appointment being without precedent it will remain for the Prince himself to decide its duties.

"His Majesty the King," says an announcement recently, "for some time has been consiering what steps can be taken to bring the merchant navy and fishing fleets into line with other Government services of the empire by having as their titular head some member of royal family."

Woman resembles the ape more than does man, for her legs are usually shorter and her arms longer.—Professor Arthur Thomson.

French Humor

Discussions of Weighty Topics are Constantly Enlivened by the Shafts of a Humor Which Remains a Characteristic National Trait

Paris—Now and then Frenchmen shake their heads slowly and say that things are not what they used to be—that there are no longer good restaurants in Paris, that their countrymen in general are no longer universally polite, that France is losing many of the qualities for which she has long been renowned. One feels justified by experience in accepting such plaints only at considerable discount, since the dark mood of a Frenchman is likely to be very dark indeed. On the other hand, his gay moods are as gay as one could wish; and one of the qualities that he distinctly has not lost is his sense of humor.

It is all the more piquant and striking, because nothing is spared. No topic, however grave, is regarded as inappropriate or jokes. Wit is held to justify itself. It is an end in itself, for which great sacrifices are made. It may do harm to its victim, even perhaps to its author, but if it [illegible] as wit a great deal will be [illegible]ked.

It would be difficult to find subjects as grave as France's foreign relations, her finances and her army. Yet it happens to be these very topics that lately provoked numerous humorous observations.

A bill has just passed the Chamber reducing compulsory military service to one year. There appears a grotesque drawing of two soldiers doing kitchen duty, one saying to the other:

"It seems that after 1930 a year will be enough time in which to learn to peel potatoes."

The Briand-Kellogg discussion of a [illegible]ty against war having reached an [illegible]sse, there is a drawing depicting [illegible]nd proposing, "No more wars of [illegible]ression," while Kellogg replies: [illegible] more wars, even defensive." The [illegible]ic title says, "Carrying Locarno [illegible] Far."

Wit Plays With Finance

Shiploads of gold arrive from New [illegible]ork. One newspaper commentary [illegible] an imaginary colloquy between M. [illegible]ucare and Marianne. "They're [illegible]ging millions and millions of gold [illegible]ars," says the Premier. "What [illegible]ore do you want?" And Marianne replies pensively, "A franc." (That [illegible]s, a legally stabilized franc.) The [illegible]sence of the financial situation is [illegible]us summarized in a dozen words.

The difficulties of Italy in stabilis[illegible]g the lira, with a consequent rise in [illegible]e cost of living, are pictured by [illegible]ving one forlorn man say to an[illegible]her, "When did you last eat?" The answer is, "Not since the stabilization of the lira."

One of the most widely read of French financial writers concludes an article thus: "Unless, of course, it isn't like this at all, and other things are happening which will play havoc with theories and calculations." An unfriendly newspaper reprints the sentence with the headline, "The last word of financial science."

It is decided that the soldiers shall have a new form of cap. So M. de la Fouchardiere imagines the following conversation:

"Yes, of course," says the Minister of War. "That would be more convenient. The kepi, having a visor, would be easier to salute."

"Excuse me, Monsieur le Ministre, the soldiers don't take off their hats when they salute."

"Ah, really? I hadn't noticed. But are you sure that this cap is entirely new? It seems to me, though I have never paid much attention, that I have seen something like that upon the heads of soldiers. Oh, yes, with a little cockade and a tuft-yellow, red or green. There was a song about that tuft when I was young."

"You are right, Monsieur le Ministre. Formerly the soldiers wore kepis, which were succeeded by calots. This is progress. We must encourage the business of making caps for the army, which is as deserving of consideration as the trade of naval hat-maker. You know that M. Leygues (Minister of the Navy) has given the sailors a new cap and made it obligatory to wear it. Besides, the new cap is very striking because of its height."

"Just what is the advantage of height in a military cap?"

"Why, the higher a cap is, the easier it is to see it from a distance. We must remember that the soldiers, one day, will go to war."

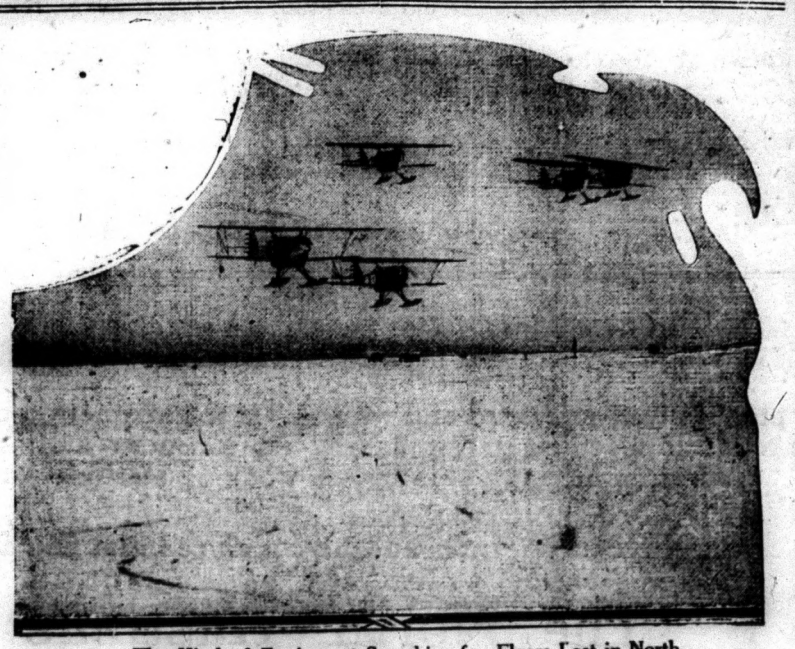
"That's true. I hadn't thought of that. But then why not adopt the shako at once?"

"That will come later, Monsieur le Ministre. Progress proceeds by steps. We shall submit in turn for your approval the replacing of the kepi by the shako, then of the shako by the kepi and finally of the kepi by the calot. For if the kepi is more martial, we shall recognize later that the calot is more practical. The calot is the new cap of the future."

The writer then recalls the opera of Offenbach, "The Brigands." In it the soldiers arrive too late to capture the brigands. The colonel is puzzled. Somebody explains that the thieves have heard the drums of the troops. "Oh, yes," says the colonel "that's true. Hereafter they shall have trumpets."

In the United States last year 23,572,002 motor-vehicles were registered We do not remember dodging the tail-end two.—Westton (Ore.) Leader.

"You were always a fault-finder!" growled his wife. "Yes, dear," responded the husband. "I found you."



The Kind of Equipment Searching for Flyers Lost in North

Airplanes in flight formation equipped with skis to facilitate landing on snow and ice at Camp Skeel, Oscoda, Mich. The pilotts are army men stationed at Selfridge Filed who are making practical climatic tests.

RIB-ROLL for House roofs-Lasting, inexpensive

ROOF your house or cottage with Rib-Roll. Handsome to look at . . . increases value of property . . . lasting . . . collects clean rainwater, banishes leaks . . . ideal for houses, barns, sheds, warehouses, schools, churches, public buildings. Give size of roof for free estimate. Write

SPRING

Coat Display

will be held at store of D. J. Barry, Madoc, on

TUESDAY, MAR. 20

all day and evening until 11 p.m.

by Mr. R. J. Carr, of A.B.Davies Ltd., Toronto

Full range of Ladies' Coats and Suits will be shown. The newest fashion ideas are embodied in these Coats for spring. Kasha Coats cleverly styled in fine qualities of material, smart Coats in Tweeds that are outstanding excellent values.

D. J. BARRY

LADIES' WEAR MADOC

BELLEVILLE MARKET

SATURDAY

Potatoes sold at $2.50 a 90 lb. bag and were more plentiful than they have been for some time. Hay was the same price as the week before, namely $12 a ton, timothy.

Apples were various prices and many prices could be quoted from 80c a bushel to $1.25 a bushel. The latter price was more steady.

In the vegetable line prices ranged practically the same as other weeks, with the exception of onions, which reached a new precedent of 30c. However, red onions could be bought if wanted for 60c. Carrots sold at 40c a peck, beets 30c a peck, turnips 30c a peck, parsnips 40c a peck and cabbages 5c and 10c a head.

Sauerkraut could be bought for 15c a quart or 2 quarts for 25c.

Honey, dark, was 45c a small pail and 80c the larger. The casual glance showed the market to be minus a great amount of celery.

In the fruit department oranges sold at 30c, 50c and 60c the dozen. Lemons 10c a dozen and grapefruit 10c each.

Head lettuce was 20c a head and leaf lettuce 10c or 3 for 25c.

Eggs did not differ much in price from last week, selling at 36c a doz. Butter was the usual standard price of 45c lb. roll. Chickens were going at $1.50 each.

HIGH SCHOOL TESTS

The recent examinations held by the teachers in the Madoc High School have given the results shown in the following lists. The number of nineties and eighties is rather large for this time of the year showing that with many of the students the winter sports have not in any way impaired the excellence of their school work.

There are, however, some pupils who have come below forty; in practically every one of these cases the subject should be discontinued.

The home study of every pupil should be attended to very carefully, from now until summer. Parents, pupils and teachers must co-operate. For five evenings every week, every pupil should put in the required time, and do his assigned homework with proper care and energy. Such work means success; and success is worth while.

NEW BOOKS AT LIBRARY

The following books have recently been added to the Madoc Public Library:—

The Dark Eyes of London, Edgar Wallace.
The Daffodil Mystery, Edgar Wallace
The Man from Morocco, Edgar Wallace.
A Debt Discharged, Edgar Wallace.
Keepers of the King's Peace, Edgar Wallace.
Sanders of the River, Edgar Wallace.
The Case Book of Sherlock Holmes, Sir A. Conan Doyle.
The Sinister Mark, Lee Thayer.
The Missing Initial, Natalie Sumner Lincoln.
The Double Cross, A. E. Thomas.
The Mummy Moves, Mary Gaunt.
The Third Warning, Augustus Muir.
The Boncocur Affair, Harvey Wickham.
Shadow of the Rope, E. W. Hornung.
Thief in the Night, E. W. Hornung.
Greensea Island, Victor Bridges.
Coming Through the Rye, Helen Mathers.
Jaina, Mazo de la Roche.
What Shall It Profit a Man, Joseph Hocking.
Love in a Little Town, J. E. Buckrose.
The Road, Elias Tobenkin.
Money to Burn, Peter B. Kyne.
Gunsight Pass, William Macleod Raine.
The Night Riders, Ridgwell Cullum.
The Night Horseman, Max Brand.
The River Trail, Laurie F. Erskine.
Prairie Gold, Harold Bindloss.
The Perfect World, Ella Scrymsour.
The Horton Twins, Fannie Kilbourne.
Little Ships, Kathleen Norris.
The Singing Wells, Roland Pertwee.
Secret Drama, Isabel Beaumont.
Dweller in the Desert, Arthur Weigall.
Spanish Acres, G. Evarts.
Old Ironsides, J. B. Wright.
Cousins, Bellamy Partridge.
Death Comes to the Archbishop, Willa Cather.
The Thunderer, E. Barrington.
Hunchback of Notre Dame, Victor Hugo.
The Forsyte Saga, John Galsworthy.
But Yesterday, Maud Diver.
Only This, James H. Pedley.
Revolt in the Desert, T. E. Lawrence.
Lawrence and the Arabs, Robert Graves.
The World of Today—4 volumes —Johnston.

London, March 9.—Two children of former Premier Ramsay MacDonald, Labor Leader, have followed their father into active politics, Ishbel and Malcolm having been elected to the London County Council in yesterday's balloting.

The funeral of Miss Ethel Reid, youngest daughter of Mr. and Mrs. B. Reid, of Ivanhoe, was held on March 6th, in the United church. Rev. Mr. Lovelace was assisted by Rev. W. H. Truscott. The united choir of Ivanhoe and West Huntingdon furnished appropriate music. The church was filled to the doors. Interment was made in Luke's cemetery. Mr. and Mrs. Reid have the sympathy of the entire community.

THE NEW CALENDAR

The League of Nations has asked the United States to co-operate in the establishment of a new international calendar to contain thirteen months of exactly four weeks each, with one day—probably New Year's Day—outside the system. Each year would begin on Sunday. This is the well-known plan originally suggested by Mr. Moses B. Cotsworth. It has many advocates, though it has not yet aroused very deep popular interest.

Advertise in the Review it pays.

A peculiar incident occurred at the farm of Mr. A. B. Rowe, Green Point, Prince Edward. A horse put its head over the partition into the adjoining stall, evidently reaching for something with its tongue. The other horse made a grab at the intruder, catching the tongue between its teeth. When the other horse jerked its head back into its own stall the tongue stayed with the attacking horse. Dr. Ray Clapp attended the injured animal but was doubtful as to saving the animal and advised destroying it. The horse was valued at $200.

Marmora village is going ahead with the proposed Memorial Building. A lot has been purchased and a by-law to provide for raising $8,000 by debentures is being prepared for submission to the property owners. The Dominion Government has agreed to rent a portion as a Post Office at a rental of over $400 per year. That at least is a good interest on the investment. A committee will also solicit private subscriptions to assist in covering the cost of the building.

Our classified advertising column brings results. Use it often.

Most feed Value for least Money

For all general livestock feeding, Quaker Schumacher Feed is unexcelled. It is the perfected carbohydrate ration—a scientific balance of corn, oats, wheat and barley feed, together with oilcake meal, edible bone meal and calcium carbonate—minerals so vital to the health of animals, and which are usually deficient in ordinary feeds.

As a base for a dairy ration, or as the sole grain ration for young stock, dry stock, bulls, hogs or horses, Quaker Schumacher Feed is most economical.

No waste, because of the perfect balance. Low moisture content, because kiln dried. Palatable, easy digested, and quickly assimilated. Quaker Schumacher Feed provides most feed VALUE for least money. Write us for free advice on your feeding problems. The Quaker Oats Company, Peterborough, Ontario.

Red Goes to Russia Comes Back Cured

Boars, Once "Firebrand of Java," Renounces Communism and and All Its Works

The conservative press of Holland is rejoicing in the repudiation of communism by the Dutch engineer Boars, known at the time of his expulsion from the Dutch East Indies last September as "the firebrand of Java," where he had been the head of the subversive Soviet movement.

After his expulsion he went to Russia in order to learn at first hand the political and social principles he had been advocating. This visit, judged from the point of view of a long article he has written for the Nieuwe Rotterdamsche Courant of Rotterdam, has resulted in his entire loss of faith in communism.

He says he considers it his duty on his return to Holland to advise the population of the Dutch East Indies, whom he himself had directed along the path of communism, to retrace their steps. His survey of the conditions in Russia has brought him to the following conclusions:

"Wages are very low. In 1927 they never went higher for the proletarians than $310 for the year. Although the ruble is rated at 50 cents it should be borne in mind that its purchasing power is only 44 per cent. of that, or of what it was before the war.

As higher employees and skilled workmen earn much more than $310 a year the wage of the unskilled is constantly shrinking, as the amount of money in circulation is carefully limited, in order to give a fictious value to the ruble abroad."

He found that the Soviet Government was able to do little for education and the care of the sick, despite all the fine slogans. As in capitalistic countries all available money is first of all spent on the army, and further on the enormous bureaucratic apparatus.

"In 1927," he says, "the expenditure for the Department of Education, National Hygiene and other cultural requirements in the whole of the Soviet Union amounted to 254,000,000 rubles, that for the other administrative purposes about 700,000,000 and for military purposes 645,000,000; that is 40 per cent. for 'militarism' and 15 per cent. for the cultural needs of the population. All this is, of course, the result of low production. The exchequer is empty, so that it is impossible to indulge in greater expenditure.

The incomes of farmers are very small. Nine-tenths of them have incomes of 25 rubles per month. Only one-tenth earn more than that.t

"Even the casual visitor must notice that the great masses of the large cities are miserably poor. The shabby clothing, the old repaired furniture, the accumulations of dirt cannot possibly be kept concealed. Their status in regard to comfort, even of health, is much lower than it was in 1913. Anybody can see that.

"In 1927 there were 2,000,000 unemployed in Russia out of a total industrial population of nearly 13,000,000.

Briton Pictures Next War's Horrors

General Swinton, Inventor of Tank, Prophesies Scrapping of All Peace Treaties

Oxford—Derpite the Washington conference, poisonous gases will be used in the next great war, according to the prediction of General E. D. Swinton, inventor of the tank, made in a recent address. The whole picture of future wars, drawn by the man who invented the new horror of the last one, was such as to make his audience shudder.

"When the next great struggle comes," he said, "the belligerent nations will not have any scruples regarding treaties. They will consider them mere scraps of paper and enter the war without even a formal declaration of hostilities. In so far as the last war was to end war, it was a failure, and the attitude of the world to-day is not in favor of world peace."

In such circumstances General Swinton did not feel that England should acquiesce in any further disarmament. The war of the future would be between people and people, not army and army, and it would actually be safer for the fighting men than civilians, he said. There would be no mercy to women and children, but this would help to shorten the period of conflict. From this viewpoint he considered the protests against the sinking of the Lusitania which brought the United States into the war and he bombing of London from the air were illogical.

The next war would mean the employment of disease germs, airplances without aviators sowing pestilence, and chemicals to destroy crops. Field warfare would be carried on in machines impervious to gas and machine-gun bullets.

Housewife—"Don't bring me any more of that horrid milk. It's positively blue!" Milkman—"It ain't our fault, lady. It's these long dull evenings as makes the cows depressed."

The Patriot

By John Galsworthy

The other day I was told a true story, which I remember vaguely hearing or reading about during the war, but which is worth re-telling for those who missed it, for it has certain valuable ironic implications and a sort of grandeur. It concerns one of those beings who, when they spy upon us, are known by that word of three letters, as offensive as any in the language, and when they spy for us are dignified by the expression "Secret Service" and looked on as heroes of at least second water.

You will recollect that when the war broke out, the fifteen hundred persons engaged in supplying Germany with information, mainly trivial and mostly erroneous, concerning our condition and arrangements, were all known by the authorities, and were put out of action at a single swoop. From that moment there was not one discovered case of espionage by spies already resident in this country when war was declared. There were, however, a few and, I am told, unimportant discovered cases of espionage by persons who developed the practice, or came into this country for the purpose during the war. This story concerns one of the latter.

In August, 1914, there was living in America a business man of German birth and American citizenship, called—let us say, for it was not his name—Lichtfelder, who had once been an officer in the German Army, a man of about fifty, of square and still military appearance, with rather short stiff hair, a straight back to his head, and a patriotic conscience too strong for his American citizenship. It was not long then before an American called Lichtfelder at the German headquarters of his old regiment, offering his services.

"No," they said to him, "you are no longer a young and active man, and you are an American citizen. We are very disappointed with our Secret Service in England; something seems to have gonewrong. You can be of much greater service to the Fatherland if, having learned our codes, you will go to England as an American citizen, and send us all the information you can acquire."

Lichtfeld's soul was with his old regiment; but, being a patriot, he consented. During the next two months he made himself acquainted with all the tricks of his new trade, took ship again at Genoa, and reappeared as lightfield in the United States. Soon after this he sailed for Liverpool, well stocked with business addresses and samples, and supplied with his legitimate American passport in his own American name.

He spent the first day of his "Secret Service" wandering about the docks of a town which, in his view—if not in that of other people—was a naval station of importance; he also noted carefully the half? militarized appearance of the khaki figures in the streets; and in the evening he penned a business letter to a gentleman in Rotterdam, between the lines of which, devoted to the more enlightened forms of—shall we say?. plumbing, he wrote down in invisible ink all he had seen—such and such ships arrived or about to sail; such and such "khaki" drilling or wandering about the streets; all of which had importance in his view, if not in fact. He ended with the words: 'Morgens Dublin Lichtfelder," and posted the letter.

Now, unfortunately for this poor but simple patriot, there was a young lady in the General Post Office who was spending her days in opening all letters with suspected foreign addresses, and submitting them to the test of invisible ink. To her joy—for she was weary at the dearth of that useful commodity—between the lines of this commercial screed, which purported to be concerned with the refinements of plumbing, out sprang the guilty ink. To a certain Department were telephoned the incautious "Morgens Dublin Lichtfelder." Now, no alien in those days was suffered to leave for Ireland, save through a bottle-neck at Holyhead. To the bottle-neck then went the message: "Did man called Lichtfelder travel yesterday to Dublin?" The answer came quickly: "American called lightfield went Dublin yesterday, returned last nightt, is now on train for Euston." At Euston our patriot, after precisely three days of secret-service, was arrested, and lodged wherever they were then lodged.

"I am," he said, "an American citizen called Lightfield."

"That,' said the British Cabinet, not without disagreement, "makes a difference. You shall be tried by ordinary process of Law, and defended by Counsel chosen by the American Embassy, at our expense, instead of by Court-martial."

Speedily—for in those days the Law's delays were short—the American citizen called Lightfield, alias Lichtfelder, was put on his trial, for supplying information to the enemy; and for three days at the Government's expense, a certain eminent Counsel gave the utmost of his wits to preparing his defense. But a certain great Advocate, whose business it was to prosecute, had given the utmost of his wits to considering with what question he should open his cross-examination, since it ,is well known how important is the first question; and there had come to him an inspiration.

"Mr. Lichtfelder," he said, fixedly regarding that upright figure in the dock, "tell me: Have you not been an officer in the German Army?"

Old Power For New Ship

A STEAM DRIVEN DIRIGIBLE

Capt. Thomas B. Slate, designer and builder, with model of "City of Glendale." Note peculiar propeller which sucks air in and thus overcomes air resistance in travel.

The hands o fthe American citizen went to his sides, and his figure stiffened. For hours he had been telling the Court how entirely concerned he was with business, giving his references, showing his samples, explaining that—as for the lines in invisible ink in that letter, which he admitted sending—well, it was simply that he had met a Dutch journalist on board the ship coming out, who had said to him: "You know, we can get no news at all, we neutrals—do send us something—not, of course, harmful to England, but something we can say" And he had sent it. Was it harmful? It was nothing but trifles he had sent. And now, at that first question, he was standing suddenly a little more erect, and—silent. And the great Advocate said:

"I won't press you now, Mr. Lichtfelder; we will go on to other matters. But I should like you to think that question over, because it is not only the first question that I ask you—it will also be the last."

And the Court adjourned, the cross-examination not yet over, with that question not yet asked again.

In the early morning of the following day, when the warder went to the cell of Lichtfelder, there, by his muffler dangled his body from the grating. Beneath the dead feet the cell Bible had been kicked away; but since, with the stretching of the muffler, those feet had still been able to rest on the ground, the patriot had drawn them up, until he was choked to death. He had waited until the dawn, for on the cell slate was written this:

"I am a soldier with rank I do not desire to mention. . . . I have had a fair trial of the United Kingdom. I am not dying as a spy, but as a soldier My fate I stood as a man, but I can't be a liar and perjure myself. . . . What I have done I have done for my country I shall express my thanks, and may the Lord bless you all."

And from the ten lawyers—eight English and two American—who, with me, heard the story told, there came, as it were, one murmur: "Jolly finee!"

And so it was!

Mr. Galsworthy has announced that his compensation for this article will be contributed to the Save the Children Fund in London.—N.Y. Herald-Tribune.

Dear Old Soul (visiting her very sick brother)—"I've had a very nice letter from Emily. She says she's so sorry she ain't able to come and see you, but she hopes to be able to come to the funeral."

Defends Britain's Submarine Policy

Rt. Hon. W. C. Bridgeman Discusses Naval Program of England

HAS CUT ARMAMENTS

Asserts Britain Has Done Her Share Toward Disarmament

London.—Right Hon. W. C. Bridgeman, First Lord of the Admiralty, speaking before the Constituttional Club, declared that Great Britain's submarine policy is exactly the same as that stated at Washington in 1921.

"We should be very glad," he said, "if submarines could be abolished altogether, but the weak and smaller countries regard submarines as their only weapon, and we have to take them into consideration as well."

The First Lord attacked his political opponents for what he termed "the large mass of misrepresentation about British naval and disarmament policies which is being propagatfed about the country to make party capital and discredit the Government."

He asserted that Great Britain had done her share toward disarmament, and added: "We are prepared to go further, if the other countries will do the same. I do not, however, think that a weak British navy would contribute to the peace of the world."

"I want to explode the suggestion," said Mr. Bridgeman, "that we started the new competition in building large cruisers. The accusation is false. It was other countries who started to build large battleships.

"Sir Herbert Samuel (formerly Home Secretary) has been telling the country that the Conservative party mishandled the Geneva conference. Any fool can say that."

Canada's Stand of Douglas Fir

A recent survey of the forest resources of British Columbia showed a total stand of approximately 76,000,000,000 feet board measure of Douglas fir. While all of this is not at present commercially accessible, a large proportion is within reasonable distance of water and rail transportation. About 80 per cent. of it is situated on ancouver Island and the adjacent mainlVand.

League's Covenant Only Path to Peace Lord Cecil Warns

Day for Action Dawns as the World Tires of Talk, He Declares; Sees War Pacts in Defense Alliances

London—A blunt warning that the world is getting impatient and that the time has come for deeds and not words was issued in "The Observer" recently by Viscount Cecil of Chelwood, in an article soberly estimating the possible results of Monday's meeting at Geneva of the Committee on Arbitration and Security of the League of Nations Preparatory Commission for a disarmament conference. Admitting that nothing like a general agreement for security beyond that contained in the Covenant of the League is very practicable. Viscount Cecil, who formerly was among the most prominent among the British delegates in the League's disarmament work, now limits his hopes to "clarifying the terms of the Covenant."

"Already a kind of catalogue has been drawn up," he writes, "of the measures for the prevention of war suggested under Article XI, ranging from the withdrawal of diplomatic representatives by all the members of the League from the capital of a power threatening a breach of the peace to a League of Nations naval and aerial demonstration against the same power."

Viscount Cecil thinks that there is prospect of an agreement on the financial assistance to be offered by League members to a country threatened with aggression. He warns, however, that, while mutual non-aggression treaties on the Locarno model strengthen and forty the covenant, other treaties providing for mutual defense in case of attack by a third party are apt to drift into mutual treaties of alliance on the old model.

The chief hope, however, Lord Cecil now seems to find in the compulsry establishment of arbitration agreements—somewhat reminiscent in basic theory at least of the Bryan treaties. He insists that if all disputes between nations were submitted to arbitration security against war would be reasonably complete.

Yukon's Healthful Climate

The climate of the Yukon Territory, Canada, is characterized by extremes in temperature and a very moderate precipitation. There is no more delightful climate than that which prevails from May 1 to October 1. The continuous light for the whole twenty-four houre, during the period from the middle of May to the first week in August, although anticipated, is a source of delight and wonder to the visitor. While the winters are long and cold, on account of the absence of high winds and the dryness of the atmosphere, the low temperatures are borne with less discomfort than in other parts not so favored.

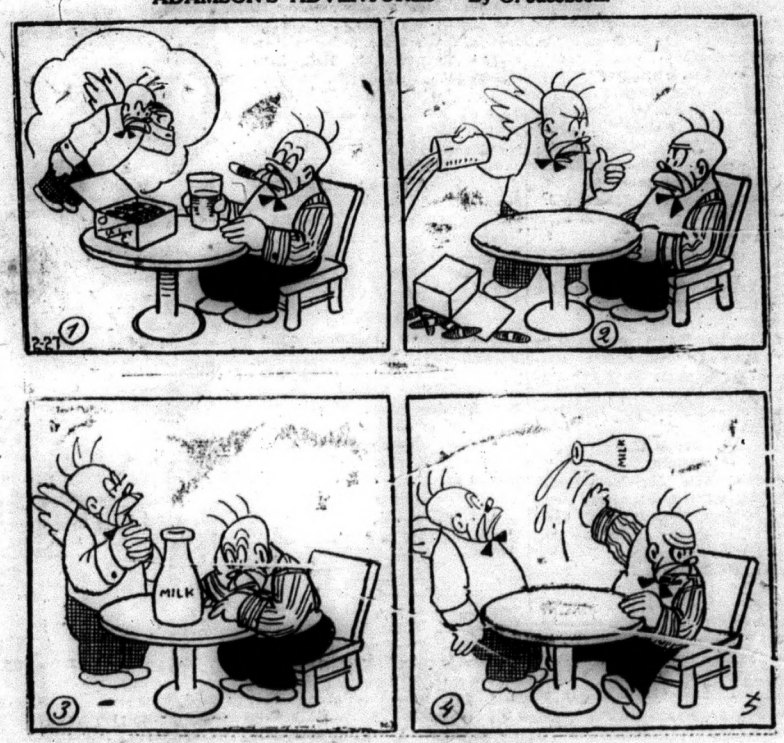
Canadian Rockies

The Canadian Rocky mountains consist geologically of the upturned edges of the strata underlying the Central Plain of North America.

"Nurse: "He seems to be wandering in his mind.' Patient's Wife: "Oh, well, he can't stray far!"

"What do the three balls in front of a pawn shop mean?" "Two to one you won't get it back."

"ADAMSON'S ADVENTURES"—By O. Jacobson.



Removing An Obstacle.

Dept. of Health Issues Timely Book

Co-operating With Canadian Social Hygiene Council to Stamp Out Serious Menace

NEW DEPARTURE

Ottawa, Ont.—Between two and three years' study is represented in a new publication dealing with the diagnosis and treatment of venereal diseases, which is being issued by the Federal Department of Health and will be sent to every doctor in the Dominion.

Compiled by the Canadian Social Hygiene Council under the supervision of its national medical committee, it is a compendium of the most recent scientific information on the subject and, since it is generally considered as the most up-to-date treatise available dealing with this type of disease, is expected to attract almost world-wide attention among members of the medical profession.

The policy of the Federal Department in supplying it to every practising physician throughout the Dominion also marks a new departure in health methods. It not only means that every doctor will be put in possession of the most modern and accurate information regarding the means of coping with this scourge but the announcement is also made that further information on methods of treatment may be expected from time to time, as these are brought to light.

These diseases, as a class, are by far the most deadly with which science has to battle. Directly and indirectly, they are the cause of more death and suffering than tuberculosis or any single type of disease. To some extent, this has been due, in the past, to a general tendency to avoid mention of them and, from a peculiar sense of false modesty, to let them run their course without drawing public attention to their highly fatal results and the terrific injury they have been doing to the race as a whole.

As a result, for instance, they have been allowed to continue from generation to generation causing blindness, deafness and feeble-mindedness until they had imposed a huge economic burden on the world. It was discovered, for example, that 30 per cent. of blindness among infants could be traced directly to the presence of these hitherto hidden diseases.

Of recent years, however, Canada has been setting an example to the rest of the world in its methods of striking at this worst of all disease-killers.

When the Federal Government, for the fiert time, co-operated with the provinces in public health efforts, it was in a campaign to control venereal diseases. Since that time, clinics have been established from coast to coast and Canadian public health authorities have made enormous strides. There has been a very noticeable and very natable reduction in the ravages of this disease throughout the Dominion.

Coupled with the clinical methods of combatting it, there has been an intensive campaign, carried on by the Canadian Social Hygiene Council.

Now this further effort, by which medical men throughout Canada are being supplied with the most scientific data known is a further example of the progressive methods by which Canada has been endeavoring to suppress the venereal disease menace.

The Electric Rat

Electrical rat racing for terrier dogs is London't newest sport, and it is to be started at the Stadium Club, High Holborn, shortly.

The following letter, sent to members by Mr. Fred Howard, managing director of the club, explains how the sport is to be carried on:

"This is a preliminary notice of a new and very interesting feature of the club's activities which will be introduced to members in February.

"Having regard to the widespread interest evinced in greyhound racing the management have perfected arrangements for providing terrier dog racing in the club itself.

"The dogs will race after an electrically controlled rat on a track which will be removable and will, therefore, not interfere in any way with the normal business of the club.

"There will be three days' racing each week, and six races on each evening, with first and second prizes for the owners of the dogs placed in that order.

"A British electrical Pari-Mutuel will be used in conjunction with the races, this being the first machine of its kind to be seen in Europe."

The master of the house was hungry at breakfast, and swallowed a good part of his bacon before he tasted it. Then he took time to test violently to his wife against the flavor of the food. His wife offered no apology, but rang for the maid. When the latter appeared, the lady was asked a question that was intended to soothe her husband's calculated to soothe her husband. "Maggie,' she inquired, serenely, 'what did you do with the bacon you poisoned for the rats?"

Canary Breeding

To the beginner I would say let fancy aristocrats alone; start with their humble cousins. You will stand a greater chance of success by so doing, for plainer birds are hardier and more prolific than their pedigreed relatives. Get all the information you can on the subject, but remember that experience will be your best teacher. You will undoubtedly make many mistakes and suffer many heart-breaking disappointments, but all the time you will be learning. Perhaps the first year you will raise only three or four birds, but don't become discouraged. Remember the birds you didn't raise were traded for experience, so they are not a total loss after all.

By observation and patience you will slowly but surely grasp those many fundamentals that experience alone can bring forth and that point to success.

Canaries breed practically any time of the year with proper environment and handling, but the regular breeding season runs from February up until July. The easiest and the most profitable way for the beginner to raise birds is to mate one male with three females. Get as large a cage as you can. A cage the size of an orange or lemon-box is about the right size. Always put your male in the breeding cage a week or so before the females. You will find that by so doing there will be less fighting and you will obtain quicker and better results.

After your birds have been together long enough to become acquainted, start placing an occasional piece of cotton in the cage. If they pick it up and carry it around, you will then know that it is time to give them material to construct a nest. I would suggest that you construct the first few nests for the birds.

Use medium-weight cardboard and make your nest about four inches square and two inches deep. Fill it about level-full of cotton, making a depression in the center. Now take a square piece of cloth of the correct size and lay it on top of the cotton; after fitting it to the nest sew it to all four sides.

When the sides are fastened, make one stitch through the center of the nest and tie at the boom. All ends must be securely tied and all edges of the cloth must be carefully covered with short stitches, for if one little weakness is exposed, the birds will be quick to take advantage of it and pick the nest to pieces.

The depression in the center is to keep the eggs together. If left to her own initiative, the bird is likely to construct a nest of such proportions that it will be physically impossible for her to cover all the eggs, and the eggs will sooner or later become chilled and thus fail to hatch.

Many strange phases of wild life confront us in handling our canaries. Freakish and unexplainable twists of their eccentric temperament are often displayed in ways that are both puzzling and humorous. For example, one would naturally assume that three nests would be enough in a pen containing a male and three females, but the experienced breeder always puts in an extra nest. If there are only three nests in the cage, two hens will invariably choose the same one and if left to themselves they will both lay in that nest and fight each other for the privilege or honor, of sitting there.

In all my experience I have never seen any exceptions to this rule. If the nest is not large enough for both birds, one will park herself on the edge and will maintain her position in thes ame earnest manner as the one hovering the eggs.

When the hen in possession leaves for food the watchful, waiting mother-to-be immediately jumps into the nest and very proudly takes up the duties. When the first hen returns she will park herself on the edge of the nest —and so it continues. Having the fourth nest in the cage eliminates that condition. When the birds have settled down to housekeeping the fourth nest can safely be removed.

When your birds start to build their nests it is well to pulverize some old plaster and sprinkle it over the bottom of the cage every day. Crushed egg-shells also are good. These measures will prevent soft-shelled eggs. A little boiled egg should be given your birds every other day at this time. Keep seed, gravel, cuttle-bone and fresh water before them at all times. Now is the time that your birds must be left to themselves. Don't go around them any more than is absolutely necessary. Don't allow strangers around them, and above all, keep the cats and dogs away.

Birds are very eccentric and very observing. Make a sudden or unusual movement before their cage and they will be suspicious of you the rest of the day.

A nervous person will never have much success raising canaries. An old lady called on me one day and wanted to know my secret of raising birds. She informed me that she had been trying for three consecutive years and had not one bird of her own raising to show for her time and trouble.

I visited her home and entered the room where her birds were kept. She opened the door with a quick movement and almost rushed into the room. Instantly her birds ceased singing and began to fly wildly around their cages as if a cat had jumped into their midst and was threatening their very lives. They seemed to regard her more as an enemy than friend, and went into a flutter when she even approached their cages. I gave her a kindly warning and later traded her some old, motherly females for some of her demoralized stock. That year she raised quite a number of birds. But as her temperament does not fit her for the vocation, she will always be handicapped in that particular line of endeavor.

Canaries lay their eggs in the early morning and with rare exceptions start sitting just as soon as the first egg appears. They lay from three to seven eggs for a sitting; four eggs are about the average and this number is more desirable than a larger sitting.

Use Minard's Liniment for Corns.

Red Rose Orange Pekoe has earned the patronage and good will of more tea drinkers than any other high-quality tea in Canada. Judges of good tea gladly give more for Red Rose Orange Pekoe because they know that the value they receive is worth many times the few extra cents they pay. 1-E

The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhea; or need to aid sound, natural sleep.

Just one warning: it is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

Children Cry for

CASTORIA

RHEUMATIC PEOPLE CAN OBTAIN RELIEF

By Enriching Their Blood With Dr. Williams' Pink Pills.

Rheumatism is a disorder of the blood. It attacks people when the blood is thin and impure, thus setting up inflammation of the muscles and joints. Wet or cold weather may start the pains of rheumatism, but is not the cause. The cause is in the blood. Hot applications or rubbing with liniments may ease the pain, but do not reach the cause and the pains are soon back again. To get rid of this most painful trouble you must treat it through the blood and for this purpose nothing else can equal Dr. Williams' Pink Pills, which from first dose to last actually make new, rich blood, thus driving the rheumatic poisons from the system. Mr. Henry E. Amiro, Lower East Pubnico, N.S., tells what these pills did for him. He says:—"I had an attack of acute rheumatism so bad that I could not walk a hundred yards without so much suffering that I would feel faint. I could not do the least work and any movement caused great pain. I was under the care of a doctor but did not improve much. Then reading of a similar case in a newspaper I decided to try Dr. Williams' Pink Pills. By the time I had used three boxes, there was no doubt they were helping me. I took altogether about a dozen boxes when I was entirely relieved of the trouble, able to walk four miles to my work, chop wood all day, and then walk home again. To anyone suffering from rheumatism I can strongly recommend Dr. Williams' Pink Pills."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Sun's New Rival

Paris, Voltaire's City of Light, boasts today the most powerful flash-light lamp in the world. Its light, generated by electric current, is equal to 1,400 million candles. When we consider that 1,400 million ordinary candles, put end to end, would extend eight to ten times round the earth, and almost far enough to reach the moon, we realize how far man has travelled as light-maker since the days of the first tallow candle.

Even if mediæval man had been able to manufacture 1,400 million candles, and put them in 1,400 million candlesticks, the whole population of the world could not have set them alight; to-day a single man moves a switch, there is a maelstrom in the ether, and the light of 1,400 million candles bursts into flame.

So powerful is the lamp in Paris that from the top of the Eiffel Tower it would be visible for hundreds of miles; and if the Eiffel Tower were twice as high a man with field-glasses at Vienna would be able to see it quite clearly. The heat in the centre of the electric flame which radiates the light reaches 6,500 degrees Centigrade. That is to say, it equals the heat at the surface of the sun!

"Canada For Me."

Here we have an English lad who came across story-book thrills in the Canadian West. He is Richard Barnes, of Kent, later cowboy of the 2XY ranch in Alberta.

He went broke, was hired on the ranch, was shot for criticizing a shady poker play, was subsequently deported from the U.S.A. because he lacked entry papers, was burnt out in a Windsor, Ont., hotel, walked on foot to Montreal dressed in cowboy outfit, and from there embarked with nine cents in his pocket for England on the Cunarder Ascania. "A great life!" he declared, and promised to acquire an English wife and to settle in Canada this summer.

The Two Races

Ottawa Droit (Lib.): Canada is a British Dominion, it is true, but a Dominion where the two races—English and French—live an a footing of equality. In consequence the French element of the population has every right to demand from the Government the same advantages for French immigrants as are granted to British settlers.

German Crisis Again Averted By Hindenburg

Principal Parties in Reichstag Bow to President's Demand to Pass Budget and Emergency Program

Dawes Annuities Assured

Berlin.—President von Hindenburg, by exercising once more his immense personal authority in a political crisis, succeeded recently in bringing order out of chaos. As a result of his second letter within a week to the ministers demanding passage of the budget and certain other pressing legislation before the Reichstag is dissolved, all the principal parties agreed this afternoon to accept the Cabinet's emergency program.

This assures that the 1928 budget, providing for the payment of the Dawes plan, annuities for the first so-called standard years by Germany will be adopted before the election campaign begins. Under the arrangements accepted by all the major parties the Reichstag will be kept at work until April 1 and the Parliamentary elections will be held some time in May.

Radicals Only Opponents.

This plan was adopted by all the parties except those representing the "lunatic fringe—the Communists and Fascists. The program was adopted under the pressure of President von Hindenburg's letter because no party dared to say "No" out loud to the President. It speaks volumes for Marshal von Hindenburg's impartiality, that in the present case he is acting directly counter to the clamor of the Conservatives—the very men who elected him to his exalted office.

The opposition parties, while agreeing to co-operate in winding up the Parliamentary business and to refrain from making partisan motions, reserved the right to criticize and vote against the budget, for the creation of which they had no responsibility.

WHY TORTURE THE LITTLE ONES

Mothers, do you think it fair to torture your little ones by forcing them to take ill-tasting oils when they need a laxative medicine? Don't you find that the child's dread of these medicines often do more harm than good?

Baby's Own Tablets are the modern substitute for these nauseous doses. They are the very medicine the child requires and are so pleasant to take that they are as easy to administer as a glass of water They are the perfect remedy for all the minor ailments of little ones, being absolutely guaranteed free from injurious drugs.

Baby's Own Tablets accomplish all that castor oil and other bad-tasting remedies can do. In fact they accomplish more as they do not leave the child exhausted from its struggle against taking medicine. They relieve teething pains, banish indigestion and constipation, break up colds and simple fevers and promote healthful, refreshing sleep. They are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Communists Fight Each Other

According to reports in the Volkswille of Suhl, Thuringia, an organ of the left wing Opposition in the German Communist Party, the official Communists are using violent methods to "convert" their former comrades. In one instance a demonstration by the Opposition was attacked and one of its organizers beaten insensible with a hammer. In Hamburg three detachments of the regular Communist Front Fighters raided a meeting of the Opposition and stormed the platform, clearing a way by vigorous use of rubber clubs, brass knuckles and knives. In Dortmund, on the other hand, Herr Thaelmann, a well-known Communist chief, had to flee from a meeting in order to escape a beating at the hands of the Opposition.

Five Pupils Form Four Classes

Lochgair, Scotland. — This little Highland village claims that the school here is attended by fewer pupils than any other in Scotland, if not in Great Britain. There are only five names on the register, but as the children are of different ages the teacher has to teach them separately and make four classes.

RED ROSE TEA "is good tea"
Red Rose Orange Pekoe is the best tea you can buy
11 *In clean, bright Aluminum*

Parsons and Their Sons

Black sheep come more often from the parsonage than from other homes, it has long popularly been believed; but refutation of this baseless charge, notes The Christian Observer (Presbyterian), has been made many times, particularly by reports found in 'Who's Who in America." A careful investigation reveals that a large percentage of ministers whose names have been recorded in that book of notteworthy names followed in the footsteps of their fathers. Now comes the Clergymen's Committtee of the American Engenics Society with its results of a canvass of 100 leading ministers in America. As the report is summarized in The Christian Observer:

"Two-fifths of these stated that they themselves were the sons of ministers. Three others were sons of a local or lay preacher, and one had a Quaker preacher for a mother. Ten of those interviewed had grandfathers who were ministers and seven had great-grandfathers and three great-great-grandfathers in the ministry. One man reported an unbroken line of Presbyterian ancestors running back to the seventeenth century, and another a similar line of Moravian ministers beginning in 1740. Thirty-eight were sons of church officers and only eighteen of the hundred were sons of men who were neither ministers nor church officers.

"Th fact that two-fifths of the hundred ministers are sons of ministers indicates that the preacher's son who adopts his father's profession does so with full knowledge of what it means to devote his life to the work of the ministry. The committee reaches the conviction that the future church leaders in America must come from church families, and that church leaders produce church leaders. The list of one hundred ministers interviewed includes the most successful ministers in the American pulpit to-day."

Those who are familiar with the teachings of the Bible, comments this Louisville weekly, are not surprised at the tale told by this careful investigation. "God's promise is 'to you and to your children,' and thus God honors those who honor Him. The recruits for the ministry of the future may be expected to come from the families of those who are most faithful and sincere in their service to God an dtheir fellow men, either as ministers, officers, or workers in Christian churches."

On fishing trips take Minard's.

Prussian Churches Expensive

In an article in the Berlin Vorwarts discussing the budget of the Prussian State, a member of the Diet draws attention to the heavy cost of supporting the various religious denominations, because of the Diet's delay in taking the steps necessary to separate Church and State. This year's budget provides for an expenditure of 71,600,000 marks (worth 23.8 cents each) for Church purposes, without any allowance for the additional salaries to be paid to the clergy under the new law increasing the pay of State officials and employees. The complaining Deputy notes that the State is planning to spend only 52,000,000 marks in welfare work of all kinds, including the health service. He also refers to a budget deficit estimated at about 74,000,000 marks.

Mrs. Jones—"John, I have been talking for over two hours, and now I want your opinion on the subject." Mr. Jones—"Well—er—on what subject, my dear?"

YOUNG WOMEN SUFFER MOST

These Two Found Relief by Taking Lydia E. Pinkham's Vegetable Compound

Ayer's Cliff, Quebec. — "I have been teaching for three years, and at the end of the year I always feel tired and have no appetite. I was awful sick each month, too, having pains in my back until sometimes I was obliged to stop working. A friend recommended Lydia E. Pinkham's Vegetable Compound to me and I heard many women telling how good it was so I thought it would help me. And it did. Now I take six bottles every year and recommend it to others." — DONALDA FANTEUX, Ayer's Cliff, Quebec.

"Unable to Work"

Canning, Nova Scotia.—"I had irregular periods and great suffering at those times, the pains causing vomiting and fainting. I was teaching school and often for some hours I would be unable to attend to my work. Through an advertisement in the papers I knew of Lydia E. Pinkham's Vegetable Compound, and it has been of great benefit to me, the troubles being completely relieved." —LAURA J. EATON, Canning, King's County, Nova Scotia.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The correctitve is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of this harmless, tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

CANADIAN WOMEN OF NOTE AND THEIR WORK

(Continued from last week)

pital and also professor in the Ludhiana Women's Hospital. She was married in India to Professor John Patterson, of the University of Allahabad, India. She was decorated by the king for her excellent medical work in organizing the national resources to wipe out the bubonic plague.

She returned to Canada about 1910 and since has devoted her efforts to social reforms. A theme she never tires of discoursing is The power of Young Womanhood. She herself a progressive woman, a woman who took her medical degree at a time when that was still considered a daring thing to do is one of the first to point out that the most obscure girl, just because she is a woman, has within herself a power which, rightly used may be an influence for incalculable good in the community. "I believe a girl's value to her country is infinitely greater than even a boy's, she declares. A nation's greatness depends upon social conditions, health and home-life, all of which are absolutely in the hands of the women. Women set the social standards throughout the world and on the enlightenment and high ideals of the woman the moral standards of the nation depend. It has been truly said that no nation ever has or ever will rise above the level of its women.

She places the responsibility upon the shoulders of women rather than those of men. For instance she says in one of her leaflets, "Our boys will be moral, when our girls dress and live in a way that will help, not tempt the men and she quotes one of the greatest authorities in social work, who said, I believe the present mode of dress of the younger women is responsible for the downfall of more of our young men than all the other agencies combined." One could speak for ever so long about Dr. Patterson but I must hurry on, but she is one, surely, who with reason firm and temperate will, was made to warn, to comfort and command, and in this age, we must admit such kindly and frank admonitions as she has given expression to are sorely needed.

Janey Canuck or otherwise known as Judge Murphy, although born, educated and married in Ontario, her pioneer spirit makes her so completely a western woman. In 1904 she went west with her husband, Rev. Arthur Murphy, well known to her readers as Padre, and her home is now in Edmonton, Alberta. Like many another woman who came west, Mrs. Murphy has found within herself an undreamed of capacity for meeting whatever circumstances arise. All up and down the open trails and the country roads we could call to the women as we pass and they would under write Mrs. Murphys' list of things she has done in the west, operated a furnace, a sewing machine, a foreign hired girl, a typewriter, an organ, timber limits, a church bell, farms, coal mine, a ford car. Then she has preached sermons, marketed grain, planted gardens, cooked thousands of dinners, painted pictures, broken bronchos, killed hens, survived a real estate boom and four major operations and has lost track of the number of times that she has been lost while exploring a forest. So we realize that she is a living illustration of the theory which says that a woman who has successfully coped with the task of making a home and bringing up children (Mrs. Murphys' two best pals are her daughters) has been through a school of experience that makes almost any other administrative job seem quite simple. She is blessed with the gift of humour and keen observation. She has been able to do splendid work as a police magistrate and juvenile court judge. Mrs. Murphy was the first Dominion President of the Women's Institute when the provincial organization formed a federal organization. Author, magistrate, home-maker, traveller and ever so many other occupations and vocations have combined to fill out the tale of a life packed full of interest and growth, and since life to a great extent is what we make it, it is interesting to hear some of the Philosophy of Janey Canuck herself. She preaches a little sermon to all of us for we need to take life genially and to let pleasures come to us. "As years go by," says Mrs. Murphy, "I am learning to take every day for a holiday, any woman can do so if she knows how and keeps on practising." Little birds everywhere are whispering that Judge Murphy may some day 'ere long become Senator Murphy. We have only one comment to make in regard to this rumour and that is that if Mrs. Murphy goes to Ottawa the old jokes about the somnolent state of the Chamber will have to be revised. The senate will be a very lively place if Janey Canuck breezes in from the west.

Dr. Helen MacMurchy, a social worker, was born, educated and still resides in Toronto. She has held many, many prominent positions. Assistant Mistress, Toronto Collegiate Institute, Resident Medical Assistant, Toronto General Hospital 1901, general practise 1901—1913. Medical Inspector, Toronto Public Schools 1910, Lecturer in Medicine Women's Medical College, Toronto, Appointed to prepare reports on Feeble minded in Ontario for the Provincial Government, 1906, Assistant inspector of Prisons and public Charities 1913, Editor of Canadian Nurse 1905—1910 and many many other positions all ably filled.

Dr. Mackellar, a missionary in India, was decorated by the king. Lady Drummond distinguished for splendid service during the war.

Miss Agnes McPhaill, Canada's only woman member of Parliament at Ottawa.

Mary Pickford, actress, born in Toronto, as plain Gladys Smith.

Margaret Anglin, actress, was born in the Canadian parliament buildings at Ottawa during her fathers' term as speaker of the House of Commons in 1876. The whole world adopted Mme Albani, prima donna, but she was born a little snow princess at Chambly near Montreal on Nov. 1, 1852. Her name was Emma Lajeunesse and her father, a French Canadian, was a man with music in his soul, who played the organ, violin, harp and piano.

In conclusion I wish to pay a tribute to the inarticulate greatness of thousands of women in every day walks of life as—the farm woman, the labourers' wife, the cheerful efficient domestic worker, the widow, who raises her family, the rural teacher, the urban teacher, the minister's wife, the grown daughter who eases the responsibility of her mothers' tired shoulders, the labouring woman, the professional woman, the business woman, the informed citizeness, who realizes her responsibility. All these have added their bit of greatness in the Canadian Hall of fame.

EXAMINATION TIME TABLE

The Department of Education has issued the time-table for departmental examinations throughout the province this year, first of which begins on Monday, June 18, and the last on Tuesday, July 3. Following is the schedule.

High School entrance—June 25, English Grammar, Writing and History; June 26, English Composition, Spelling and English Literature; June 27, Arithmetic and Geography June 28, French Grammar, French Spelling and French Composition; June 29, French Literature.

English-French Model Entrance—June 27, English Composition, English Spelling and English Grammar; June 28, French Grammar and Geography; June 29, Arithmetic and French Composition.

Lower School—June 22, Agriculture, first and second year; June 25, Physiography, English Grammar and Latin Grammar; June 26, Arithmetic and History; June 27, Art and Zoology; June 28, French Grammar, Botany and Geography.

Middle School—June 18, Literature and Composition; 19th, Physics British History; 20th, Algebra, Ancient History and Music, 21st, French Authors, French Composition; 22nd, Geometry and Chemistry; 25th, Latin Authors, Latin Composition 26th, French Literature, Arithmetic, French Composition; 27th, Agriculture, First and second year; 28th, German Authors, German Composition; 29th, Span Authors, Spanish Composition; July 3rd, Greek Authors, Greek Accidence.

Upper School—June 18, Literature and Composition; 19th, Problems, History; 20th, Algebra; 21st French Authors, French Composition; 22nd, Geometry, Chemistry; 25th, Latin Authors, Latin Composition; 26th, Zoology, Physics, 27th, Trigonometry, Botany; 28th, German Authors, German Composition 29th, Spanish Authors, Spanish Composition; July 3, Greek Authors, Greek Composition.

SCOTCH SETTLEMENT

Mrs. S. Wickens, of White Lake, spent a day last week with Mrs. W. Wickens.

Mr. Harry Woods returned home on Saturday after spending the winter in Oshawa.

Mrs. Edwin Gates visited Mrs. Herb Keller on Thursday afternoon.

The regular meeting of the L. O. B. A. was held on Tuesday afternoon at White Lake with a good attendance.

Miss L. Wickens, of New York also Miss Mabel, of Toronto, visited at the home of their brother, Mr Wesley Wickens last week.

Sorry to report Mr. S. Kernohan on the sick list.

QUEENSBORO

Mrs. Harry Delyea and Mrs. Jno. O'Rorke spent a couple of days recently with Mr. and Mrs. Bateman, Eldorado.

Mrs. John Alexander, Sr. spent a few days in Tweed last week.

Mrs. H. Rollins, Jr., and little son spent last week with her parents, Mr. and Mrs. Cox.

Miss Evelyn Phillips was a guest of her sister, Mrs. Jas. Groves, during the week.

TRINITY UNITED CHURCH

Minister, Rev. G. W. Rivers

Sunday, March 18

10 a.m., Sunday School and Bible classes.

11 a.m., Morning Worship, Subject. "The Tyranny of Type" or "Should we all be Alike?"

7 p.m., Song Service and Evening Worship, Subject "The First Great Question Asked by Pilate" This is the first of a series of 3 sermons leading up to Passion Week.

All are cordially invited to attend these services.

CROSS & CO'S

CROOKSTON

A number of the farmers are busily engaged drawing logs to Crookston before the snow goes.

Mr. and Mrs. Oscar Storring and children, of Madoc, have moved to Crookston.

Mr. and Mrs. Clayton Tummon spent Sunday evening with Mr. and Mrs. W. J. French.

Miss Margaret Wood visited her sister at West Huntingdon recently.

Mrs. Alex Wood was the guest of Mrs. A. Carson last week.

Little John Blair, who has been quite ill, is improving.

Misses Olive and Grace Blue spent the week-end at their home.

The Crookston friends of Mr. E. A. Forward, of Montreal, were indeed pleased to see his picture in a Belleville paper recently, he having addressed a large meeting in Chicago, on the development of the industries of the North Shore of the St. Lawrence River.

Mr. Wm. MacMillan, who has been employed in Crookston, intends moving his family here shortly.

A number of Crookston people attended the "Eastern Star" At Home on Monday night, in Madoc.

The many friends and neighbors of Mr. and Mrs. M. J. Mahoney are indeed sorry to lose them. They leave on Tuesday to take up residence in Toronto. An auction sale of household effects was held on Saturday and was largely attended. Billie, too, will be greatly missed by the school pupils among whom he was a general favourite.

COOPER

Mrs. Hugh Blair was completely taken by surprise on March 12th when a number of friends and neighbors called to spend a short time with her in honor of her 81st birthday and only for the loss of her eyesight is real smart and does her own work and would put to shame many who have good eyesight. She received a number of remembrances. Ladies served lunch. They sang Blest be the tie that Binds and all left with the feeling that we should remember our older people more than we do.

Mr. and Mrs. Jack Brethoure are visiting at her father's, Mr. John Canniff.

Miss Dora Young is leaving for Kingston where she will have an operation for appendicitis. We hope it will be successful.

We are sorry to hear Mrs. Robt. Rollins is not so well.

Mr. and Mrs. Brethoure, Miss Vera Canniff and her father spent Sunday after-noon at the home of Mr. Wm. Young.

The hydro men are moving out to Cooper this week.

Mr. and Mrs. Arthur Wyatt, Mr. and Mrs. Erwin spent Sunday with their mother, Mrs. Geo. Holmes.

Miss Sadie Bird, Bannockburn, is visiting friends in Cooper.

Mr. James Long is on the sick list again.

Little Miss Fay Rollins, daughter of Mr. and Mrs. James Rollins, has been quite sick. We hope she will soon be better.

OBITUARY

GEORGE HUFFMAN

George Huffman, a well-known resident of this village and district, passed away at his late residence, Prince Albert street, Madoc, on Sunday morning, March 18th, at the age of 69 years and 7 months.

The deceased had only been ill a short time. Two weeks ago he fell in Trinity United Church and injured his foot but this was rapidly healing. On Tuesday pneumonia set in and, his heart being weak, death came on Sunday.

The late Mr. Huffman was born in Madoc Township on the farm now occupied by his son, Wesley, which has been in the family for four generations. He was the son of the late John Wesley Huffman and Isabel Bradshaw. Nearly all his life was spent on the farm until he moved to Madoc in 1915.

In 1884 he was married to Helen Brown, of Madoc Village, who survives him.

The news of his death came as a great shock to his many friends in the community. His kindly smile and friendly greeting will be missed for he had a greeting for everyone he met. He was a member of Trinity United Church and took a great interest in church work.

He leaves to mourn his loss besides his widow, one son, Wesley, of Madoc Township, two daughters, Mrs. Frank Bouck, of North Bay, and Mrs. R. P. Wellman, of Madoc, also three sisters, Mrs. I. McCarthy, and Mrs. G. Gray, of Peterboro, and Mrs. F. Davis, of Melrose.

The floral tributes were very beautiful. They were as follows.—Trinity Church, wreath; S. School wreath; Ladies' Aid, spray; Adult Bible Class, spray; Y.P. Soc., spray; Mr. and Mrs. G. Gray and Mr. and Mrs. F. Davis, wreath; Mrs. McCauley and Mr. and Mrs. Morton, wreath; Mr. and Mrs. Richmond and daughters, spray; Mr. and Mrs. J. Burnside and Mr. and Mrs. Sayers, spray; Oakdale Rebekah Lodge, spray; Mr. and Mrs. B. Sayers, spray; Mr. and Mrs. W. McMechan, Sr., and James, wreath; Mrs. John Huffman, son and daughter, wreath; wife and family, gates ajar; Mr. and Mrs. W. Kelly and Mr. and Mrs. Tufts, pillow.

The funeral was held at Trinity United Church on Tuesday, March 20th, at 2.30 p. m. where the service was conducted by Rev. G. W. Rivers, who took for his text, Acts 21, 38:—"Sorrowing most of all for the words which he spake, that they should see his face no more," and who spoke comforting words for the bereaved ones. Mr. Gay, of Foxboro, sang an appropriate solo. Interment was made in Lakeview cemetery, where deceased rests beside his parents.

The following out-of-town relatives were present at the funeral:—Mrs. and Mrs. Goldie Gray, Mrs. I. McCarthy, Mr. and Mrs. H. Morton, of Peterboro; Mr. and Mrs. Fred Davis, Melrose; Mr. and Mrs. Frank Bouck, North Bay; Mr. and Mrs. Harry Coulter, Smithfield; Mr. and Mrs. Robt. Armstrong, Colborne; Mrs. S. Remington, Mr. and Mrs. B. Belshaw, Mr. Roy Belshaw, Mr. and Mrs. Ed. Pyear, Mr. Arthur Pyear, Mrs. Arthur Brown, Mr. and Miss Bradshaw, of Stirling; Mr. and Mrs. A. Reid, Mr. Nelson Jones, Miss Hazel Huffman, Mr. Allan Huffman, of Belleville; Mrs. John Huffman, Markham; Mrs. Johnston, of Toronto; Mr. and Mrs. Earl Sayers, of Holloway.

Card of Thanks

Mrs. George Huffman and family wish to thank their many friends and neighbors for the many acts of kindness and expressions of sympathy, and also for floral tributes in their recent bereavement with the death of their husband and father.

Crowded Out

Owing to the publishing of the village auditors' report this week, several articles of interest have been left over until next week, including the report of the presentation to the high school hockey team.

IN MEMORIAM

In loving memory of our darling father, John Donald Blue, of Crookston, who passed to the Great Beyond March 22nd, 1927.

Father, beloved, father, how soon
should we cease to weep,
Could we look through the golden
portals,
Whose keys the angels keep,
But Love, our Love, that is deathless,
Can follow you, where you roam,
Through the gardens of God, in
that beautiful city of Home.

Loved, remembered, longed-for, always, by his daughters, Gladys, Bernice, Olive, and Grace.

In loving memory of my dear husband, John D. Blue, of Crookston, who died in Kingston General Hospital, March 22nd, 1927

In memory, a daily thought,
In heart, a silent sorrow.

Wife.

EASTER THIS YEAR

Easter this year falls on April 8th. The greatest of Christian festivals comes on the day exactly midway in the thirty-five days from March 22nd to April 25th on any Sunday in which it can possibly occur. The latest previous year of this coincidence was 1917. Previous to 1917 this synchronism did not occur in fifty-seven years; as the calendar stands it will not again befall until 2007. Perhaps the calendar will have been reformed by that time; "Old Style" will refer to the Georgian system, not to the Julian system, as it now does Some nations may confidently be expected to hold out against any change as Great Britain did two centuries ago and Russia did down to our own time.—Exchange.

VIMY BALL AT PICTON

Invitations are now out for the Vimy Ball in Picton Armories on Easter Monday, April 9th, under the auspices of the officers of C. Company Hastings and Prince Edward Regiment. They have been fortunate in securing as an orchestra Harold Rich-Morris London Versatile Canadians who play regularly at the Palais Royale, Toronto, and who are broadcast over C.F.C.A.—Canada's premier dance organization. Invitations may be secured from Lieut. T. Rupert, Madoc, Ont.

DEER SEEN IN MADOC VILLAGE

Two large deer and a fawn made their way to Madoc Village, on Sunday last. Dogs took up the scent and put the fawn into the creek while the older ones disappeared. Later the fawn was found dead in Mr. R. Wickhams barn yard, apparently it had died from exhaustion.

Although deer have been seen in this locality several times, this is their first appearance in the village in a number of years.

TWEED PUBLISHER DEAD

Samuel Way, proprietor and publisher, of the Tweed Advocate and owner of a foundry in that village passed away in Toronto, as a result of an attack of appendicitis.

HAD RIBS BROKEN

Mr. James Hill had several ribs broken, on Friday last, when he fell on a fork handle, while at work at his barn.

Died

REEVES.—In Madoc Village, on Wednesday, March 21st, 1928, John Reeves, aged 70 years.

Mr. David Laundry, an aged resident of Elzevir township, passed away at his home on Saturday, March 3rd. Mr. Laundry had reached the advanced age of eighty-five years. He is survived by two daughters Mrs. J. York, of Elzevir, and Mrs. Marchen, of Trenton, and one son, David, on the homestead. The funeral took place on Tuesday and was in charge of Rev. A. D. Waite.—Tweed Advocate.

LOCAL AND PERSONAL

Dr. Alexander, of Bancroft, was in town on Thursday last.

Today, Wednesday, March 21st, is the first day of spring.

Mrs. (Dr. Alexander, of Bancroft, is a guest at the home of her sister, Mrs. A. Kincaid.

Messrs. Robert and Albert Woods are attending the Grand Orange Lodge in Lindsay, this week.

Mr. Frank Pringle, of Melrose, attended the funeral of the late Mr. Huffman in Madoc on Tuesday.

Mrs. John Ackerman and Mrs. O'Connor, of Campbellford, are visiting at the home of Mrs. P. McCoy.

Mrs. D. Brown, who has been spending the winter in New York, has returned to her home in town.

—Big Display of Dresses, Coats, Chokers, etc. on display at McIntosh Bros. on March 28th and 29th. Don't forget these dates, 2 days only.

Mr. and Mrs. S. J. Phillips, of Peterboro, were in town on Tuesday attending the funeral of late Mr. Huffman.

—The Madoc Women's Institute will hold a meeting at the home of Mrs. Duncan Brown, on Friday, 30th, at 3 p.m. All interested are invited. 12-2

Mr. and Mrs. Chas. Conley, Jr., are spending a week in Lindsay, where Mr. Conley is attending Grand Orange Lodge.

Mr. Robert McGhee attended the funeral of his brother, the late Ralph McGhee, in Bancroft last week.

RURAL MAIL COURIERS APPEAL

The usual representations are being made to Parliament at this session in regard to the method of providing for rural mail delivery, and the Government is being asked to scrap the contract system and appoint rural mail carries on salaries. There is a great deal to be said in favor of a change. The present system is decidely unsatisfactory in that there is no assurance that the job will be permanent; a contractor who has done good work for three years may find himself under-bid at the end of the term and somebody else gets the contract and he is left holding the bag. It would seem that the service would be improved and greater satisfaction created were a staff of rural mail carriers appointed, who would be paid a reasonable salary for the work to be done, and be given the assurance that their services would be retained so long as their duties were satisfactorily performed. It is to be hoped the question will receive the earnest consideration of the Government.

COMING EVENTS

MADOC AGRICULTURAL SOCIETY are putting on a Dance in the Armouries on Easter Monday. Keep the date open. 11-2

OAKDALE REBEKAH LODGE will hold a Euchre on Friday, March 30th, in I. O. O. F. Hall. Rebekahs come and bring your friends. Admission 25c 10-3

Order from Cranston. Only c... The best. Cranston's Farm, Stirling, Ont.

Strange Island in Indian Ocean Ruled by Fierce, Barkless Dogs

Juan de Nova, Situated Between East African Coast and Madagascar, Populated Entirely by Wild Packs Which Attack All Island Visitors

Cape Town—A French schooner which has arrived at Table Bay visited a strange island of dogs during her voyage.

"We were steaming northward between the East African coast and Madagascar," said the captain. "Dark against a pink skyline at dawn I saw through by binoculars the outline of a ship.

"No smoke came from her funnel, no white wave broke about her bows. She did not lift to the long Indian Ocean swell. When full daylight came Irealized that she was a wreck, fast on the coral reefs of little Juan de Nova Island.'

"Juan de Nova is the island of dogs. There have been others—one in the Bosporus where all the hungry, scavenging dogs of Constantinople were marooned and left to starve. But on lonely, tropical Juan de Nova the dogs feed royally and rule the island.

"In the days of sail, bluff-bowed East Indiamen, Portuguese barques and pirates of all nations used to call at Juan de Nova for fresh water, fruit and turtles. Dogs of every breed, some from Europe, others from China, escaped on shore and were left behind. To-day their descendants form the strangest, wildest mongrel horde in the world.

"The dogs have the island to themselves. When a French steamer sent a boat's crew ashore for water a few years ago the men were attacked with such ferocity that they had to return for firearms before they could fill their casks."

Naturalists have noted two queer facts about the dogs of Juan de Nova —they droop their tails like wolves and they have lost their bark. On moonlight nights they may be heard calling wildly to each other; but when they returned to savagery they lost the bark of the ordinary dog.

Hunting in packs the dogs seem to have divided the island to their own satisfaction. One pack never invades the territory of another. They scratch in the sandy beaches for turtles' eggs, eat the turtles that crawl out of the sea occasionally and stalk sea-birds with the skill of jungle beasts. No one who has seen the dogs of Juan de Nova doubts that our household pets had their origin in the wild. These dogs are as fierce as any Siberian wolf.

For years they have remained unmolested in their island kingdom, among the cocoanut palms and bananas and mangoes. The island is a horseshoe of coral and there was a time when the pirates used to careen their wooden ships within its shelter. The canine inhabitants of Juan de Nova are almost as dangerous as the buccaneers of last century.

Thought Admiral Was a Seal, And so a Meal

Many a naval man has been mistaken for a sea lion and quite a few for social lions and others of the four-footed brethern, but Admiral Hugh Rodman can claim the distinction of being the only man—naval or otherwise—to have been mistaken for a female seal—and by a gray wolf too.

In his yarns of a Kentucky Admiral appearin in "Field and Stream Magazine," he relates the following incident which occurred on a cruise in Alaskan waters:

"In order to select a camp site and have it ready," he writes, "I went alone ahead of the party a distance of four or five miles.

"I had noted a number of female fur seals hauled up on the beach and, in observing their actions, noticed that they made a hollow booming sound by striking the hard sand with their flippers. Whether or not it was the breeding season I do not know; but the noise seemed to attract the bull seals, who would assemble in the water near the females, from three to five strong, and give vent to their feelings by barking or bellowing.

"I arrived at my destination and was tired. I had on clothes which slightly simulated the color of the hair seals as I lay at full length on the sand. Without any real expectation of decoying the bull, I struck the hollowed palms of my hands together in an attempt to imitate the sound made by the females.

"To my surprise, several bulls took notice and came abreast of me in the water, but showed suspicion and did not attempt to land. I realized this, and to give them a surprise and scare I suddenly jumped up and yelled at the top of my voice.

"If they were surprised, far more so was I, for a gray wolf had been stalking me and was within ten to fifteen yards of me when I jumped, apparently at the phychological moment. Under the conditions, he had possibly mistaken me for a seal, on which the wolves feed, and it might have been serious had he attacked while I was lying down. The intervening open space between the sea and the timber was, say, a couple of hundred yards. I estimated that in spite of his excessive speed he must have touched the sand at least a couple of times in his wild flight for cover when he realized the true state of affairs."

"Come over here and meet Mr. Theophilus Harrington, the great Russian expert," said Mrs. Johnston. 'What is a Russian expert?" asked Mrs. Grownlow. "You know, he went to Russia, and came back alive," explained her friend.

Too Many Teeth Pulled

Too many teeth are extracted without clinical or pathologic justification, asserts an editorial writer in The Journal of the American Medical Association (Chicago). Two opposing conditions, he says, are constantly present: First, all infection in the mouth must be eradicated; second, teeth should not be extracted if the infecttion can be otherwise eliminated. He goes on:

"Discussion of the relationship of tooth infection to certain systemic disease sis, of course, no longer necessary. It is self-evident that all sepsis and pathogenic foci in the mouth should be removed. Success in this field demands more frequent consultations between the dentist and the family physician. The physician The physician should not peremptorily order one or more teeth extracted, nor should the dentist extract the teeth of a person who is found by questioning to be under the care of a physician or in need of medical care, without consulting with the physician who has examined the patient. Too many instances are now on record (and probably the reported cases represent only a small minority of serious conditions following the extraction of teeth) of dental and medical thoughtlessness in the extraction of teeth in more or less serious conditions. Three instances of death following soon after the extraction of teeth were recently reported by Buckley. The removal of teeth is a surgical procedure, though generally a minor one, that requires preoperative cleanliness, skilled technique and, if there is infection and suppuration, careful and untiring post-operative care. A tooth should generally not be removed until a roentgengram has been taken and commented on by a skilled roentgenologist. The gums of a patient with pyorrhea should rarely, if ever, be punctured for the injection of procaine hydrochlorid or any other substance, as these punctures offer absorbing surfaces for the bacteria already in the mouth. The surgical treatment of a septic mouth after operation should be the same as that of any other part of the body that is septic. The necessary extracttion of septic teeth will not cause death, but the neglect of medica land surgical care of the patient associated with any surgical operation may do so."

A young man entered an inn with a dog and attracted a great deal of interest from an Irishman, who inquired what kind of a dog it was. The owner looked the questioner insolently up and down and then replied: "It's a cross between an ape and an Irishman." "Faith then we're both related to it," was the ready retort.

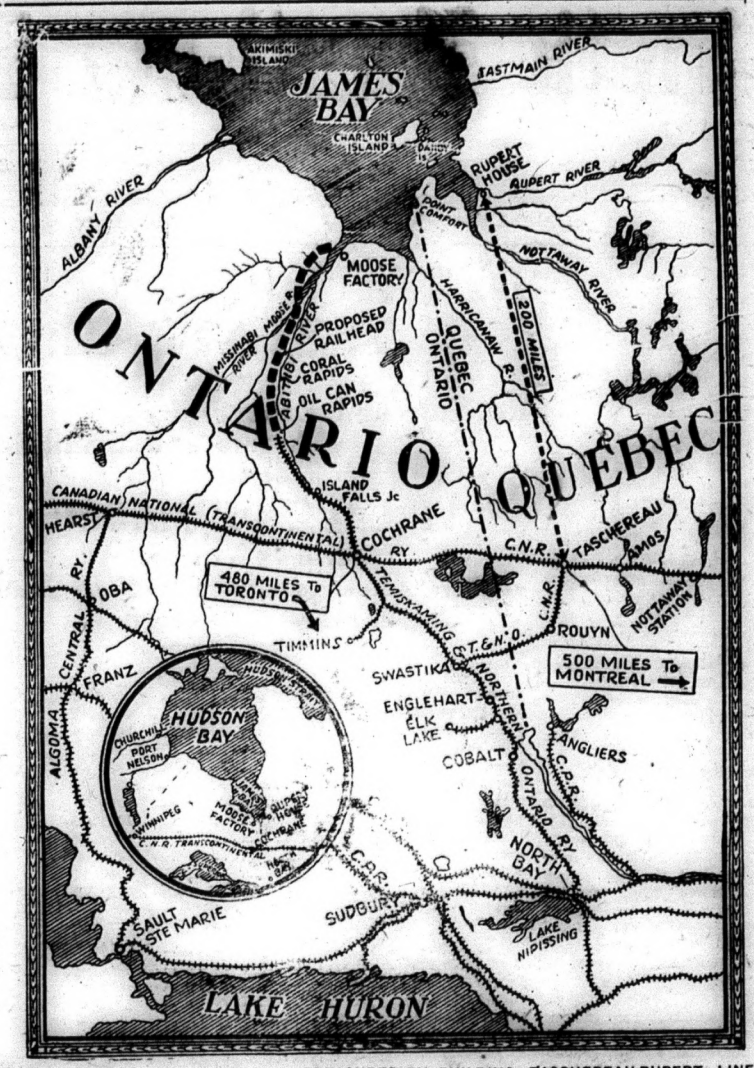
Three Provinces Have Chance to Dominate New North



MONTREAL COULD TAP HUDSON BAY TREASURES BY BUILDING TASCHEREAU-RUPERT LINE

The three provinces of Manitoba, Ontario and Quebec have an opportunity to win lordship over the vast empire tributary to Hudson and James Bay. Some time next summer the Hudson Bay Railway will reach salt water at Churchill and give Manitoba and the other western provinces access to the short sea-route to and from Europe. Ontario's provincially-owned Temiskaming and Northern Ontario Railway need only build about 125 miles more of railway to reach James Bay near Moose Factory. With this short span of steel it could bind to itself the vast and enormously rich empire in the new north, which has been exploited for centuries but whose true value is only now being realized. At present there is a rail traffic to Island Falls Junction, 43 miles north of Cochrane, although steel is laid for thirty miles farther north to Oil Can Rapids. The grade is constructed to Coral Rapids, about thirty miles farther north, and from there it is proposed to extend the work another twelve miles along the Abitibi river this summer. If Ontario should decide to push on to the bay, Montreal big business might conceivably counter by getting Quebec to build the 200 or 250 miles of road from Tachereau on the Canadian National Transcontinental to Rupert House, on James Bay. Somewhat similar action was taken when the T. and N. O. tried to penetrate the Rouyn field with a branch from Swastika, but was temporarily blocked by Quebec, which succeeded in getting the Canadian National to build from Tachereau into Rouyn in the endeavor to hold the copper-gold camp tributary to Quebec. After extended, litigation, Ontario won the right to push its railways into the Quebec field. The Canadian Pacific also has a line running up the east side of the Ottawa river to Angliers. At one time there were rumors that this also might be driven into Rouyn. The above map shows the territory discussed in the accompanying article. Also inset is a key-map showing the relation of the southerly ports to Churchill, terminus for the Hudson Bay Railway, now under construction, which will link the western provinces with the old world by a direct sea route.

Paper Gowns For Visiting Nurses

Crepe paper is the dress-material now used by the visiting nurses of Milwaukee for their working uni forms. This new idea, we are told by P. W. Koeppen in The American City (New York), was worked out by Dr. E. V. Brumbaugh, Deputy Health Commissioner. The manufacture of the gowns requires the services of a seamstress to supply the seventy visiting nurses of the Milwaukee Health Department with enough paper gowns. We read:

"Until a year and a half ago, the nurses wore the usual cloth gowns at homes in which there was a communicable disease. Dr. Brumbaugh had long felt that those gowns, which were left to others to sterilize and were washed by laundries, were unsatisfactory. A careful inquiry revealed that there were no ready-made paper gowns which exactly suited the purpose. He confided his paper-gown idea to one of the nurses, and she suggested that the gowns be made within the Department.

"She bought a pattern for a nurse's gown from a local department store, and a roll of crepe tissue paper. A sample gown was made. Tests proved that it would stand up under eighteen or twenty tryings-on. The nurses who tried the gowns out in their work found them far more satisfacttory than the cloth gowns. The tests resulted in the employment of a seamstress. She uses a pattern which was cut with a jig-saw out of compo board. This heavy pattern allows her to cut with scissors a dozen layers of crepe tisue paper at once, which enables her to turn out sixty-six gowns a week—all of them complete with tape to fasten.

"'The gowns cost us approximately fifty cents apiece,' said Dr. Brumbaugh. 'This will mean a slightly higher cost per year than for cloth gowns, but the paper gown is far more satisfactory for the visiting nurse, who must call at homes where there are contagious diseases, such as scarlet-fever, diphtheria, smallpox, infantile paralysis, etc. The nurses carry the paper gowns in sterile bags —the ordinary grocery-store variety of bag. A different gown is used in every home having a communicable disease. The gown is saved for each successive visit to the home. After it has been worn, it is folded up and placed in the bag. When the nurse no longer calls at that home, it is burned.'"

Gumchew Carol

I'm very fond of scrapple and I'm partial to the apple,
And I like to suck an orange and I love to chaw a plum,
And I tell you I'm a good 'un at eating chocolate pudd'n,
But, if you want to please me, give me gum, gum, gum.
Gum!—Gum!—Gum!
Yum—Yum—Yum!
If you want to please me give me gum gum, gum.
And a most delicious pickin' is a little bit of chicken,
Especially if you're hungry and your appetite has come,
But, when you've had enough to eat and really want a dandy treat,
The only thing that can't be beat
Is gum, gum, gum.
Yum—Yum—Yum!
So choose to chew and, choosing, chew
Gum, Gum, Gum!
So, when you've had enough to eat,
The happy hour has come
When you may chew and chew and chew
Gum, Gum, Gum.
Heigh ho hum! Give me some
I yearn to yaw my jaw and chaw
Gum! Gum! Gum!
—Frederick W. Pangborn.

A sudden sound of whistling disturbed the slumberous air of the classroom, and the strains of "Annie Laurie" floated over forty small heads bent over small slates. 'Who's that whistling?" screeched the teacher, as soon as she had recovered from her surprise. "It's just masel," answered Sandy Macpherson, with true Scottish imperturbility. "Did ye no Len ah could whistle?"

Paints Baboons Blue

Kenya's Warden Stops Raids Thus But Dislikes Practice

In a recent report of the Governor of the British Crown Colony of Kenya is included a report by the game warden telling how the settlers of the colony have been annoyed by elephants, hippopotami, bushpigs and baboons. He describes a process which has been very effective in dealing with baboons:

"A baboon is caught, a cage-trap or gin with muffled jaws being used, and a thick sack or rug is thrown over its head. Several persons then hold the animal, which is shaved as far as possible all over. This operation completed, the baboon is painted with a thick coat of Cambridge blue and liberated. No member of his troop will again approach the scene of the indignity for an indefinite period."

The game warden admits that he does not approve of the treatment, saying "considering the highly organized intelligence of the baboons, I cannot but feel that the proceedings savor of cruelty, more specially on account of the color used."

Scotch Villages Lose Identity in March of Progress

Younger Generation Causes Change in Rural Settlements, Once Noted for Picturesque Features

Modernity has given us many things; it has stolen the village, says "The Weekly Scotsman." A generation ago, in most districts, you found a network of rural communities, each an individual unit, self-contained and practically self-supporting. The popu lace were a doune folk. Everybody worked. There were few malcontents. Jealousies were trifling, sympathy a general trait. They rejoiced together and sorrowed in common. A normal reverence prevailed with an acute sense of local patriotism.

Within the confines of each village there were ample trading facilities. Besides a general emporium providing groceries, drapry, ironmongery and the hundred and one household requisites, there were usually butcher's and baker's shops and a variorum of smaller "shoppies," kept by a tidy spinster or "genteel craitur," who had seen better days, who often lived lives of diligent usefulness without much tangible reward. Certainly they were never unduly mercenary, and not infrequently "lika buddie's buddie" in varied emergencies.

And the old-time rural craftsmen were artists. This village blacksmith and the cartwright put soul into their work, whether in the shoeing of a horse or the bevel of a cart wheel. I have seen a pair of cart wheels, made by a village expert, retaining the individual touch in shape and finish after serving thirty years on a farm.

The village is no more a village. The younger natives, beholden with the unrest of industrial strife, the glamour of white lights and hectic living, the lure of pictures and sport, have supplanted the solid virtues with the effervescence of life. As the older residents pass hence, names long familiar disappear and incomers, alien to long tradition, arrive. To them the detached charm of rural simplicity means nothing.

The "elite" is good for a housing scheme of jerry-built contraptions—"h. and c., with oriel windows and modern appurtenances." And the environs form a convenient stopping place for the legion of motor buses infesting the highways and byways The smith and wright have gone away; the smiddy, reconstructed, has become a petrol store, with a standard pump coated in vermilion usurping the ancient mile-stone.

The shoppies are defunct. A "soda fountain bar," alleged to be American, dominates the chief stance; an attendant, who knows "none Englesh or ze Scotteesh" dispenses fish and peas and vinegar, to a more or less riotous clientele on seven days—and nights—a week.

Drugging Plants

A new method of testing old drugs and discovering new ones is suggested, says the foreign correspondent of The Journal of the American Medical Association (Chicago), through a discovery made by the Hindu scientist, Sir Jagadis Bose, already noted the world over. In a lecture at the Bose Institute, Calcutta, he declared that the effect of drugs on plants and animals had been found to be astonishingly similar. Says the correspondent:

"An extensive field of investigation has been opened by the discovery of numerous Indian plants, the medicinal property of which had never been suspected, and by the use of which the heart machine can be regulated and rendered efficient. The action of a drug was first discovered from its effects on the pulsating tissue of the plant. An identical drug was then applied on the animal heart. A large number of Indian plants had been discovered having characteristic medicinal properties which had not hitherto been suspected. The efficacy of some of these was far greater than any drugs in use. Investigations would no doubt lead to a new pharmacopoea for the relief of humanity and the establishment of a vast industry in the utilization of indigenous plants for medicinal purposes."

"What's wrong now?" asked the assistant manager. "Wrong!" replied the manager, "The fools have placed Madam Soprano's testimonial for a cold cure on the same page with the announcement that she had a sore throat and could not sing."

MADE 'EM SAY "MY WORD!"
This Canadian farmer, photographed in Trafalgar Square, set a new hat style for the Londoners, who marveled somewhat.

Red Rose Orange Pekoe comes as near to perfection as any tea can. Everything that tea experts can do to make Red Rose Orange Pekoe superior in quality, flavor and value is done in the great Red Rose blending rooms. Try it to-day. Put up in the bright, clean aluminum packages. 2-2

Hawks and Owls And the Farmers

Accused of Being Barnyard Pests, They Are Proved to Be Interested Mostly in Rats

NOT ALL BAD

Few persons realize the value of hawks and owls. Even farmers who reap the greatest benefit from the food habits of these birds, seem, in large measure, to be ignorant of the good they do. Boys, reared on farms, learn early to shoot them, having conceived the idea that they are pests, and the habit persists in manhood.

Waldron De Witt Miller, associate curator of birds in the American Museum of natural history and Vice-President of the New Jersey Audubon Society, in a recent bulletin published by the society, discusses the value of hawks and owls. The object of the bulletin is to inveigh against the use of the steel "pole-trap"—an unbaited trap attached to the top of a pole, post or stub in an exposed situation in a marsh or meadow, its purpose being to capture hawks and owls.

"There are accumulations of definite and exact data concerning the food of the so-called "hen-hawks," which positively establish their value to man," says Mr. Miller. "The marsh hawk, which has been generally considered by sportsmen to be one of the worst enemies of game birds, was particularly studied by Herbert L. Stoddard, biologist, of the United States Department of Agriculture, in his quail study in Georgia, jointly sponsored by the Department of Agriculture and the local sportsmen of the region. Mr. Stoddard found in more than 1,000 meals of marsh hawks only two quail, but fully 1,000 cotton rats, which rodent in turn was found to have taken 15 per cent. of all quail eggs destroyed.'"

Mr. Miller gives the following data on stomach contents of a few of these supposedly harmful birds:

"Of 562 stomachs of the red-tailed hawk, from all sections of the country, only 54 examined contained poultry or game, only 51 contained other birds, while 278 contained mice, 131 other rodents, and 47 insects.

"Of 220 red-shouldered hawk stomachs similarly examined, only 3 contained poultry or game and 12 small birds, while 102 contained mice and 40 other mammals. Insects were found in 92.

"Of 65 stomachs of broad-winged hawks examined, none contained poultry, 2 contained small birds, 15 mice and 13 other mammals, while insects were found in 30.

"As to the long-eared owl, of 107 stomachs examined only 1 contained a game bird and 15 other birds, while 84 contained mice, 5 other mammals and 1 insects. In 101 stomachs of the short-eared owl, only 11 contained small birds, while 77 had mice, 7 other mammals, and 7 insects.

"The foregoing examples should satisfy the most exacting that the food habits of hawks and owls as a class are such as to make them of the greatest benefit to man."

RICH, RED BLOOD A REAL NERVE TONIC

The Source of All Nervousness is Weak, Watery Blood.

Many people, both men and women, find themselves run down through overwork, or anxieties. Such sufferers find themselves tired, low-spirited and depressed. Their nerves seem to be worn out and they suffer from headaches and other nerve pains. All this comes from starved nerves.

Doctoring the nerves with poisonous sedatives is a terrible mistake. The only real nerve tonic is a good supply of rich red blood. Therefore to relieve nervousness and run-down health Dr. Williams' Pink Pills should be taken. These pills enrich the blood, which tones the nerves, improves the appetite, gives new strength and spirits and makes hitherto despondent people bright and cheerful. Miss Irene Denne, R.R. No. 1, Washago, Ont., tells what Dr. Williams' Pink Pills did for her as follows:—"I suffered for a long time with my nerves and a generally run-down condition. I grew so weak that I had to lie in bed a part of every day. I could not do any work and was taking medicine all the time, trying one medicine after another. I was advised to try Dr. Williams' Pink Pills and I have reason to be thankful that I acted on this advice ,as this was the first medicine that gave me any relief, and in a comparatively short time restored me to the blessing of good health. When I think of the marvellous good these pills did me, I can most highly recommend them to all weak, nervous people."

If you are at all run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills and you will soon be well and strong. These pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Canadian Asbestos Deposits

Canadian asbestos deposits are of particular interest supplying as they do the largest part of the world's demands for the short grades of fibre. Though occurrences of this mineral have been noted in other localities and provinces, the productive areas are confined to the Eastern Townships in the province of Quebec where active mining operations began in 1880.

An artist-designer is reported as saying that women like their attire to be witty. They have certainly made brevity the soul of it.—Punch.

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them uphalf the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic; or constipation; or diarrhea. Or those many times when you just don't know what is the matter. For real sickness, call the doctor, always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just as pure, just as free from dangerous drugs, but why experiment? Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

Children Cry for Fletcher's CASTORIA

Railway Ads. Wins Prize

A signal tribute has been paid by Harvard University to the quality of Canadian advertising by the selection of the Diamond Jubilee Compaign of the Canadian Pacific Railway as the best institutional campaign in North America for the year 1927.

An award of this nature is made each year by the Harvard Business School with the object of raising the standard of advertising, and includes a cheque of two thousand dollars to the advertising agency which handles the campaign. The fortunate winner in this case is Mr. W. P. Tuttle, President of the Ronalds Advertising Agency of Montreal. This is the first occasion in which a Canadian campaign has been so honored. The announcement was made at a banquet held recently at the Faculty Club of Harvard. The Canadian Pacific Campaign was unique in the fact that it was bi-lingual, the advertisements being in both French and English. It illustrated and described the part played by the railway in helping to build up the Dominion of Canada during the sixty years of Confederation, and was cleverly built up on the idea of the open pages of a book.

A sample of this advertising is reproduced above, clearly depicting transportation methods of Canada's childhood and that of to-day.

OWL-LAFFS

When an unpleasant task lies ahead of you get it behind you without delay.

Eve's Daughter.

Woman (in crowded car, to her friend)—"I wish that good looking man would give me his seat."

Five men got up.

Wouldn't it be grand if a man, when in a hurry, could hold up his arms and, like a woman, drop nearly all of his clothes on him?

Who remembers 'way back when all good housewives made soft soap?

Those who carry no burdens are burdens carried by others.

Heinke—"There are several things I can always count on."

Bine—"What are they?"

Heinke—"My fingers."

Table Manners.

When eating corn on the cob, adjust it as you would a mouth organ, but do not run the scale so rapidly.

Never display the napkin at half mask. Place it in your lap, as that is where nearly everything falls.

If you are obliged to yawn, wait until there is a gap in the conversation.

Syrup should be used for nourishment and not as a liniment.

Never force soup from your spoon by suction. This might cause all of the guests to look startled because it sounds like a flat tire.

When talking do not wave celery around to emphasize what you are saying.

Do not put cake, roast beef or chicken legs in your pocket. If you want more later on ask the hostess to wrap it up.

Do not use a fork as a toothpick. You mightt bend the prongs.

Do not drink from the finger bowl.

Good For Neighbors.

"Was your garden a success this year?"

"I should say so. My neighbor's chickens took first prize at the poultry show."

Well, our bank balance looks like it has been on a diet.

If you have faith, preach it; if you have joy, share it; if you have sorrow, bear it.

A word to wives is sufficient.

Some of the motorists that cut such funny capers on the streets with their autos are merely jaywalkers behind the wheel.

Landlady—"I think you had better board elsewhere."

Boarder—"Yes, I often had."

Landlady—"Often had what?"

Boarder—"Had better board elsewhere."

MISTAKES MOTHERS MAKE IN CARE OF LITTLE ONES

Many mothers give their children solid foods at too early an age and say proudly that their babies "eat everything that grown up people do." Such a course is almost certain to bring on indigestion and lay the foundation of much ill-health for the little one.

Other mothers administer harsh, nauseating purgatives which in reality irritate and injure the delicate stomach and bowels and at the same time cause the children to dread all medicine.

Absolutely no meat should be given to a child until it reaches the age of 18 months, and then only if approved by the doctor. For medicine, all strong, disagreeable oils and powders should be abandoned and Baby's Own Tablets given instead.

Baby's Own Tablets are especially made for little ones. They are pleasant to take and can be given with absolute safety to even the new-born babe. They quickly banish constipation and indigestion, break up colds and simple fevers and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ontt.

The Perfect Brownie

The perfect brownie always knows
That he must bow on tippy toes
And wash his wings out nightly;
When mortals come on fairy green
He should be heard (but never seen)
Then fly away politely.

And he will never stick his tongue
Out at his queen or anyone,
Who ties her shoe strings neatly.
And just before heg oes to bed
Of course he stands upon his head
Or somersaults completely.

The perfect brownie 'll never stoop
To gurgle up his spinach soup
Or gobble his bananers,
And every week and day and hour
He flits along from flower to flower
And uses all his manners.
—(From Child Life Magazine.)

On fishing trips take Minard's.

The trouble with advice is that so much of it is bad.

London Dancing Shocks Minister

Each Kick and Wriggle Has Its Horrible Meaning

CURSE OF AFRICA

London.—Rev. A. E. Guest, of Qutbocolo, West Central Africa, has spent a lifetime teaching natives of Darkest Africa to abandon certain suggestive dances. He has just come to London to learn that civilization is doing the very steps which he has asked the natives to omit from their repertoire.

"Each kick and each wriggle of these dances has its own particular meaning," Mr. Guest explained, "and I feel certain that if British dancers had any idea of these meanings they would never dance the Heebee-Jeebie or the Black Bottom again."

Shocked Beyond Words.

The minister was "shocked beyond words," he said, at an Islington Church.

"This is the most serious problem that confronts the missionary in Africa to-day. One of the chief reasons for the prevalence of this immorality is the performance of dances similar to the Black Bottom," he declared. "The Black Bottom which I saw performed by scores of young people at a London dance hall is nothing more nor less than an adaptation of a native African dance, the meaning of which is too horrible to describe."

Mr. Guest hastened to explain his theory.

"Until he becomes of a certain age an African boy is not allowed to mix with girls.

"On attaining what the tribe considers his manhood, he goes through an initiation.

"This takes the form of a dance exactly like the Black Bottom, which is performed by men wearing grotesque marks. Its actual meaning must be left to the imagination.

Gives Right to Wed.

"When this dance is over the youth goes and takes as many 'wives' as he wants, 30 being about the usual number."

To dances in general, the minister said, he had no objection, but he knew from first hand observation that the Black Bottom and the Heebie-Jeebies were nothing less than exhibitions of primitive animalism.

"At Quibocolo," he said, "we suspended native Christians for even watching the Black Bottom; yet I come home and find my white brethren performing the same immoral dances that are the curse of darkest Africa.

"They must positively be stopped."

Use Minard's Liniment for Corns.

Two Kinds Only

There are only two kinds of bears in the United States, according to David Newall, the artist-naturalist writing in the March issue of "Child Life Magazine." These are the grizzly and the black bear.

The brown bear, the author of "Cougars and Cowboys" says, is merely a black bear that forgot to turn black. "Most folks," he points out, "think that the brown bear is a different kind of a bear, but it is really just a brown-colored black bear. An old mother black bear will often have brown cubs! And when these brown cubs are grown, they may have black babies of their own. Sometimes the brown bears are dark, dark brown and sometimes light brown."

However, brown bears are only found in the west. "Strange to say, the black bears in the eastern states never have brown cubs!"

MINARD'S "KING OF PAIN" LINIMENT

CARRIED WIFE TO BED

Suffered So She Could Not Walk. Restored to Health by Lydia E. Pinkham's Vegetable Compound

Minesing, Ontario.—"I am a practical nurse and I recommend Lydia E. Pinkham's Vegetable Compound to suffering women. For three months I was almost helpless and could not sit at the table long enough to drink a cup of tea. Many a time my husband carried me to bed, I would be so weak. Then he read in the paper of a woman suffering as I did who got better after taking the Vegetable Compound, so he went and got it for me. When I had taken three bottles I was just like a new woman and have had splendid health ever since. When I feel any bearing-down pains I always take it; sometimes a half bottle or whatever I need. It is my only medicine and I have told many a one about it. Any one wanting to know more about Lydia E. Pinkham's Vegetable Compound, I will gladly write to her. I do all I can to recommend it for I feel I owe my life and strength to it." — Mrs. NEAL BOWSER, R.R. 1, Minesing, Ontario.

Do you feel broken-down, nervous, and weak sometimes? Do you have this horrid feeling of fear which sometimes comes to women when they are not well? Lydia E. Pinkham's Vegetable Compound is excellent to take at such a time. It always helps, and if taken regularly and persistently will relieve this condition. C

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful on water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

The Kind of Eggs Poultrymen Want

Every poultryman wants lots of large, uniform, strong-shelled, and HATCHABLE eggs. And more and more are finding that Quaker Ful-O-Pep Egg Mash is just the feed to get the BEST eggs, as well as MOST eggs.

The ingredients of this good feed are of proven merit—oatmeal, most digestible of all grain products; cod liver meal, that tones up the digestive system; minerals, essential to egg building.

Greater hatchability—and stronger, healthier chicks—make Quaker Ful-O-Pep eggs just the eggs for the poultryman, breeder and hatchery man.

Where can you buy so much for such PRICES?

At their sensational new prices of $870 and upwards, Chrysler cars, with famous Chrysler quality and performance unchanged, become even greater value than ever before.

They offer outstanding values which result from a huge and constantly swelling public demand. Four great lines of cars—"52," "62," "72," and 112 h.p. Imperial "80"—supply every price need from $870 to $4685.

Inspection—better still, actual demonstration—will instantly convince you that in any Chrysler you buy performance, quality, style and value which you cannot equal in any other make costing hundreds of dollars more.

NURSES

The Toronto Hospital for Incurables, in affiliation with Bellevue and Allied Hospitals, New York City, offers a three years' Course of Training to young women, having the required education, and desirous of becoming nurses. This Hospital has adopted the eight-hour system. The pupils receive uniforms of the School, a monthly allowance and traveling expenses to and from New York. For further information write the Superintendent.

Missing Plane Found in Idaho

Searchers Believe Hoyt Used His Parachute, but Fear That He Died of Exposure

Boise, Idaho—The airplane flown by Fred Hoyt, missing aviator, was found wrecked in a canyon in mountainous Southern Idaho recently but there was no trace of the flier, who disappeared a week ago when he ran into a blizzard on a flight between Salt Lake City and Boise.

Hoyt's parachute was missing from the demolished plane and old-time residents clung to the theory that he had frozen to death in the winter-bound region after making a successful leap from his plane.

The plane had crashed twenty miles from Holbrook, on the outskirts of the Minitoka National Forest, at the edge of the Black Pine Mountains. One of Hoyt's gloves was found in the wreckage.

Planning an organized search for the flier's body, residents pointed out that even if Hoyt had successfully leaped from the plane, he had little chance to find shelter nor the equipment to withstand the ravages of a mountain Winter. Finding of the one glove in the plane indicated that Hoyt, in making a parachute jump, had ready one hand to pull the rip cord.

The plane was found by Frank Commons, a rancher, in a deep canyon four or five miles from the Commons ranch. An organized air search started several days ago under the direction of Lieutenant Russell Maughan has failed to find any trace of the ill-fated flier.

BABY'S OWN TABLETS ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little ones she always keeps a supply on hand, for the first trial convinces her there is nothing to equal them in keeping children well. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, thus driving out constipation and indigestion, colds and simple feyers, and making teething easier. Concerning them, Mrs. Saluste Pelletier, St. Dumas, Que., writes:—"I have used Baby's Own Tablets for the past ten years and am never without them in the house. They have always given the greatest satisfaction and I can gladly recommend them to all mothers of little ones." The Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Nice Country

Quiet Tea Shop League Formed in Moscow to Get Peaceful Places to Talk at Night

Moscow.—After serving as judge in the great accordion-playing contest which lasted for several days, Gelzer, the prima ballerina and idol of pre-revolutionary millionaires and dapper officers of Moscow, danced to the strains of the favorite instrument of the Russian workers, evoking frenzied delight in the popular audience which jammed the State Experimental Theatre.

On the same occasion Anatole Lunacharsky, Commissar of Education, declared that the accordion would suffice to satisfy the proletariat's musical yearnings till the workers and peasants were able to afford pianos. One shudders to think what Moscow would be like if this ambition is ever fulfilled.

Moscow is already as noisy as Naples. Where can a couple of Soviet business men go for a quiet evening's talk The home is impossible, for Muscovites have on an average only fifty-six square feet of floor space each, which means three persons to a room, or nearly a score to a six-room flat. And the Muscovites are an expansive people, who like giving uproarious parties.

Others play the guitar, accordion, violin or piano, or, in default of these, their radio sets. Muscovites take turns all evening at the flat's sole telephone. In the kitchen half a dozen primus stoves and three or four servant girls roar unceasingly. Why not go to a club? But a Moscow club is altogether unlike the New York Bankers' Club, a place of repose bordering on coma. It is a place of agitation, just like a Jacobins' club during the French Revolution, and one is lucky if he finds the members innocently engaged in putting down the tobacco evil and not discussing colored illustrations on the ravages caused by asphyxiating gas.

In Summer there are the boulevards but there one may be suddenly startled by M. Rykoff's stentorian voice explaining industrial reconstruction broadcast from a lamp behind one's back.

So one Moscow league has been formed, namely, "The Friends of the Soviet Tea Shop," to agitate for the establishment of plain tea shops with tea, but without agitation.

The latest "nonsense" story concerns a man who asked a well-informed friend: "Where do all the old motor-cars go?" "They don't," was the reply.

Suitor—"Sir, I am very anxious to marry your daughter." Her Dad—"Anxious, eh? Ever been married before?" Suitor—"No, sir." Dad—"Ah, that explains it."

The BABY

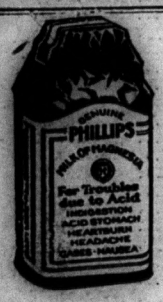
No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhea; or need to aid sound, natural sleep.

Just one warning: it is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

Children Cry for Fletcher's CASTORIA

Indigestion



What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

A St. Andrew's Day Stalwart

THE STANES AN' BESOM AN' BOTTLE

An ancient player of the game on Stormont Loch near Blairgowrie, Perthshire. Mr. James Gordon of the Strathardie Club in the bonspiel of the Strathmore Curling province when 46 rinks played off for the fifth time in 24 years.

A REMEDY THAT INSPIRES FAITH

People Who Have Used Dr. Williams' Pink Pills Speak of Them With Praise.

"Going into a decline" is an expression that has come to be known as one of the most difficult conditions with which physicians have to deal. It often describes an alarming condition because it does not yield to ordinary treatment and the debility continues with loss of flesh and strength until the patient feels hopeless. In the majority of such cases the victim suffers from lack of good, red blood, and if the blood can be restored to normal no other medical treatment is necessary. Proper food and sunshine will do the rest.

Every man, woman and child who lacks health and strength should at once take Dr. Williams' Pink Pills to build up their blood supply. The mission of this medicine is to make new, rich red blood, which speedily restores health and strength. "I am writing to tell you what Dr. Williams' Pink Pills have done for me," says Mrs. J. H. Oulton, Firdale, Man. "A few years ago I was in a badly run-down condition, so much so that I was subject to fainting spells which would leave me in such a condition that I could hardly go about. Then I was stricken with influenza and this further weakened me, and throughout the winter I remained in this condition. I was taking doctor's medicine, but as it did not seem to help me, my mother advised me to try Dr. Williams' Pink Pills, and I got a couple of boxes to start on. When these were done I seemed to feel an improvement and I got a further supply to continue the treatment. I took in all about a dozen boxes, and by that time I was in the best of health and had gained in weight. My faith in Dr. Williams' Pink Pills is now unbounded, and I keep a supply on hand and take them occasionally if I am not feeling quite well. I often recommend them to others, and cannot praise them enough for restoring my health."

You can get these pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A FITTING CELEBRATION

"I believe 1928 is a leap-year, isn't it?"

"Sure, and I'm laying in a big supply of Hops you can bet."

Lady (at theatre, to man in seat behind)—"I hope my hat is not worrying you." Hhe Man—"It is worrying me a lot—my wife wants one like it."

"That's what I call a finished sermon," said a woman when the clergyman's droning voice had ceased. "I'm glad to hear it," said her neighbor. "I had almost given up hope."

Nottinghamshire Witness: The only time that woman has spoken to me is once.

Minard's Liniment for sick animals.

Search for "Dawn" Renewed in Nfld.

Eight Men Heard Sound of 'Plane at Same Hour

St. John, Nfld.—An investigation of the reports that a plane, possibly the Dawn, was heard off the southern shore of Trinity Bay on Dec. 24, shows that six men, bird shooting from a boat, three miles off Hearts Delight, all declare that the sounds of a plane could be distinctly heard coming from a south-east direction. At the same hour two men on shore state that they were so positive that the sounds came from a plane that they climbed to the top of a wood pile to catch sight of it, but the sky was overcast. Similar stories have been investigated without shaking the testimony.

As a result the area between Trinity and Conception Bay is being combed by search parties in the hope of finding the Grayson plane. The search has been actively taken up because of the reward of $1,000 offered by M. A. Mosle, of New York, for the discovery of plane or occupants.

Mrs. Frances Wilson Grayson, accompanied by Oskar Omdal, pilot, and Brice Goldsborough, navigator, set out from Roosevelt Field, New York, in the amphibian plane Dawn, shortly after five o'clock, eastern standard time, on the afternoon of Friday, Dec. 23, for Harbor Grace, Newfoundland, en route to Croydon, England. At 9.45 o'clock the following Sunday night the officer in charge of the government wireless station on Sable Island claimed he heard distress signals from the Dawn, at that time many hours overdue. A search by United States destroyers of the waters between Cape Cod, where the Dawn was last sighted, and Sable Island, subsequently conducted, failed to reveal trace of the missing aeroplane.

Power Tube Improves Multi-Tube Receivers

A power tube should always be used in the last audio stage of a multi-tube receiver. If more than one stage of audio amplification is employed. If the receiver is required to deliver only moderate volume the CX-112 type of tube is the proper one. For greater volume and best tone quality the CX-271 or the CX-210 tubes should be used. One disadvantage of the latter two power tubes lies in their comparatively high plate current consumption, but where "B" eliminators are used this is not a drawback.

Power tubes require higher "B" and "C" voltages than the other tubes in a receiver and for that reason separate "B" and "C" connections are provided. In older receivers this provision may not have been made. For such cases special adapters or "duplex bases," as they are called, may be obtained which permit power tubes to be used in these old receivers without any alteration n the receiver itself. The separate connections mentioned are provided in the adapter.

Say it with flowers,
Say it with sweets,
Say it with kisses,
Say it with eats,
Say it with jewelry,
Say it with drink,
But always be careful

Whole Town Radio Fans

Place in Iowa Passes Ordinance to Prevent Radio Interference

Out in the little college town of Fairfield, in Iowa, the wheels of progress must not interfere with radio reception between the hours of 12 noon and 12 midnight, according to the text of an ordinance passed by the city authorities, just received by the Federal Radio Commission.

The ordinance limits the use of electrical devices, such as washing machines, vacuum cleaners, etc., which cause interference with radio reception only during the morning hours. The city law was passed after the authorities had received protests from radio owners, who complained that housewives' devices, driven by electricity, had completely disrupted choice programs in afternoons and evenings.

A fine of $100 or thirty days in jail has been set as the alternative punishment for violation of the ordinance, the text of which said:

"It shall be unlawful for any person to operate any instrument, device or machine of any kind whatsoever, the operation of which shall cause electrical interference with radio reception, within the city limits of the city of Fairfield, Iowa, between the hours of 12 o'clock noon and 12 o'clock midnight on any day after the taking effect of this ordinance, save and excepting only such as may be necessary in making X-ray pictures or examinations in emergency cases of physical injuries."

"Hardest Working" Clock In Paris To Be Retired

Paris.—The hardest working clock in Paris, after sixty-five years of faithful toil, may soon be retired on a pension.

The instrument, created by Detouche, clockmaker to Emperor Napoleon III, has been in service since 1863 in the Conservatory of Arts and Crafts. During these years it has rung more strokes than any other clock in Paris, since it sounded between 8 o'clock every evening and 8 the following morning the full hour at each quarter hour. That is to say, at three-quarters after midnight it peals twenty-seven strokes—an unusual performance, always startling to passers-by unaccustomed to the laboriousness of Detouche's masterpiece.

Men Called Poor Creatures As Compared With Women

London.—"Men are poor creatures compared with women," said Sir William Arbuthnot Lane, noted physician, speaking at a demonstration of the rhythmic health movement.

"It is upon the woman that the future of this country depends, and we must do everything in our power to keep her physically fit," he said. Sir William declared it is simple to keep fit. Good, clean, healthy food, fresh air and simple exercises would keep the body fit without any of the artificial means so often indulged in.

BUCKLEY'S MIXTURE
Acts like a flash—a single sip proves it

Swollen Joints

Sore muscles and strained ligaments quickly relieved by application of Minard's Liniment.

MINARD'S "KING OF PAIN" LINIMENT

ASPIRIN

You doubtless depend on Aspirin to make short work of headaches, but remember that it's just as dependable an antidote for many other pains! Neuralgia? Many have found real relief in an Aspirin tablet. Or for toothache; an effective way to relieve it, and the one thing doctors are willing you should give a child—of any age. Whether to break up a cold, or relieve the serious pain from neuritis or deep-seated rheumatism, *there's nothing quite like Aspirin.* Just make certain it's genuine; it must have Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

McINTOSH BROS.

GALENA DEPOSITS IN TUDOR

In connection with the North Hastings Mines Limited, incorporation of which has been officially announced in The Ontario Gazette, work has already started upon the property which is situated in Tudor Township, about three miles northeast of Bannockburn. A gang of men has been busy night and day on the property for the past month and with the spring extensive development work will be carried on, the ore being galena of high quality.

The members of the company are Detroit and Windsor capitalists whose attention was drawn to Hastings through the publicity campaign carried on by the Hastings County Council.—Belleville Ontario.

WATER WORKS SYSTEM MOOTED FOR TWEED

Tweed, March 8.—Council met Tuesday, March 6th, all members present, minutes of the last monthly meeting were read and approved. A report was read from the Board of Trade asking the council to grant control of the operations necessary to develop the park property. E. Myles and S. G. Way reported the Board of Trade interviewed the council in connection with the hiring of Mr. Kearns as policeman and band leader to commence his duties as convenient. Moved by Houston and seconded by Kingston that the Board of Trade be given authority to manage the Victoria Park subject to the approval of the municipal council. J. G. Frost and J. L. Minorgan read the auditors' report for 1927 which was very complete. Mr. Redfern, of the firm of Proctor and Redfern, Civil Engineers, Toronto, was present and gave a lengthy talk on the possibility of water works and sewage system for the village. After a lengthy discussion during which many ideas were advanced by the different citizens present the following motion was carried. Moved by Beatty and Lee that the firm of Proctor and Redfern be engaged to make a survey and an estimate regarding the water works and sewers, the expense not to exceed $150. Moved by Houston and Kingston that Ivan Corcoran be retained as solicitor at a fee of $25 per year.

GILMOUR

(Intended for last week.)

Mr. and Mrs. T. A. Dafoe and children visited her parents, Mr. and Mrs. D. Sargent, on Sunday.

Miss Rose Dafoe spent Sunday with her parents, Mr. and Mrs. R. Dafoe.

Mr. F. Slater is spending a few days with his parents in Denbiegh.

Mrs. R. M. Dafoe visited Mrs. R. Dafoe on Sunday.

Mrs. R. Dafoe and Master's Lee and Cecil Dafoe spent Friday in Tweed.

Mrs. D. Sargent also Mr. R. Sargent visited Mrs. T. A. Dafoe one day last week.

Mr. T. Hailstone spent a couple of days in Greenbush with his sister, Mrs. A. Reid, last week.

While sitting in his house on Sunday last Mr. C. R. Porritt happened to glance out of the window and was surprised to see a small deer leisurely walking up the road. The little fellow appeared to be quite unconcerned, but when a dog commenced to bark in the distance he quickened his pace considerably. —Tweed News.

Is this true of your town?

Just as there are farmers who make very good money by intensively cultivating a few acres, so there are merchants in small towns who do a *surprisingly* large business.

Of course, they too cultivate their territory intensively. They don't wait for their customers to come to them—they go to their customers with frequent offers of what they know will tempt them. And they seem to sell everybody.

So regularly do they keep in touch with their customers that their offers of merchandise are eagerly awaited, and are read as if they were news—which they are.

These merchants use Long Distance frequently, to order goods for prompt shipment or to fill in sizes—and they find it good business to call important customers by Long Distance to advise them of opportunities.

Canadian Sport Captivates Throngs in Big American Cities

Thrills Rock the Benches of the Hockey Fans While Leading Magaines Feature the Sports Fine Points

HIGHLY POPULAR

A recent Literary Digest featured the following article, which, given in part, tells the story:—

A bunch of players are bearing down on the goalkeeper, their sticks clashing after the capricious puck, their skates ringing on the scratched and powdered ice. There is hardly time for thought, and yet the devoted hockey fans think feverishly:

"What will they do this time Are they going to pass? Will they try to carry the puck in closer? Or will they take a shot from a distance?"

And the goal-keeper? In those swift seconds of suspense and uncertainty, you see his face and body express every shade of fierce anxiety, vigilance and determination, as, with his eyes on the slithering puck and its pursuing sticks, he prances and teeters on his teel runners to repel it should it be projected with sudden, staggering velocity toward his cage. And when it does shoot—what a roar from the massed ranks of spectators as it either gets home for a goal, or, as more often happens, is cleverly stopped by the goal-keeper's stick or by some part of his devoted and well-padded person! One of the criticisms of the present-day game, remarks Edward L. Bigelow in The Sportsman, is that "too small a number of goals is made," and that "occasionally an inferior team, by using defensive tactics solely, can defeat a better team through perhaps a single lucky goal." Mr. Bigelow, who formerly played for Harvard, and was the 'varsiay coach from 1924 to 1927, continues:

A good many suggestions have been made for overcoming this difficulty, but frankly I can not take the difficulty seriously. Some have suggested that the breadth or height of the cage should be increased, or that the goal-keeper's pads should be reduced so as to bring about more scoring.

There is no question in my mind but that defensive play has developed faster than offensive, but unequal developments of this kind are always true in any game. Why should we now artificially stimulate the offense? Coaches and players are entirely competent to wrestle with this problem, and perhaps in a few years the shoe will be on the other foot. In the present game you constantly get the glorious feeling of suspense and uncertainty. I know of no more sporting proposition than that which the goal-tender has to face in guarding his four-by-six-foot cage. It is up to the forwards to learn to shoot more quickly and with greater accuracy, and to develop a more deceptive feint or fake pass, if they want to score more goals. From the spectator's point of view many shots that just miss and many hairbreadth rescues by the goal-tender are far more exciting than continual scoring.

There is, of course, always the element of luck in the game, just as in any other game; but it has been my experience that if the better team plays with its head as well as its sticks, it almost invariably wins, and I do not believe that enlarging the cage or reducing goal-keepers' pads will make any essential difference in determining the relative strength of two teams.

Dealing with this theme under the title, "Hockey and the Spectator," with the sub-title, "Why the Fastest Game of All Is Becoming More and More Popular," Mr. Bigelow writes:

A burst of speed, a flash of brilliant stick-handling, a well-turned bit of team-play, constant shifts from lightning-like attack to stubborn defense—these, together with the ever-present possibility of exciting personal encounters, furnish the thrill of hockey. And I defy any normal human being to deny that thrill. The game has all the elements dear to the heart of true sport lovers, as attested by the fact that new hockey fans are being recruited every year, and the attendance at games is increasing by leaps and bounds. The increases, however, are not due so much to changes in the game itself as in the modern provision made for spectators.

OF CANADIAN ORIGIN.

The game of hockey originated in Canada, we are told, and Canadians are still its most expert players. "They have made a perfect record at the Olympic games, and our professional ranks are almost 100 per cent. Canadian," says Mr. Bigelow, adding the explanation:

They have the great advantage of an outdoor season lasting for almost five months, while ours lasts intermittently for less than three, and then only in the northern States. Canadians may be said to be born and raised with skates on their feet and hockey sticks in their hands. With constant playing the learn the things instinctively that all hockey players in this country try so hard to acquire. They shoot quickly with surprising accuracy. They use their weight so that when they come in contact with another player he falls, but they do not. They are adepts at feinting to one side to throw the opponent off balance, and then skirting around him on the other side. In body-checking and stealing the puck away they have no equals.

With this excellent equipment it would seem impossible for American teams to oppose them. On the other hand, the Americans have developed team-work to a much higher degree. Alfred Winsor, whose record as coach of the Harvard hockey team from 1903 to 1917 has seldom, if ever, been surpassed in any sport, was the first man to build a co-ordinating machine. He developed position play and the subordination of individual brilliancy. Realizing that passing the puck paved the way for individual efforts, he developed this phase of the game to a surprising extent. His forwards would speed up the ice together in a line when on the offensive, and would return to their own territory behind the opponent's attack still in line. This differed radically from the Canadian style of having two, or more often one, single forward making an attack. As in the development of any kind of team-work, there is a general assumption that much of the fun of trying to play single-handed is destroyed. To my mind there is as much of a thrill and as great satisfaction in a prettily accomplished bit of team-play as in scoring a goal alone. Even Hobey Baker, the greatest of all amateur American hockey players, captaining the Princeton team, was defeated in 1914 by the relentless team-play of less expert Harvard individuals.

EVEN REFEREE HAS USES

It is seldom realized what a tremendously important part the referee plays in the games. His lot is not one to be envied. If a referee were suspended over the rink in a basket which was always just above the puck, and had an assistant on skates for fouls, he might do the position justice. As it is, no man is so nimble on skates that he can always be in a position to judge offside play, nor has he eyes enough to watch for fouls. In addition, the rules are such that their interpretation is often a purely arbitrary matter. Let me emphasize some of the difficulties of the rules.

Body-checking is a common occurrence in hockey. The body-check to be fair, however, must be made by the player who is in front of the opponent carrying the puck, and he must himself be standing still or skating slowly when he checks his opponent by his hip or body. Body-checking changes to charging when the defensive player is skating fast or is not in front of his opponent, and it becomes kneeing or elbowing if the check is not administered by the hip or body alone. Furthermore, body-checking is allowed in some parts of the rink, and not in others, depending on whether the professional or amateur rules are followed. Charging, kneeing and elbowing are subject to penalty, and the referee must determine which of these various methods of stopping the opposing player's advance has been used.

Then come the rules regarding off-side, on-side, or forward passing. Any player is on-side who, at the moment when one of his team-mates is carrying the puck, is nearer his own goal than is that other player. All others are off-side. The rules provide that a pass can only be made forward, provided the man who received it was on-side at the time that the pass was begun. This is one of the most difficult of all rules to understand and to follow in the game, and is constantly the cause of misunderstanding and hooted decisions. For instance, recently the University Club team of Boston in playing against the Toronto Graduates scored what would have been the deciding goal, which was disallowed because the referee thought it had been made as the result of a forward pass. Most of the spectators disagreed with him. Whether or not his decision was right or wrong, it was an extremely close one, and of the type which makes a referee's life so miserable.

If a referee blows his whistle too much, he slows up the game and spoils it for spectators, we are reminded, whereas:

On the other hand, if he blows it too little, the players soon become exhausted and the match is spoiled for everybody. He is constantly between the devil and the deep sea. In the amateur games two referees are necessary, one presumably on the line of the puck to watch off-side play, and the other in behind the players to watch for fouls. These two referees change positions as soon as the puck changes direction. If any nimble-footed, fearless sportsman wants an evening's work which will try his nerves, his strength, and his patience to the utmost, let him volunteer for refereeing service.

Until 1926 the rules of the game were so varied that a great deal of confusion followed, not only among the spectators, but among the players themselves. In the spring of that year the National Collegiate Athletic Association began a study of the subject. They found that no less than six sets of rules were being used, four by the amateurs and two by the professionals. A single code was drawn up for amateur players, which was accepted, and played under last season, but even that code did not correspond with Canadian amateur rules. And not until this summer was a standard code adopted for the two countries. The professionals still have their distinct systems, one used in the East and the other formerly in the West. The outstanding difference between those systems is that in the West the referee does not punish an offending player by putting him out of the game for a certain length of time, but instead gives the offended team a free shot at the offender's goal from thirty feet away, with only a goal-keeper defending. This distinction has now become almost academic in view of the fact that the Western teams have been bought out by the owners of the Eastern teams.

Minard's Liniment kills warts.

Back to the Land

Sorel Courier: The back to the land movement is assuming encouraging proportions and it is our duty to stimulate this wave of colonization which is becoming so marked. Both Provincial and Federal Governments recognized long since that it was highly important that those of our people who had deserted the country districts should be induced to return and that the surplus population of the towns should be directed towards agriculture. There is cause to rejoice, therefore, in the manifest tendency toward the decrease of rural depopulation, and the growth of the back to the land movement.

A FROCK OF SMART SIMPLICITY

Unusually smart is the chic long-waisted frock pictured here. The bodice closes in surplice style and is joined to the two-piece skirt having a handkerchief drapery at the left side. The long loose sleeves may be faced or bound, and the vestee is of contrasting material. No. 1718 is in sizes 16 years, 36, 38, 40, 42 and 44 inches bust. Size 38 requires 4 yards 36-inch material, and ¾ yard 11-inch contrasting. Price 20c the pattern.

Our Fashion Book, illustrating the newest and most practical style, will be of interest to the home dressmaker. Price of the book 10c the copy.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number and address your order to Pattern Dept., Wilson Pattern Service, 73 West Adelaide St., Toronto. Patterns sent by return mail.

Once upon a time America was connected with Europe by means of a lost continent instead of a lost loan.—Anderson (Ind.) Herald.

Head Hunter Who Was "Gentleman"

Remarkable Tribute to the Former Chief of Aboriginal Tribe

A remarkable tribute to the former chief of an aboriginal tribe of Borneo is paid by Dr. Charles Hose, of Sarawak fame, in his book, "Fifty Years of Romance and Research, or a Jungle Wallah at Large," which has a preface by Sir Arthur Keith.

"A pagan and a savage, he was one of the finest gentlemen I have ever met," writes Dr. Charles Hose, in reference to Aban Jau, former chief of the Tinjar Sebops.

Dr. Hose went out to Sarawak as a young cadet, and during 23 years' service in Sarawak became on the friendliest terms with head-hunters and jungle nomads.

One of the first savages with whom Dr. Hose made friends in Sarawak was Aban Jau, whom he describes as a "Rob Roy of Sarawak." Aban Jau was a head-hunter. When Dr. Hose arrived in Sarawak Aban Jau claimed to be an independent chief, denying that the Sultan of Brunei (a small part of Borneo) had any right to hand the territory of the Tinjar Sebops over—as he had done—to Rajah Brooke of Sarawak.

Aban Jau's wife died, and Aban Jau, "in accordance with the traditions of his people at the time," says Dr. Hose, "had to take the head of one of his enemies as the concluding and most important part of the burial and mourning ceremonies. Aban Jau accordingly sent word to the Resident, informing him of his wife's death and stating that he and all his followers on the Tinjar River proposed going on the warpath against the people of Balait, in Brunei territory, in order to obtain some heads to enable his people to conform to the tradition."

The Balait people received warning of the intended attack, so Aban Jau dropped the idea, and, instead, bought an old slave from the Sultan of Brunei for £25 to £50.

HEAD CUT OFF.

As the old slave could not keep up with the party of ten men returning with him to Aban Jau's territory, they cut off his head—the only part of him really required for ceremonial purposes—and left his body by the wayside.

Dr. Hose took part in capturing the party of ten "as they entered the Baram district with their gory triumph." The ten were tried, convicted, and ordered to await the Rajah's pleasure. Aban Jau, being ordered to pay a fine of brassware and other valuables, became angry, and there were rumors that he intended to attack the Rajah's forces.

Threats of "fire, blood and slaughter" came from the Upper Tinjar, and Dr. Hose was informed that his skin would be neatly stripped off and used to make a shield. He met the threats by hurrying up the river with a boat's crew of natives to face Aban Jau and his 5,000 clansmen.

Five days' journey brought him at dawn to Aban Jau's village, and quietly, with two followers, he slipped up the ladder at Aban Jau's "long house," and sat on the dais reserved for chiefs and honored strangers.

Aban Jau sat down with Dr. Hose and after long argument Dr. Hose persuaded him to make friends with the Rajah.

BEST FOR ALL YOUR BAKING — Pies, Cakes, Buns and Bread — DOES ALL YOUR BAKING BEST

HOW THE SUN LIFE MADE THIRTY-EIGHT MILLIONS PROFIT IN THE YEAR 1927

Participating Policyholders Receive Ninety-Five Per Cent. of Profits—Dividends to Policyholders Again Increased —Company Seeks Legislation to Maintain Canadian Control

Montreal.—The phenomenal record of the Sun Life Assurance Company is an inspiration to all Canadians. Its income of $102,000,000 is already equal to the total revenue of the Government of Canada in the year 1910, and $38,000,000 is certainly an amasing sum to have earned as profit in one year. Not many corporations anywhere can report such figures. The President's intimate, practical comments at the annual meeting explaining how these huge profits were made were illuminating.

Of even greater moment, however, were his statements regarding the danger that this great Canadian institution may pass from Canadian control. Some months ago, Mr. Macaulay referred to the activity of Wall Street in the buying of Sun Life stock, and cautioned policyholders and shareholders of the menace it involved to an institution which was founded and developed by Canadians and which has obtained its phenomenal growth under Canadian management. Subsequent events have justified these misgivings, and at the meeting the first public intimation was given that the Sun Life directors are seeking legislation at the present session of Parliament which is intended to effectively forestall this danger.

Precautions to Maintain the Company Canadian in Character.

In concluding his address to the shareholders and policyholders the President made the following reference to the matter:—

"There is but one cloud on our horizon. Our very prosperity has created a remarkable demand for our capital stock. We desire to ensure that this great company shall always remain strictly Canadian in its control and in particular that its investments shall never come under Wall Street domination. A bill which we have introduced into Parliament will be submitted for your approval. If it be passed, it will give us the protection we so much need, and I know we can rely on the whole-hearted sympathy and support, not only of our stockholders and policyholders here present, but of our army of policyholders throughout the country."

The meeting unanimously approved of the measure in question. How important and how vital to Canadians are the interests at stake is disclosed in the report submitted to the annual meeting of the Company.

In moving the adoption of the report, President Macaulay said:—

"You gentlemen have become so accustomed to our presenting every year a statement surpassing all previous records that you come prepared to hear another report of that description. I am quite sure, however, that not one of you, in his most optimistic mood, expected a report so favourable as that which you now have. Our record for 1927 is indeed a remarkable one. Let me touch on the main features:—

Remarkable Growth, Strength and Profits.

"The new assurances completed amounted to $328,000,000, an increase of over $62,500,000.

"The amount in force at the close of the year had risen to $1,487,000,000, and at the present moment is well over $1,500,000,000.

"The income exceeded $102,000,000, an increase over the previous year of $23,800,000. To me, this is very impressive. Not only has this item passed the one hundred million mark, but the increase alone is equal to what was our total income but eight years ago, which had been accumulated by forty-nine years of strenuous effort. A life company with a total income no greater than our increase would be an important corporation.

"The assets have increased by $56,000,000, and now exceed $400,000,000.

"But the most wonderful of all these wonderful figures is the amount earned as profit—$38,000,000. How great this figure is may be judged from the fact that the earnings of the previous year, in which we so rejoiced, were $20,500,000. It would be hardly reasonable to assume that our earnings of future years will continue on such a tremendous scale, and we have therefore set aside a large part of this sum to provide for future contingencies.

A Great Surplus and Contingency Fund.

"Our securities have been valued on a very conservative basis, but from even these moderate values we have set aside another $5,000,00 to provide for market fluctuations, making the total deduction under this heading $10,000,000.

"We have also set aside the following amounts:—

"A further $1,500,000 for unforeseen contingencies, raising that fund to $12,500,000; $500,000 to provide for possible greater longevity of annuitants, raising that item to $2,000,000; and $1,300,000 to increase our reserves on tropical business; besides writing off another $1,000,000 on our Head Office and other buildings.

"We have distributed $11,100,000 in profits to our policyholders, and have also set aside $6,200,000 to cover profits accrued on policies.

"After providing for all these amounts, we have added $11,000,000 to our undivided surplus, raising that sum from $34,000,000 to $45,000,000.

Scale of Profits Increased for Eighth Successive Year.

"The announcement, however, that will be received with the greatest enthusiasm is that for the eighth consecutive year we have increased the scale of profit payments to our policyholders. The basis of distribution for 1928 will call for nearly $900,000 more than would the basis of last year.

Profits of Policyholders Unexcelled in the world.

"We can already say that in profitableness to our policyholders, we are not excelled by any life company in the world; but we are not satisfied and will not be satisfied until we can make an even stronger statement than that. Years ago, I told our field force that we hoped to be able to announce an increase in our profit scale for ten consecutive years. We have maintained that record for eight years, but the ninth and tenth years have yet to come, and their story has yet to be told. Our huge undivided surplus and our great contingency funds are the best guarantee our policyholders can have as to their future dividends.

Large Dividends the Result of a Wise Investment Policy.

"You ask how we are able to make these huge profits. The $38,000,000 earned may be divided as coming approximately $14,000,000 from the regular life assurance operations of the Company, $5,000,000 from profits actually realized by the redemption or sale of securities and $19,000,000 from increase in market values. And, of all the profits made in the participating branch, the policyholders get ninety-five per cent.

"I would not have you suppose that we ever speculate. We do not. We, of course, do not hesitate to sell bonds or other fixed-interest securities when they rise to such premiums that the yield is no longer satisfactory, but when we buy a stock we buy for permanent investment, we buy to keep, and we never sell merely because the market value may have risen to a high figure. We have, however, had an epidemic of security redemptions, and as a result we have the $5,000,000 of realized profit.

High Interest Rate Earned, With No Arrears.

"Even the normal earnings of a life company depend very largely on the rate of interest it can obtain on its investments. The current rate of interest has been steadily dropping for years, and there is every indication that it will continue to drop—for how long we cannot tell. The outlook for investors in bonds and mortgages is not encouraging. That fact causes us no anxiety. We have enlisted many large groups of the bainiest, most experienced, most energetic and most successful men on the continent to work for us to maintain our co-operation by becoming stockholders in the outstanding basic corporations of the country, so that we share in all the profits that they make. The dividends which we receive on our stock holdings are already two millions more than were payable on the same stocks when we bought them. Our interest account, of course, includes also our dividend receipts, and our record is illuminating. In 1921 the average rate earned by us was 6.07 per cent; in 1923 it was 6.20 per cent; in 1924, 6.38 per cent; in 1925, 6.41 per cent; in 1926, 6.69 per cent; and in 1927, if we were to use the same basis of calculation as in previous years, the rate would be 6.81 per cent. We, however, do not wish to show such a high rate, and as we always make a charge of 5 per cent against our interest earnings for investment expenses, you will note that we are quoting only the net rate, 6.47 per cent, after deducting that investment expense. The falling rate of interest has no terrors for us.

"The quality of our securities may be judged by the fact that not one dollar of interest or dividend on any bond, preferred or common stock listed in our assets as in arrears for even one day.

Busines Doubled in Four Years.

The position we have attained justifies enthusiasm, but we must always look on the present as a mere vantage ground from which to plan for the future. What is that future to be? Year after year we have been confidently predicting the glorious future yet to come, and that promised future is now unrolling itself before our eyes in all its greatness and strength. But what of to-day's future? I have just been reading my own remarks of two years ago, and already the figures of which we were then so proud look small and outgrown. We have doubled in size now every five and a half years since the Company began, but our last doubling has taken only four years, and we are to-day growing more rapidly than ever before in our history. I predict that the figures of two years hence will make even the figures of to-day look small and outgrown in their turn.

Sun Life Sets its Own Pace.

"People sometimes say when speaking of our progress:—'Yes, life assurance is growing wonderfully.' So it is; but the Sun Life is not content to grow only at the rate of life assurance generally. Statistics now available indicate that in 1927 the aggregate new business of all the companies operating in the United States exceeded the total for 1926 by only one per cent and in Canada by seven per cent. But the new business of the Sun Life of Canada shows an increase of twenty-three per cent. We set our own pace. Our prosperity and popularity, and the enthusiastic support of our six hundred thousand policyholders, make our growth both rapid and certain. The future still before us will, I am convinced, be more wonderful than anything we can now imagine. And it is indeed a happy thought that all that growth in size and all that growth in prosperity mean increased service to humanity, and service at steadily lowering cost to our policyholders."

The President closed his remarks by his reference to the need of safeguarding the future of the Company, as above quoted.

The Board of Directors of the Sun Life is composed of the following:—T. B. Macaulay, F.I.A., F.A.S., President and Managing Director; Arthur B. Wood, F.I.A., F.A.S., Vice-President and Actuary; Robert Adair, W. M. Birks, Hon. Raoul Dandurand, J. Redpath Dougal, Sir Herbert S. Holt, Abner Kingman, J. W. McConnell, C. A. Neill, Carl Riordon, John W. Ross, His Honour James C. Tory, Hon. Lorne C. Webster. Three new directors were added at the meeting—Hon. L. A. Taschereau, Ross H. McMaster and C. B. McNaught.

Keeping Fit

HOW ENGLISH GIRL GUIDES PLAY HOCKEY

The All-England Touring Hockey team, which was so successful in Australia, played a match with the Girl Guides' past and present team at Merton.

A Garden All My Own

If grown-ups got little and I got grown,
I'd plant a garden all my own.
But it wouldn't have gates or a stuck-up hedge
Or gravelly walks with a prissy edge.
I'd hire a squirrel to run my paths,
I'd invite the sparrows to public baths,
And sociable posies might run away
To visit their neighbors every day.
And there I'd live like a fairy story
In a bower of roses and morning glory,
And four o'clocks would tell me the hours,
And even my dresses would smell like flowers!

(Harriet Eager Davis in Delineator.)

How Rockies Got Their Name

The name "Rocky Mountains" appears to be of Cree Indian origin. Long before the advent of the white man the Indians of the Canadian prairies, gazing at the glistening line of peaks stretched across the West, called them the "Shining mountains," Legardeur St. Pierre in his journal, 1752, stated that tmong the Cress they were called "Assin-wati," that is, literally, "stany or rocky mountains." He translated the name into French —"Montagnes des Roches"—and by the English equivalent they have been known.

Nothing valuable can be lost by taking time.—Abraham Lincoln.

The Cleaning And Care of Furs

Furs are being used to-day by Canadian women to a greater extent and in greater variety than ever before. They are expensive and to some extent a luxuary; their proper care is therefore a matter of considerable importance in order that the wearing quality and beauty may be preserved to the fullest extent. In this connection the Natural Resources Intelligence Service, of the Department of the Interior, considers that it would not be amiss at this season of the year to give some information regarding the proper care and storage of fur garments.

Furs not only collect dust but cosmetics, grease and other foreign matter which works down to the leather unless thoroughly beaten or brushed or blown out. It will be readily understood that if these are allowed to remain and accumulate they will have a deteriorating effect not only on the life of the leather but on the beauty and texture of the fur as well.

A good deal may be done in the home in the superficial cleaning of furg arments, mostly in the way of shaking and beating. Frequent shakings are a fairly good insurance against moths. Furs should always be cleaned and aired before being stored. They should not be hung in the sun but in the shade where the wind can blow on them.

To clean furs they should be shaken vigorously and then be beaten with a smooth switch or light cane. There should not be too much beating for fear of damage to the skin. A vacuum cleaner may be run over them with good effect. Hardwood sawdust rubbed into a fur and then thoroughly beaten out will much improve the appearance and the process can be repeated several times if necssary. The use of hair brushes and combs on furs should be with moderation, Combs, if user, should be large toothed.

This is about the extent to which cleaning should go in the home and if carried out frequently, it will be very beneficial in the upkeep of fur garments. Thorough cleaning of the linings and the fur should be undertaken by an expert with proper facilities and experience. The use of cleaningfluids such as alcohol, etc., are dangerous in the hands of the amateur. Besides danger from fire, irreparable damage may be done to the garment.

Some cleaners, who have little or no real knowledge of fur, advertise fur cleaning. Furs should only be entrusted into competent hands. The process of the fully equipped furrier in cleaning furs includes a considerable number of operations and is generally as follows. First the linings are removed and cleaned separately. Then the fur body in tumbled over and over in a revolving drum and afterwards laid on a padded table and whipped or beaten. The duration and severity of these actions depends on the kind and condition of the skins. The fur is then vacuum cleaned by blowing and suction after which sawdust is moistened by a cleansing fluid such as highly refined naphtha or benzine and rubbed into the fur. After the dampened sawdust is rubbed into the fur until the grease, powder rouge and other materials have been cut by the cleaning solution, the garment is shaken and beaten again. The fur is then paced on a figure and glazed with water, care being taken so that thew ater will not soak into the skin, and ironed with paper between the iron and the skin. Finally the cleaned fur and linings are brought together again.

Enough has been indicated to show that fur cleaning is really a craft of its own and one which should be taken advantage of. It is frequently convenient to have fur garments thoroughly cleaned at such time as alterations or retailoring is being carried out. The furs will emerge like new and worn skins can then be easily replaced and the garment brought up to the latest fashion.

A word about storage. Do not hang hang furs in closets or wardrobes filled with other garments or near fires and radiators. This applies especially to wet furs; there are natural oils in furs and heat softens the leather. Attention has already been directed to the desirability of vigorous shaking and beating, etc., before putting away furs. They should then be wrapped carefully and completely in a good paper covering (tar paper and carbolized paper are sometimes used) scattering some napthaline flakes, camphor, moth balls or cedar shavings in them. Plenty of moth preventatives should be used. Wrap the package in a second wrapping of heavy paper or place in a good paper bag and store in a dark cool closet or in a box with a close fitting lid. Some careful persons even wrap the box in one or two coverings of paper and seal.

Moths may sometimes persist even in a well cleaned and packed fur garment, They cannot however live in a temperature below zero and thus many place their furs in cold storage over the summer for safe keeping. Most of the larger furriers are now equipped to handle furs in this way. Furs are valuable and can be completely destroyed by fire. Insurance is advisable and the furrier attends to this also. Lastly one should see that the storage receipt and insurance papers are placed in a safe place, preferably the safety deposit box.

They Evidently Studied More Than Farms

CANADIAN FARMERS MEET COMEDIAN

The Canadian agriculturists visiting England enjoyed a joke with George Robey and Marie Blanche after seeing a performance of Robey's Revue, "Bits and Pieces."

Meaty Winter Dishes

These New Veal and Liver Recipes Are Suited to Cold Weather Appetites

In choosing veal, look for meat that is pinkish in color with white fat. If the fat is colored, the meat has probably been taken from an animal that is too young.

Remember above all that veal should be cooked thoroughly, as it is a difficult meat to digest easily. Also it is bland in flavor and requires more than the ordinary amount of seasoning.

Veal Chops—Surprise.

Cut a wide slit to the bone in six thick veal loin chops, making a pouch. Fill this with a stuffing made from eight slices of bread soaked in water, one-half an onion chopped fine and sauted in butter three minutes, one-quarter of a pound of mushrooms sauted in one tablespoon of butter. Mix the bread, which has been drained, with the onions and mushrooms, season with salt and pepper and celery salt, and moisten with a little stock or water if necessary. Put the stuffing into the pouch and hold in place by inserting a wooden skewer in each chop. Place the chops in a baking dish with small pieces of salt pork in the bottom of the pan. Bake in a moderate oven for an hour and a half. Baste frequently with stock or water. Remove the skewers before serving.

Stuffed Breast of Veal.

Cut two and one-half pounds of breast of veal into individual servings. Cover each with a stuffing made of one and one-half cups of bread crumbs, mixed with one-third of a cup of melted butter, the juice of one onion, salt and pepper to taste. Place in a slow oven, in a covered roaster for one and one-quarter hours. Baste with stock frequently. Remove the cover about five minutes before serving if the bread crumbs have not browned.

Veal and Green Peppers.

Wipe two pounds of veal cut from the leg, and cut into small cubes and roll in flour seasoned with salt and pepper. Saute in butter until brown. Pour meat and fat into a kettle, add three green peppers cut up, one cup of water and three tablespoons of butter, or substitute. Cook very slowly for one and one-half hours. It may be necessary to add water from time to time. Thicken the gravy before serving. Place on a platter surrounded by a ring of boiled rice.

Veal a la Bismarck.

Buy two and a half pounds of veal from the round. Cut into pieces of individual servings. Roll in bread crumbs, then in a beaten egg, and then in crumbs again. Fry in four tablespoons of fat until brown on both sides. Pour tomato sauce over the cutlets and cook at a low temperature for one hour or until tender. The sauce is made of two cups of strained tomato juice, half a teaspoon of chopped parsley and one clove of garlic. Thicken by making a paste of four tablespoons of flour and two tablespoons of fat. Remove the garlic before adding the sauce to the cutlets.

Creamed Liver.

A good way to use left-over liver is to serve it in a cream sauce. Cut one pound fried or boiled liver into dice. Make a pint of cream sauce and add to the meat. Allow the liver to cook in the cream sauce for about five minutes. Serve on hot buttered toast.

Liver, Danish Style.

Fry one pound of sliced liver for three minutes with bacon. Leave slices with milk and shake of flour (about two tablespoons) it. Let simmer for half hour occasionally. Season and pepper to taste and a little nutmeg. The dish is very good served with baked sweet potatoes.

Peppers With Curried Stuffing.

6 green peppers, 1 pound sliced liver, 2 cups cooked rice, 1 teaspoon curry powder, salt and pepper. Boil the sliced meat in a minimum quantity of water until it becomes light in color and firm enough to run through the food chopper. Add chopped liver to cooked rice and liquid in which meat was cooked. Add salt, pepper and curry powder. Mix well. Remove stems, cores and seeds from peppers and parboil for ten minutes. Fill peppers with meat and rice mixture, dot each with butter and bake thirty minutes. Serve garnished with sliced beets.

Liver, Macaroni and Cheese.

1 box macaroni (9 ounces), ½ pound American cheese, 1 pound calves' liver, 1 clove garlic, 1 teaspoon Worcestershire sauce, salt, Paprika, 1 Spanish onion, 4 slices bacon, 2 tablespoons flour, 1 pint of water in which macaroni was boiled, 1 green pepper. Break the macaroni in short pieces an dput into one and one-half quarts of boiling salted water. Add the sliced garlic and boil until tender. Then drain into a hot dish.

Cut the liver into half-inch pieces, removing all outer skin and tough fiber. Cut the onion and green pepper into fine pieces; slice the bacon into kuarter-inch pieces and fry until nearly crisp; then add the onion and pepper and saute until soft. Add the chopped liver and cook until the liver is done. Then add the flour and brown slightly. Add the macaroni macaroni water, season with salt, paprika and Worcestershire sauce. Make a ring of the macaroni on a large platter, place the cooked liver in the centre, and sprinkle the macaroni liberally with grated cheese. Garnish with parsley and serve.

A Proud Mother

Gold Emblem Awarded to Mrs. Lindbergh for Her "Modesty" and Ability as a Teacher

Washington—For "characteristics of modesty and idealism and outstanding work in the teaching profession" Mrs. Evangeline Lindbergh will receive the award of a gold emblem and life membership from the National Education Association at its convention in Boston March 1.

Secretary J. W. Crabtree of the association, who signed the certificate, said:

"It is a source of distinct pride to the teaching profession that the youth whom the nations have so singularly honored is the son of a fellow-worker."

The testimonial to Mrs. Lindbergh, representing the high regard in which she is held by more than one hundred and eighty thousand teachers in all parts of the country, is to be presented while her son, Colonel Lindbergh, looks on, just as she has looked on while the world heaped honors on him.

Ontario Farmers'

Seed Cleaning Week
March 26th to 31st 1928

To further encourage the production of better crops and in fighting the deadly weed menace, Farmers are urged to set aside the week of *March 26th to 31st* as *Ontario Farmers' Seed Cleaning Week*.

Do your part in ridding the Province of noxious weeds, which destroy Ontario's crops to the extent of millions of dollars every year. The Ontario Department of Agriculture is prepared to co-operate to the fullest extent.

Clean seed means larger dividends in dollars and cents, freedom from weeds, and a finer appearance of your crops. Use this coming week to have clean seed ready for sowing at the earliest suitable date.

WASHOUT ON C.N.R. TRACK

The C. N. R. train, which runs from Madoc to Belleville, was held up all Tuesday due to a washout when Deer creek overflowed its banks. About 100 feet of track, below Mud Bridge a mile south of Madoc, was washed away. The local section gang with help from a work train brought up from Belleville, had the track repaired late last night and the train made its regular runs to-day. A train from Belleville brought passengers and mail up as far as the washout, where they were transfered to the Madoc train.

RAY ATKIN B. S. A. GOES TO BELLEVILLE

Ray Atkin, B. S. A. who for the past seven years has acted as Agricultural Representative in Hastings County for the Ontario Department of Agriculture, has tendered his resignation and has accepted the position of District Supervisor with the London Life Insurance Co. of London, Ont. Mr. Atkin will have the counties of Hastings, Prince Edward and Northumberland under his supervision.

Hastings County has taken the lead in many agricultural activities during Mr. Atkin's term in the county. Over seven hundred young people have received instruction through courses in Agriculture and Home Economics. Practically every rural boy and girl are actually engaged in school fair work. Over thirty Bacon Hog clubs have been formed. In co-operation with the county Agricultural Committee, county exhibits have been shown at the C. N. E. Plowing matches, Livestock Judging Competitions and other educational work has been carried on.

Mr. Atkin will have offices in the City of Belleville in connection with his new work.

PRESENTATION TO H. S. HOCKEY BOYS

That Madoc is proud of the boys of her High School hockey team was proved without doubt on Friday night when the village sports turned out en masse to do them honor. The entertainment and presentation, which had been arranged, took place in the Masonic Hall and was a decided success.

Mr. E. C. Tufts, Reeve of Madoc, occupied the chair and opened the entertainment with a few remarks concerning the hockey team and their successful season. A fine program followed. The first half hour was a triumph for the members of our celebrated male quartette, who sang and played and wise-cracked just as well as any natural born coons. The second half of the concert was rendered entirely by students of the High School. There were selections by the orchestra, vocal and instrumental duets and solos, and choruses by the school. The upper school minstrel boys gave the audience a real treat and it would be hard to find a group of High School students who could excel in talent and the ability to exercise it those who performed for us that night.

An interesting feature of the program was the presentation to Robert Whytock of the Strathcona medal for proficiency in marksmanship. Lt. E. T. Nayler made the presentation and told in a few explanatory words just what it meant to be eligible to receive the Strathcona medal. In closing his remarks he said that if this practise of arousing competition among H. S. boys to win this medal does nothing but teach them the proper use of a rifle and thereby decreases the number of regrettable accidents it is worth while.

Mr. James Hough, Public School principal, introduced the real purpose of the meeting, namely the presentation of the Vincent Whitty memorial cup to the Madoc High School hockey team, which has won it three consecutive years. Mr. Hough as manager of the team, derived a keen pleasure from being chosen to present this trophy to his boys. As a personal friend of the late Vincent Whitty now lying somewhere in France and as one of the three who dedicated the cup to his memory, he spoke feelingly of his old school-mate and team-mate who was ever a good sport, and said that he had taken special pleasure in managing this team of boys who, too, throughout the year played up and played the game. Chas. Phillips, as captain of the team, received the cup and in a few chosen words thanked Mr. Hough and remarked that the success of the team was in a great part due to the untiring efforts and staminating influence of their manager as well as the good support of the people of the town who were always there to back them up.

Mr. Duncan Brown, H. S. principal, gave a very interesting address on the value of athletics in schools.

He said that the physical training and sports have attained such eminence in the universities today that a special new degree has been conferred on the first man to make the study of athletics and their value to school pupils his life work.

The boys certainly did things up in fine style. Each teacher was presented with a box of bon-bons.

Albert Caskey, business manager of the team, was the recipient of a pair of cuff links and Mr. Hough a Parker pen and pencil case.

Mr. Geo. White, chairman of the H. S. board, then presented the members of the hockey team with club bags as a token of appreciation for the honest effort and sportsmanship exercised by each boy to make their team the winning one. Donald Whytock replied.

Refreshments were served to all present. During the intermission and while lunch was served the town orchestra rendered some popular numbers. The remainder of the evening was spent in dancing.

If you have anything to sell, phone us and watch results.

LIQUOR CONTROL ACT CHANGES

Toronto, March 27—Amendments to the Liquor Control Act, making it slightly broader in application, featured the brief legislative program of the Assembly yesterday. A new sub-section provides stiff penalties for those who consume or obtain for beverage purposes patent medicines or essences of alcoholic content, and another item in the tightening-up process is to the effect that an offence committed by any occupant of a house shall disqualify the residence for a period of one year as a place where liquor may legally be kept.

Hon. William Finlayson obtained first reading for the annual amalgamation of amendments to the Municipal Act, and Premier Ferguson introduced the School Law Amendment Act, 1928—both signs of a session nearing the close. The latter involves no change in law, the Prime Minister said, the amendments being connected with administration.

E. Proulx (Prescott) introduced his bill providing for exemption from vaccination of conscientious objectors, and removing the compulsory feature in relation to vaccination upon entrance to schools and colleges.

MISSING FOR WEEK YOUNG GIRL FOUND

Peterboro, March 27— Stating that she had not left the city until Saturday, but had remained in sheds, sleeping there and going without food since she disappeared while on the way to church a week ago Sunday, Helen Martin, 17 year old Barnardo domestic gave no explanation of her absence when she was brought into the city Monday. She came to the home of Henry Doleman about two miles from the city, late Saturday night, asking for food and a night's shelter. Mr. Doleman took her in and kept her until this morning, when Sergeant Wigg, of the city police, went out and brought her in. An investigation of her strange disappearance is proceeding.

Miss Martin's disappearance has caused much speculation in the city, rumours of foul play being common. For some weeks there had been reports of a suspicious character accosting girls at night's. One girl was nearly throttled by a strange man, while attempts were made to entice younger children to enter cars.

WATCH DOGS FOR RABIES

So serious has the disease of rabies among dogs in Kingston become that an order has gone forth from the powers that be that every dog found running at large should be destroyed. There has been no cases of rabies occurring in the human family but every precaution is being taken against this deadly infectious disease. The Medical Officer, of Kingston, has ordered any person in contact with a dog with rabies report to him immediately so that the necessary antidotes be given.

Chief Kidd informed The Ontario recently that he understood it was feared the disease among the dogs had spread to the town of Cobourg and if it continued an order to shoot all stray dogs on sight might be issued. As far as is known no dogs in this city have been stricken with the disease but a close watch will be taken by the proper authorities to prevent an occurrence.—Belleville Ontario.

Card of Thanks

Mr. Loomis Reeves and family wish to thank their kind friends and neighbors for their many acts of kindness and beautiful floral tributes during their sad bereavement.

Born

ELLIS.—At Moira, on Saturday, March 24th, to Mr. and Mrs Goldie Ellis, a son.

GENERAL MOTORS MEN ON STRIKE

Oshawa, March 26—Employees of the trimming department of the General Motors plant here went on strike today in protest against a cut in wages, put into effect Saturday. Meetings of men and employers are being held in an endeavour to reach a settlement. It is believed the number of strikers may reach a thousand.

Three hundred trimmers of the General Motors of Canada, Limited, walked out today in protest against the forty per cent cut in wages effected on Saturday and declared to be the third cut in six months. As a result the hardware and paint departments are also idle.

H. A. Brown, general manager, in a statement, contended the scale of wages in Canada was higher than in the United States, that strikers would be dealt with individually and not collectively and that the company would have "little if any difficulty" in filling the jobs.

HOLLINGER IS HELD TO BLAME

Timmins, March 24—Attributing responsibility for the dumping of debris from the powder thaw house into stopes to the Hollinger management and the operating executives, the jury in the inquest into the deaths of the men killed in the mine disaster of February 10th, late Friday afternoon returned the following perdict:

"We, the jury assembled, find that Lindsay, Kampula, Gardez (over whose bodies the inquest was held) and others came to their deaths between the morning of Friday, February 10th and Monday, February 13, 1928, at the Hollinger mine from carbon monoxide poisoning due to the fire in stope 55 A.

"That fire was due to gross negligence on the part of the Hollinger management and the operating executives in allowing conditions to exist whereby their subordinates dumped large quantities of inflammable material in old stopes.

"We recommend that old stopes where the rubbish has been dumped be cleaned out or made safe under the supervision of the government inspectors and that more mining inspectors be appointed."

The jury was out an hour and a half but prior to retiring to consider its verdict had taken two adjournments to consider what the attitude of its members was with regard to the hearing of evidence and the scope of the enquiry.

DEATH OF JOHN REEVES

The death of Mr. John, Reeves occurred at his home on Durham St., Wednesday, March 21st, after a lengthy illness at age of seventy.

Deceased, who was a highly respected resident of Madoc, was born in England, coming to Canada with his brother as a small boy. He spent a number of years in the home of the late Dr. Loomis, later learning his trade of blacksmith which he carried on until health failed. He was a self made man, charitable and honest in all his dealings and had few enemies. His wife predeceased him some eleven years ago. He leaves to mourn his loss one daughter, Mrs. Duncan MacKenzie, of Madoc, and three sons, John, of Tweed; Charles and Loomis at home. Services were conducted at his home by the Rev. G. W. Rivers assisted by Rev. T. G. Marshall, Friday at 2 p.m., interment being in Lakeview cemetery.

AUDITORS' REPORT MUST BE PRINTED

According to an amendment to the Municipal Act made at the last session of the Legislature, the Clerk must now have the Auditors' Report printed in detail and distributed as the council may direct. Any reports made by the auditors must also be printed in connection with the abstract and detailed statement. Formerly the publishing of the abstract of the Auditors' Report was all that was done by many municipalities.

LOCAL AND PERSONAL

Mrs. N. M. Maybee is visiting in Belleville.

Mr. and Mrs. Walter Pigden were in Tweed last week attending the funeral of the late S. G. Way.

The Dominion Bank Inspectors are in town in their official capacity.

Mrs. E. Cross, of Belleville, was visiting her father, Mr. D. E. K. Stewart, in town for a few days this week.

—The Madoc Women's Institute will hold a meeting at the home of Mrs. Duncan Brown, on Friday, 30th, at 3 p.m. All interested are invited. 12-2

Master George Huffman, son of Mr. and Mrs. Wesley Huffman, was taken to Kingston on Thursday last where he was operated on for appendicitis. At present he is doing well.

Rev. Dr. and Mrs. W. S. MacTavish will leave on Wednesday for Winnipeg where they will visit their son, W. L. MacTavish, who is Editor of the Winnipeg Tribune. They will be away for at least a month.—Belleville Intelligencer.

Rev. Ernest Harston, L. L. B., who has been pastor of St. John's United Church since July 1st last, received a unanimous call from the board of Simcoe Street United Church, Oshawa, and after giving it due consideration has decided to accept the invitation.

BIG OPENING OF STIRLING'S HALL

Stirling's new hall now possesses a neat appearance both inside and out. The contractors have completed their work with the exception of stuccoing or plastering the exterior side walls and rear end, which will not be accomplished until warmer weather. The seats have been installed in the theatre and Electrician Sprentall is busily engaged in completing the electrical wiring. The front of the building is very artistic and the electric store or shop, on the west side, will have a splendid show window for the electrical wares. The big opening date has been set for April 9 and 10.—News-Argus, Stirling.

BELLEVILLE WRITER HONORED BY LETTER FROM ROYALTY

Belleville, March 21— Wallace Havelock Robb, naturalist and bird lover, was in receipt today of a portrait of his Royal Highness, Prince of Wales, personally autographed, and letter from Honorable Secretary Lascelles, thanking Mr. Robb for the fine book of poems, "The Quill and the Candle," and hoping for his continued success. The naturalist prizes the photograph most highly, and it will be one of his most valued possessions.

Last summer Mr. Robb was visiting at the coast and he was favored with an interview with his Royal Highness and in the conversation mentioned that he was writing a book of poems on bird life and relative subjects. His Royal Highness commanded that a copy be sent to him on completion.

CROP REPORT

The following report for Hastings County was given to the Better Seed Campaign for the fortnight ending March 10th:—

A farmer stated yesterday that he has eradicated rust from his grain crop by following the advice of the Department and cutting down all barberry and buckthorn bushes. He claimed that last year this simple operation saved him $1,000 on his grain crop.

FOR SALE.—Imperial Oxford Range, 6 lids, good reservoir, burn coal or wood, in good condition. Apply at Review Office. 12-1

COMING EVENTS

THE AGRICULTURAL SOCIETY will hold a dance in the armouries, on Easter Monday. Watch for further particulars.

NEW ADVERTISEMENTS

Buy from Cranston. Only one grade, The best. Cranston's Poultry Farm, Stirling, Ont. 9 tf.

Care of London's Statues Stirs Public Opinion

Jet Black "Queen Elizabeth" Revives Controversy Over Who Shall Scrub Monuments

London—The old question of the responsibility for the washing of London's statues has come up again, this time in connecton with the statue of Queen Elizabeth in the porch of St. Dunstan's-in-the-West, Fleet Street. Of the 200 statues of men and the fifteen statues of women in the London area, this is the only statue of England's great queen. Once it adorned the old Ludgate at the foot of Ludgate Hill, and, since it was carved from white marble, it was presumably once white Ever since it was removed to St. Dunstan's, however, it has been jet black.

The London County Council, the Office of Works and the City Corporation alike disclaim responsibility. It is true that the weather this Winter has been giving a daily dousing to all the outdoor statues in London, but in Queen Elizabeth's case this apparently is far from enough.

The same question has occurred before in connection with the statue of William Pitt in Hanover Square. Nobody seems to know whether the County Council, the Office of Works or the descendants of Pitt are the responsible persons. The same question might also be asked concerning Milton in St. Giles's churchyard, Cripplegate. He was pure and white when he was put up in 1904, but in 1928 he is streaked with rich London brown and black. Who washes him? The status of Sir Henry Irving behind the National Gallery has also achieved notoriety for its dirt. In fact, it was once the subject of a question in the House of Commons, and the Office of Works replied that the reason some London statues were clean was that they belonged to the Office of Works, the dirty ones presumably being those abandoned to the tender mercies of the London County Council and the borough councils. In this case the Irving statue is believed to be either under the L. C. C. or the Westminster Council, while the Nurse Cavell statue near by, the shiniest and cleanest statue in all of outdoor London, is known to be under the Office of Works.

It is apparently true that there are statues here and there in London whose ownership is difficult to trace and for whose upkeep nobody seems to be responsible. The best known statues in outdoor London are under the care of the Office of Works, which took them over under the Public Statues act of 1854, with a list of those for which it would in the future be responsible. The act also provided that the owners of any statues not included in the list could transfer them to the Office of Works with the consent of the Treasury, and that for the future no public statue could be erected without the consent of the Office of Works.

Only fifteen statues were in the original list, but the Office of Works is now responsible for about fifty statues in London alone, among them being those in Parliament Square and Trafalgar Square (including Nelson's Column) and the Duke of York's Column, to whose cost every soldier in the British Army contributed before its completion in 1834.

The L. C. C. is responsible for most of the memorials along the Embankment, including Cleopatra's Needle and the Belgian group. It is also responsible for the Gladstone statue in the Strand. The Victoria Memorial in front of Buckingham Palace is under the Office of Works and so is the statue of William III in St. James's Square, whose ownership remained doubtful until the residents around the square took the matter into heir own hands and asked he Office of Works to take charge of it.

Farm Notes

Care of Breeding Turkeys.

To get turkeys laying at the proper season requires experience. It is important to know just when to begin feeding for egg production. According to a Dominion Department of Agriculture bulletin on the Care and Management of Turkeys forcing for laying should be begun as soon as the weather becomes really springlike and laying should commence about the middle of April in Eastern Canada and somewhat sooner in the West, especially in British Columbia. Eggs laid too early have to be held too long before setting.

When the spring feeding starts the breeding turkeys should be given grain twice daily, morning and evening, and at noon a feed of wet mash composed of equal parts of bran, shorts, ground oats and cornmeal with sour skim-milk to moisten. Only the quantity that the birds will clean up readily should be given at each feeding. The noon mash should be started about a week later than the extra feed of grain. It is assumed that the turkeys have received only one feed of grain daily during the winter. Grit and oyster shell should, of course, always be provided.

Rations for Big Egg Yields.

Some excellent egg-laying records have been made at the Lethbridge, Alberta, Experimental Station. A record of three hundred eggs was made by one hen, while twenty-seven produced two hundred and fifty eggs or more, and one hundred and four exceeded two hundred eggs in the year. To obtain such records it was necessary to follow a very careful system of feeding. The winter scratch ration was made up of two parts of wheat and one part each of cracked corn and crushed oats. A very small portion of this feed was thrown in the litter in the morning to start the birds exercising. The balance of the scratch feed was given about one hour previous to the birds going to roost. A dry mash which was available to the birds—at all times, was composed of equal parts of bran, shorts, wheat, middlings, corn meal, oat chop, and meat meal, with a very little fine salt and charcoal added. The birds were also fed a moist noon meal consisting of a crumbly mash made with the same ingredients as the dry mash, with the meat meal, salt and charcoal omitted. This noon meal was omitted on occasional days according to the judgment of the feeder, who aimed at all times to keep the appetites of the birds keen. The flock was also given green feed, such as cabbage, alfalfa, mangels, turnips, beets, and sugar beets. With the arrival of spring growth the birds had the liberty of the runways that had been seeded with a mixture of wheat, barley and oats. The Report for 1926, available at the Publications Branch, Department of Agriculture, Ottawa, further states that the summer scratch feed was changed gradually to five parts wheat to one each of cracked corn and crushed oats.

Guidance in Planting Street Trees.

During the hour of free discussion provided in the programme of the Convention of the Ontario Horticultural Association recently held in Toronto, the subject of street trees and their care received considerable attention. Speaker after speaker rose nhis place and made observations on the subject as it related to his particular district. It was generally agreed that both towns and cities are suffering from an over abundance of street trees. Both in urban and rural parts the opinion prevails that planters have been ever generous in providing the sapling and in setting them in the ground. In the rural districts the view of the landscape is in many cases almost cut off, while in the towns and cities and even i nthe villages, bordering shrubbery and flowers are impossible to grow. For rural planting the Ontario Highway Commission was commended for their wise spacing of roadside trees at seventy-five feet. At the conclusion of the discussion the Association unanimously accepted a resolution that is expected to put the Association in a position to give guidance to tree planters on streets and highways. Following is the resolutions:

WHEREAS the street trees in most urban districts have been planted without regard to their ultimate influence on general beautification ,and

WHEREAS civic authorities appear to need guidance in framing policies to govern the planting and care of street trees,

BE IT RESOLVED that the Ontario Horticultural Association appoint a committee to prepare recommendations on,

(a) Minimum planting distance;

(b) Desirable and undesirable varieties;

(c) Principles to be followed in trimming or pruning, and

(d) Policies for the removal of superfluous trees.

The recommendations to be approved by the Association at the 1929 annual convention and sent to all Horticultural Societies' Secretaries, urban municipalities and other organizations interested in urban beautification, and the press.

And that this committee consist of H. J. Moore, Secretary in Horticulture, Chairman; C. J. Symons, President of the Belleville Horticultural Society; J. B. Spencer, Ottawa; S. B. McCready, Toronto; and Professor A. H. Tomlinson, Ontario Agricultural College, Guelph.

Egg Hatching.

At the Experimental Farm at Agassiz, B.C., where so many world's records were made with high producing hens in 1926, some interesting hatching results were obtained in the spring of last year. They are detailed in the latest report of the superintendent, available at the Publications Branch of the Department of Agriculture at Ottawa, and, of course, apply mainly to conditions in British Columbia. Hatching commenced towards the end of February and was continued to the end of April. The percentage of fertility during March was 81.2 and in April 81.6. Of the total eggs set during March 41.6 per cent. hatched as compared with 41.4 per cent in April. Of the fertile eggs March recorded a 45.8 per cent hatch compared with a 50.5 per centt. hatch in April. Hen eggs were 82 per cent. fertile against a fertility of 72 per cent in pullet eggs. The number of chicks alive when wing-banded was 83.6 per cent. from hen eggs and 83.1 per cent. pullet eggs.

Influence of Clover on Crop Yields.

At the Central Experimental Farm tests were made to determine in a practical way the value of ploughing down clover as measured by the resulting increase in crop yields. An account of the experiments is given in a new bulletin on Manures and Fertilizers available at the Publications Branch, Department of Agriculture, Ottawa. Clover was sown in the spring with wheat, barley and oats at the rate of 10 pounds per acre. On the check plots the grain was sown without clover. When the crop of the following year was to be grain the plots were ploughed about the middle of October, but when corn or potatoes were to be grown the ploughing was done in the spring sometime after the middle of May when the clover had made a heavy growth.

The results in the case of grain showed that ploughing down the clover in the fall caused a remarkable increase in the yield of grain and straw for two succeeding crops. The increases for potatoes and corn when the clover was ploughed down in May, while not so pronounced as for grain, were quite large.—Issued by the Director of Publicity, Dominion Department of Agriculture, Ottawa.

Bird's Speed Seen as Due to Wings' Upstroke

Observer Indorses Views Held by Another Investigator After Studying Feathers; Act as Valves in Flight

Like Airplane Propeller Machine Is Able to Generate More Power and Thus Attain Greater Flying Speed

An article published in "The Rochester (N.Y.) Democrat and Chronicle" on the flight of birds, writes Edmond Redmond to that newspaper, reminds me of observations conducted for a long period under favorable conditions on the same topic. Experiments under the management of the British government with the humming bird to discover the secret of that bird's power to hover in the air without moving from the spot, have been admitted resulting in complete failure to master the secret, as the investigators found the speed of the bird's wings was too rapid for recording by the optical instrument which tells when the wings are moving 300 times in a second. But a more powerful glass is to be tried in hope that the mystery may be mastered.

An American investigator, George R. White, who is working on the subject of flight, has recently announced his belief that birds propel themselves forward in the air by the upward stroke of their wings.

This opinion has awakened much interest among observers who have been giving serious consideration to the problem, and has led to a line of investigation that may result in important progress toward the result for which so many are striving—the mystery of birds' flight.

Without any of the mechanical appliances and means with which investigatotrs under governmental control carry on their work with the birds, I have exercised my eyes on a thousand feathered subjects ranging in size from the wild goose to the humming bird, wfth countless intermediary units that are masters of aviation, including the long-winged gray plover and the short-winged quail. The plover nests within the Arctic Circle and passes the winter in South America; the quail nests in the temperate zone and is not inclined to go more than a mile for mits native field.

My observations on birds tend to confirm the opinion of White, that the upward stroke of the bird's wing assists to move it forward in the air. This view is based on the fact that the feathers in the wings are of such conformation that they automatically assume attitudes in flight that give the bird a point of resistance against which it can press the wing back and so get a falcrum, as it were, from which to move forward.

Examination of the master feathers of a bird's wing will show the web on one edge of the feather to be much longer, measured from the shaft, than that on the opposite edge. This formation of the feather seems to be a provision of nature whereby the wing operates as a combination of valves to open and shut as the wing moves up or down. When the bird launches itself into the air for a flight the wings are spread to give a bearing surface on the air beneath the wing.

The web on the lower edge of the feather rests against the shaft fo the feather above it and, being sustained by the shaft, forms a cloud valve through which the air cannot pass when pressed by the wing in its downward sweep. The air under the wing then becomes momentarily sustaining to the bird and prevents it from falling, for the stroke of the wing is so rapid that the air under it has not time to move away before the wing has imparted its impulse and reacted to support the bird in flight.

The onward motion of the bird which it obtains from the upward stroke of the wing, seems to be derived from the flexibility of the web on the lower half of the feather. The upstrokes of the distended wing tend to bind the web at an angle with the shaft, and the curve in the web affords a certain resistance to the air behind the bird, which necessarily moves in the direction of least resistance; that is, forward.

The action of the bird's wing is a succession of valve-like motions that open and close to let air through at one stage and shut off the air from passage at another point. Even birds which see mto be endowed by nature with wings of slowest motion, when observed are found to move the wings with celerity surprising to a person who tries to reckon wing strokes.

Casual observation of the gull and crow, the large birds most likely to come in view during the winter in this latitude, will confirm this elementary fact in aviation.

The propeller o fan aeroplane presses against the air in forward progress very much as the web of feathers in a bird's wing impringe when it is flying, and the result is practically the same, for the bird or machine is moved onward by the pressure of wings or propeller wheel against the air.

As more force is applied by the engine than it is in the power of any bird to exert, the airplane easily moves through space faster than a bird, but both of them depend for progress on the inability of the air to move away from wing of bird or blade of the propeller before motion is imparted to the source of power, be it gasoline engine or bird's muscle.

This seems to be the solution of the mystery that has long clouded the function of flight by birds. The fact that the feathers in a wing on which flight depends are sustained at only one end, leaving the outer end free to yield a little, has an effect to conform the ying in contact with the air into lines corresponding with the rigid surface of the airplane's propeller, so that a forward motion is given by the bent feathers in the down sweep of the wing as well as by the upward stroke.

Experiments along these lines may result in bringing the helicopter to a more efficient state than it has yet attained, a consummation to be wished. It would dispense with the long run required to get the airplane into the air and probably would lead to other important results in this infant industry—now, as it were, but in the nurse's arms.

Soviet Plans New Railroads To Tap Interior of Asia

Russian Lines in Operation Now Exceed the Pre-War Total, But Freight Carried Is Much Less

The efforts of Soviet Russia to be counted among the big railroading countries of the world are set forth in a recent publication by the New York Central Lines. Before the World War Russia had 42,500 miles of railway in operation. She was just then entering upon a railway-building era. But the war interrupted the program, and before peace was established a quarter of the trackage had been destroyed, including nearly 8,000 railway bridges. By 1921 only a few hundred serviceable locomotives were left. Freight cars had been commandeered for homes or split up into firewood. The cushion covers from passenger cars were worn on men's backs and the seats were used as household chairs.

Recently, however, the mileage has been increased to 450 miles past the 1914 figure. Eight new short lines have been laid, and work has begun on plans for opening up new territory. A few American locomotives have been bought as models, and delegations are being sent frequently to the United States to study operation methods.

The Diesel electric engine has appeared, and two new bridge-building plants are projected. Half Russia's old bridges will have to be replaced within the next five years, it is calculated.

Siberia is the scene of most of the new constructon work. One line on which work is progressing in Southern Siberia, largely for the purpose of tapping mineral resources, will run 1,250 miles. Another line, to connect Semipalatinsk, in the heart of Asia, with Tashkent in Turkestan, is intended to open up regions where no people except wild tribes now live and to bring cheap grain from Siberia to the cotton belt of Turkestan, with the design of so developing the cotton industry. Thirty miles of this line were laid last Summer and sixty in the Fall.

Russia has also shown a tendency to bid for more passenger traffic by advertising the cheapest and quickest route from Europe to China, offering one train a week over the Trans-Siberian line, making the journey from Paris to Vladivostock in thirteen days. This train's run from Moscow to Vladivostock has been reduced forty-eight hours in the last two years.

The 1,000,000 men now employed on Russian railways represent almost a 50 per cent. increase since 1918. A great many more passengers are recorded, too, the 184,000,000 total for 1913 increasing to 211,000,000 in 1924-25 and to 262,000,000 last year. Freight tonnage(on the other hand continues much below the 1913 figure.) It took 33,000 freight cars a day to handle 156,900,000 tons in 1913, whereas last year 27,489 were used daily to handle 66,900,000 tons.

Too Many Don'ts Spoil the Child

That is Scientists' Warning to American Parents

Chicago—The word "don't" is one of the most harmful in the language to say to a child, scientists said recently.

The less he hears "don't" the better will his character develop. A parent who continually thunders the word at his young son may expect to find him, at the long trouser stage, a weak, spineless youth facing life with little more than a big collection of inhibitions.

"Let him find his mistakes by himself," is the formula that Dr. William Kilpatrick of Teachers College, Columbia University, offers to parents who would rear their children to become "men of destiny."

Speaking before the midwest conference on character development, Dr. Kilpatrick urged parents to let their children begin facing the battles of life at an earlier age.

"It won't do the growing boy any good to tell him not to fight with other boys in the strees," he explained. "Let him scrap; let him get licked—and he will exercise more caution in choosing his next adversary. Each time you say don't, you are pushing him a step nearer to nambypambyism."

"A baby, no matter how small, doesn't have to be told not to put its hand on a hot stove, once it has been burned," he pointed out. "It is all right to warn a child o the consequences are apt to be disastrous; but in most cases it cannot learn to appreciate danger except by dipping its finger into it."

Dainty Fish Dishes

Even those housewives whom time has innured to the general wail that arises every Friday do not scorn a new way to prepare the same old fish. And those who still dread the approach of fish day welcome it.

Here are some recipes that have been tried out in the "Delineator" Home Institute and found decidedly worthwhile:

Spencer Fillet of Sole.

"Dip one pound of fish fillets in one-half cup of milk, which has been seasoned with one-half tablespoon salt, and then into one cup bread crumbs. Place on a greased baking sheet and sprinkle with two tablespoons olive oil. Bake in a very hot oven, 600 degrees, for ten minutes. Serve with lemon butter cups, made by creaming four tablespoons butter, adding four teaspoons lemon juice slowly, and when wel mixed stirring in two teaspoons minced parsley. Chill and serve in lemon cups. These cups can be made by removing the pulp from small halves of lemons and cutting the ends to make them stand.

Curried Fish Slices.

"Mix one teaspcon curry powder, one-half teaspoon salt, one-quarter paprika, and two small onions minced with two tablespoons butter and spread over one pound of fish steak in a baking fish. Add fish stock or water to half cover the fish, with a bay leaf and one tablespoon vinegar. Bake at 450 degrees, basting often.

Clams Velonte.

"Melt three tablespoons butter, add one sliced onion, one tablespoon minced parsley and four teaspoons flour; when smooth stir in one-half cup cream and cook until smooth and creamy. When ready to serve add one teaspoon Worcestershire sauce, one-quarter cup clam juice and one and one-half dozen steamed clams and heat. Serve with buttered toast sticks."

Spring Hats Are Varied

Indications of Spring styles in millinery, as seen in the early offerings for the Southern resorts, have crystalized into modes that are now being accepted in this market by the general trade. Basic fabrics remain the same as those of the resort lines, as do other materials which, in previous seasons, would have fallen into the category of trimmings. This season, through artistic manipulation, they have become an integral part of the hat.

There is word from Paris that cellophane has already passed the crest of its popularity in millinery, probably due to its exploitation there to other forms. This will not necessarily affect American offerings, according to a bulletin prepared for the Rettail Millinery Association of America by Mme. Zayda BenYusuf, its fashion director. The high lustre of the material is of considerable style value in combination with felt or dull-surface straws.

"Irregular brims continue to show new intracacies," the bulletin goes on. "Both narrow and medium brims are frequently wired. Brimless hats assumed new interest through treatment. Ear tabs continue in popularity. However, they have lost angularity, especially in the case of flower toques. Both interesting and new is the melon-shaped toque, which is worked out in wide, high-luster straw braid and other materials.

"There appears to be some consumer hesitation in accepting the nose veil, the tiny net eye veil being more readily taken up. So far these have been exclusive offerings, they hold a hint of general conditions for this Autumn."

Ski Line View of Canadian Metropolis

Montreal, Metropolis of the Dominion of Canada, is so fortunate as to possess a great natural playground in the heart of the city so that it is but a few steps from the everyday matter-of-fact world of trade and commerce into syivan retreats. Mount Royal possesses attractions in every season of the year and for every age. In winter time it affords numerous paths for the ski enthusiasts, providing level ways for the leisurely and swift runs for those who want thrills. Mount Royal has the further distinction of being forbidden to the automobile at all times. From the point where the camera man has found the ski pair resting a wide view of the city and the sourrounding district is obtainable. Manufacturing plants vie with the spires and just to the left of the middle distance the fame of Notre Dame contrasts with a vast grain elevator. At the right may be seen the great Victoria Jubilee Bridge connecting the Island of Montreal with the South shore, crossing the St. Lawrence now covered with its winter mantle of ice and snow.—(Canadian National Railways photograph).

Assam teas are known by experts as the finest teas grown—a fact which explains why Red Rose Orange Pekoe has become so deservedly popular in Canada. For Red Rose Orange Pekoe is chiefly composed of Assam teas, which accounts for its distinctive quality and value. Every package guaranteed. 1-3

The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhea; or need to aid sound, natural sleep.

Just one warning: it is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

Airmindedness

It is hard for the schools to keep their feet on the ground these days. This is to be taken literally. Eighty superintendents were recently summoned into conference by the Guggenheim Fund for the promotion of aeronautics to devise a program of air education.

The American public has not progressed rapidly enough in the direction of airmindedness to satisfy the aviation enthusiasts, so they are going to start with the children. And only one superintendent out of eighty in the larger cities of thec ountry made any objection. So reads the announcement from the fund headquarters.

Again the three Rs will be asked to stand in a corner while part of their allotted time is taken away from them. When railroad trains were introduced—or, again, when horseless vehicles running on rubber were offered to the public—no organized propaganda sought to inculcate the truth about these new modes of transportation in he mnids of boys and girls.

Aviationis not held back by anything more serious than the "Git a hoss" prejudice of the late '90s. The apostles of the new art are in a hurry. Every schoolboy knows the essential facts of Colonel Lindbergh's demonstrations. More performances of a similar nature will turn the trick of making the next generation airmnded without any studiously devised additions to an already overburneded curriculum.—Journal of Education

Prodigious megalithic monuments, temples of cannibal feasting and burial, which Lieutenant P. J. Searles, U.S.N., lately visited in Guam and on the island in the Ladrones 125 miles north, are by the publication Nature called comparable to the mysterious Stonehenge in England. Each upright monolith weighs thirty tons.

NEW STRENGTH FOR ALL WEAK GIRLS

Comes From the Rich, Red Blood Made by Dr. Williams' Pink Pills.

There must be no guesswork in the treatment of pale, anaemic girls and children. If your daughter is languid, has a pale, sallow complexion, is short of breath after slight exertion or on going up stairs, if she has palpitation of the heart, a poor appetite, or a tendency to faint, she has anaemia—the medical name for poverty of the blood. Any delay in treatment may leave her weak and sickly for the rest of her life. When the blood is thin and watery give Dr. Williams' Pink Pills, coupled with nourishing food and gentle out-of-door exercise. The new, life-giving blood which comes from a fair use of Dr. Williams' Pink Pills, increases the appetite, stimulates the nerves and brings a glow of health to pale cheeks. Mrs. Robert Jackson, R.R. No. 5, Shelburne, Ont., praises this medicine for restoring her daughter's health. She says:—"When my daughter was nine years old she was so weak and thin that we feared we would lose her. She was very nervous, and going to school seemed too much for her. Often she would have to stay at home for days at a time. At times she would have a very high fever, and the doctor's treatment did not help her. I tried several remedies, but with no good results. One day a friend advised me to give her Dr. Williams' Pink Pills, and I did so. It was not long after she began taking the pills that I could see a change for the better. She kept on taking the pills for several months and through them grew into a strong, healthy girl. Since then, if a tonic has been needed at any time, it has always been Dr. Williams' Pink Pills."

The pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

U. of T. Uses Radio

Series of Lectures Are Broadcast by Arrangement with CNRT by the University of Toronto

It may not be known to the public generally that the University of Toronto, the Provincial University of Ontario, is serving them through a new medium, namely, the radio. In conjunction with CNRT, which broadcasts on a wave length of 356 metres, a regular series of short talks has been arranged. These regular programmes began two years ago and among those who have spoken during the present academic year, which began last September, are Professor Davis, of the English Department, University College; Dr. Martin, of the Chemistry Department; Professor MacKenzie, of the Law Department; Professor Coleman, Professor Emeritus of Geology; Professor McIlwraith of the Royal Ontario Museum, Professor Sissons, of Victoria College; Professor Parkin, of the Department of Mechanical Engineering; Professor C. H. C. Wright, Department of Architecture; Mr. Iliffe, Department of Industrial Art; and Mr. W. J. Dunlop, Director of the Department of University Extension and Publicity. The subjects have ranged from "The Ice Age of Ontario" to "Peculiar Peoples of the Canadian West." Those who have missed these brief but instructive and interesting addresses have a chance to tune in on the March programme. On March 2nd, Mr. W. J. Dunlop, Director of the Department of University Extension and Publicity spoke on "The University as a Public Servant"; on March 16th, Miss Gladys Wookey, one ff the most popular members of the English staff at University College, will put her radio listeners into the proper mood for St. Patrick's Day by readings from Irish poetry; and for March 30th Mr. W. J. K. Harkness of the Department of Biology has chosen for his subject "The Conservation of our Fisheries." These broadcastings from CNRT begin at 9.30 p.m.

Income Tax

Le Devoir (Ind.): (The Government persist in refusing to see a difference between revenue earned by one's own efforts and family inheritance.) Surely this is unjust to the salaried man. He is treated by the Revenue Department as though he were a sort of capitalist, whereas the majority of the salaried classes have no capital a tall. Their salaries, in practically every case, cease as soon as they stop work, whilst taxpayers who have incomes from estates or inheritances continue to receive these, whatever their state of health and regardless of whether they work or loaf. The Finance Department should pay attention to this matter.

Copenhagen biologists who have investigated the rotary habits of the underjaws of Danish cows chewing their cuds find 55 per cent. used the right-circular motion and the rest the left. Now they ask for observation of American cows.

"So the judge fined you fifty dollars for hitting your wife with a golf club?" "Oh, he said it wasn't so much for hitting her as it was for using the wrong club!'

On fishing trips take Minard's.

Samoan Unrest

The news of disaffection among some of the native population in Samoa, sufficiently grave to cause the New Zealand Cabinet to send two cruisers to the mandated territory, came unexpectedly. For while Australia appeared to be having a good deal of trouble in administering ex-German New Guinea under the mandate system, New Zealand was credited by independent evidence with doing very well in western Samoa.

The appointment of General Richardson, the most popular officer in high command in the New Zealand Expeditionary Forces during the World War, proved a decided success. For a time restrictions on the use of liquor by the Europeans in the interests of the natives tended to make the authorities unpopular, but that difficulty seemed to have passed away.

Education has been progressing among the natives, who are being instructed in their own language as well as in English. The native villages under the mandate have been kept in a more healthy condition than those in either Fiji or Tonga, and the native population has actually been on the increase. Yas, a disease endemic in Samoa for many years, has been almost wiped out by inoculation.

It was to be expected that New Zealand would be successful in Samoa, for she has had experience in administering her own native race, the Maoris, who are closely allied with the Samoans, and who live on the most friendly terms with the whites. Most of the trade has been captured by Australia and America, and New Zealand has certainly not been profiting by the administration, but has been doing her best as a matter of honor.

Subsequent dispatches indicate that white and native Samoan police, covered by naval parties from the two cruisers, had arrested 150 members of an illgal police force who had been parading about carrying big sticks in an effort to prevent natives buying goods in the stores of Europeans. It is to be hoped that this will put an end to the disturbance.

MARCH WEATHER DANGEROUS TO BABY

Our Canadian March weather—one day bright, but sloppy, the next blustery and cold—is extremely hard on children. Conditions make it necessary for the mother to keep the little ones indoors. They are often confined to overheated, badly ventilated rooms and catch colds which rack their whole system. To guard against these colds and to keep the baby well till the better, brighter days come along, a box of Baby's Own Tablets should be kept in the house and an occasional dose given the baby to keep his stomach and bowels working regularly. The Tablets are a mild but thorough laxative which never fail to regulate the stomach and bowels and thus they relieve colds and simple fevers and keep the baby fit. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Only Under Pressure.

"Did she finally consent to let you kiss her?"

"It took considerable pressure to make her yield."

Alberta Coal

Edmonton Union (Ind.): The movement to get Alberta coal on to the markets of the East and thus to eliminate American coal is praiseworthy but difficult. . . . Without taking into consideration Nova Scotia coal, which will look on this movement with some jealousy, but which will, no doumt, be ready to come to terms, the fact remains that for Alberta coal the Western producer and the Eastern consumer are 1,500 miles or more away from each other, and must dely on the railway as their only means of transport. Yankee coal, on the other hand, is eight to ten times nearer and can be carried by water. In consequence, supposing a fight to the death started, Yankee coal could always reduce its sale price lower and lower and in the end come out on top. There would only be one way out—to put up a prohibitive tax on American coal.

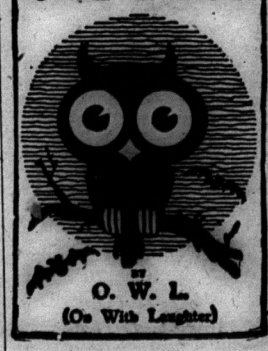
RED ROSE TEA "is good tea"
Red Rose Orange Pekoe is the finest tea in the best package—Aluminum

OWL-LAFFS



BY O. W. L. (On With Laughter)

No man ever needed the services of an occulist to enable him to see his neighbor's duty.

The man who made Time made a lot of it.

There is no substitute in the round world for being square.

He—"Do you really think there is danger in kissing?"

She—"Wait till I go to the stairs and listen if papa is asleep or not."

When the slick salesman attempts to sell you some get-rich-quick stock, it might be well to remember that really good investments do not have to be peddled.

"What did mama's little baby learn at school to-day?"

"I learned two kids not to call me 'mama's baby'."

"What did your husband think of your new frock?"

"My dear, he claped his hands—"

"Splendid!"

"—Over his eyes."

"Dad, you remember you promised to give me five dollars if I was a good girl at the party?"

"Yes, Mary."

"Well, dad, you won't have that expense."

What's His Due?

Give the devil his due—very well then, but who
Can be found who can clearly define it?
Should I give him what I think is due the vile guy
I am positive he would decline it.

A Scotaman was missing for three days before the police department finally located him in a "Pay-as-you-Leave" street car.

Asylums have to be maintained because so many folks are just what they're cracked up to be.

A man was smashed up in a railroad accident The family received a wire saying: "Mr. Hess in railroad wreck. Both legs, both arms, back and neck broken and skull fractured." And a few hours later a second dispatch arrived: "Not so bad as at first reported. One arm was not broken."

"There are two sides to every question," proclaimed the wise man.

"Yes," said the fool, "and there are two sides to a sheet of flypaper, but it makes a difference to the fly which side he chooses."

Use Minard's Liniment for Corns.

PAINS ALL OVER BODY

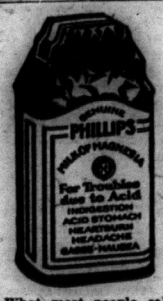
Two More Cases of Feminine Illness Relieved by Lydia E. Pinkham's Vegetable Compound

Barrington, N. S.—"I had terrible feelings, headaches, back and side aches and pains all over my body. I would have to go to bed every month and nothing would do me good. My husband and my father did my work for me as I have two children and we have quite a big place. I read in the paper about Lydia E. Pinkham's Vegetable Compound, and then got a little book about it through the mail and my husband sent to Eaton's and got me a bottle, and then we got more from the store. I am feeling fine now and do all my work and am able to go out around more. I tell my friends it is Lydia E. Pinkham's Vegetable Compound that makes me feel so well."—Mrs. Victor Richardson, Barrington, Nova Scotia.

Dull Pains in Back

St. Thomas, Ont.—"I took four bottles of Lydia E. Pinkham's Vegetable Compound and found great relief from the dull, heavy pains in the small of my back and the weakness from which I suffered for five years after my boy was born. After taking the Vegetable Compound and using Lydia E. Pinkham's Sanative Wash I am feeling better than I have for the past seven years, and advise my friends to take it."—Mrs. F. Johnson, 49 Moore Street, St. Thomas, Ont.

Indigestion



What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude way. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggists.

COST OF RAISING PIGS TO WEANING AGE

The production of pork forms one of the more important lines of animal industry on the farms of Canada, as is shown by the fac that in 1926 there were 4,470,771 pigs in Canada. While the raising of hogs is thus receiving considerable attention at the present time, there are many farmers who do not appreciate the impor.ance of this branch of animal production. Pigs are economical producers of meat when fed skim-milk, whey, garbage, grain and other products and by-products of the farm. In fact they are inseparable from the most successful operation of dairy farms except where the whole milk is sold.

The keeping of hogs is always associated with a we'l balanced and progressive agriculture.

For the economical and successful raising of pigs, the value of good sows as to type and prolificacy cannot be over-emphasized. Careful feeding and proper care are also very important if the best resul.s are to be obtained.

At the Dominion Experimental Station, Kapuskasing, Ontario, where a number of pure-bred Yorkshire sows of good type are kept, the breeding records as well as the total amount of feed consumed during each of the following periods are recorded. (1) from weaning to farrowing; (2) from farrowing until the pigs are weaned.

During the four years, 1924 to 1927 inclusive, six hundred and thirty-five pigs were raised to weaning age. These represented seventy-nine litters, an average of eight pigs per litter. Over a period of 193 days, the average number of days from weaning to farrowing, each sow consumed an average of 1159 pounds of grain. This, plus a small charge for pasture, cost $23.55. From farrowing until the pigs were weaned, a period of 58 days, the sows consumed an average of 696 pounds of grain plus some skim-milk, which cost $14.72 per sow. When $2.00 is added for the service fee, it is found that the service and the feed cost of the sow and her litter is $40.27 from the time the last litter was weaned until the next litter is ready to wean. Therefore the average cost of the pigs at that age is $5.03 each.

The number of litters farrowed per sow each year, as well as the number of pigs in each litter, are two factors which greatly influence the cost. It is also true that every time a nursing sow loses a young pig the cost of the others is relatively increased. A. Belzile, Dominion Experimental Station, Kapuskasing, Ont.

GETTING YOUR NAME IN THE PAPER

Small-town folks don't really know how lucky they are. To get your name in a big city paper, you have to get shot up by a bandit, knocked flat as a pan-cake by a flivver, marry a movie star or be left a legacy of $50,000. Getting your name in a country paper is a "cinch." All you have to do is have some out-of-town person in for dinner, go away from one train to the next, have a baby at your house, buy a purebred rooster, play as a "sub." for the hockey team or build an addition to your back woodshed. Again we say: "Small town folks don't really know how lucky they are."—Exchange.

VIMY BALL AT PICTON

Invitations are now out for the Vimy Ball in Picton Armories on Easter Monday, April 9th, under the auspices of the officers of C. Company Hastings and Prince Edward Regiment. They have been fortunate in securing as an orchestra Harold Rich-Morris London Versatile Canadians who play regularly at the Palais Royale, Toronto, and who are broadcast over C.F.C.A.—Canada's premier dance organization. Invitations may be secured from Lieut. T. Rupert, Madoc, Ont.

When a newspaper invites a merchant to take space in its columns it is the act of saying: "Come with me and I shall introduce you to my thousands of friends in this town, my daily companions who honor me with their confidence and to whose interest I devote my life."

OBITUARY

RALPH McGHEE

The death occurred on Tuesday Mar. 13, at his late residence, Alice Street, of Mr. Ralph McGhee, following a lengthy illness from cancer.

The deceased was born 56 years ago in Madoc Township, coming to North Hastings about twenty-five years ago following the occupation of lumbering and mill man. For the past twenty years he has been a resident of this village, highly esteemed as a neighbor and citizen.

He leaves to mourn his loss his widow and three sons, Norman, Roy and Malcolm, all of town, and a wide circle of friends.

The funeral took place March 15th, to St. Paul's United Church. Rev. R. Stocker conducting the service. Interment in Mount Pleasant cemetery.—Bancroft Times.

The late Mr. McGhee was a brother of Mr. Robert McGhee, of town.

WILLIAM PYE

William Pye, a well known resident of this city and district for many years, passed away at the home of his son, Gordon Pye, 132 McNulty Boulevard, Hamilton, recently. The deceased had been in ill health for a short time and the news of his death came as a great shock to his many friends in this city.

The late Mr. Pye was born in Actinolite, 70 years ago, being the son of the late Mr. and Mrs. William Pye, and until moving to Hamilton had spent his entire life in this community. He was a member of the United Church and leaves to mourn his loss, four sons, Gordon, Williams, Stanley and Stewart, all of Hamilton; two daughters, Mrs. Leslie Yerex, Trenton; Miss Verna at Hamilton; two brothers, Richard Pye, of Stirling; John Pye, of Actinolite and two sisters, Mrs. Louise Sexsmith, Actinolite and Mrs. Annie Sample, Saskatchewan. The funeral was held in Hamilton and interment made in Hamilton cemetery.—Belleville Ontario.

AMELIA ROWE

An appalling gloom swept over our community on Friday, Mar. 16, when the sad news was spread of the death of Amelia Shore, relict of the late Will Rowe, aged 38 years, 3 months and 18 days. The deceased had not been in the best of health for some little time, but she took suddenly ill Wednesday night, about the midnight hour. Thursday she grew worse and a doctor was called. She was immediately rushed to Belleville hospital where an operation for appendicitis was performed at 2 p.m., but medical aid was of no avail and she passed to the Great Beyond about twenty-four hours later on Friday, March 16th, to be with her dear husband, who predeceased her about eleven years ago. Since that time she has made her home with her brother-in-law, Mr. Harold Rowe, and as he follows the profession of cheesemaking, they were living at Central factory. Mrs. Rowe had a large number of friends here as well as at the Stirling factory, and she will be greatly missed as she was a loving and devoted mother and a very kind neighbor. She leaves five children to mourn her loss: Nellie, (Mrs. Murney Scott) Laura, Douglas, Delbert and Harold, and one brother and three sisters, Arthur, of Stirling; Lily, (Mrs. Robert Gordon) of Niagara; Sarah, (Mrs. Wannamaker) of Madoc, and a sister teaching in the west. The beautiful floral tributes of daffodils, carnations, roses and large calla lilies were mute testimony to the respect of the life that was gone.

The funeral service was held in Mount Pleasant church on Sunday afternoon and the large crowd that assembled from Stirling, Bethel and Carmel and distant places filled the building to capacity. Potted plants were arranged on the piano and eight young men acted as flower-bearers and Mrs. George Weaver assisted in arranging the flowers at the front of the church. Rev. Fred G. Joblin had charge of the service and he offered a sincere prayer for the bereaved and read the 23rd psalm.

Owing to the inclemency of the weather a portion of the burial service was read in the church while the vast congregation remained seated and then the remains were placed in the vault, later to be taken to Eldorado and tenderly laid beside her husband.

Belleville is to have, in the near future, a Society for the Prevention of Cruelty to Animals, or Humane Society under the direction of lovers of animals who do not want to have dumb brutes mistreated.

Re-roof this Year with RIB-ROLL

the Permanent Roofing for Barns, Houses, Sheds

LOW in initial cost... comes in big sheets—easy and quick to lay... permanent... leak-proof... handsome in appearance. Prevents fires... increases value of property. Made of famous "Council Standard" galvanized sheets. Give size of roof for free estimate. Write to:

Kingston, March 23—The strike of students of Queen's University was called off at a mass meeting of the students today. The strike had been in force for little more than a day in protest against the suspension by the Senate of students who had attended a dance.

BELLEVILLE MARKET

SATURDAY

To-day's sunshine brought the farmers out with their wares and the citizens of Belleville to purchase.

It was a busy scene this morning on the market and the farmers report that today has been the best day since Christmas. Maple syrup was on the market for the firs time this year. It was present in abundance and sold at various prices, the cheapest selling at 65c the quart or $2.50 the gallon. Only one vendor had it for this price however, most of them being able to dispose of the spring delicacy at 70c and 75c the quart without any difficulty. The latter price was the most staple.

In the vegetable section of the mart cabbages sold at 5c and 10c a head, turnips 30c the peck, parsnips 40c a peck, onions 60c and 80c the peck and carrots 40c the peck. Leeks were selling at 10c a bunch and sage at 5c a bunch.

Vegetable oysters sold at 10c. Potatoes sold from $1.25 to$2.00 a bushel. Wholesale price was $2.00 a 90 lb. bag. Apples were also various prices, asking from $1.00 to $2.00 a bushel. Beans sold at 15c a quart, beets at 40c a peck. Hay was $12.00 a ton and wood sold at $5.50 a load. Popcorn wanted 15c the dozen.

Side of pork could be had for 15½ cents, with the back 16c and the front selling at 15c.

Amber colored honey could be bought at 60c the tin and the white at 70c the tin.

In the fruit line lemons were selling at 30c the dozen, oranges 30c 50c and 60c the dozen and grapefruit 10c each.

Dairy produce was cheaper, that is, in the egg line the price was cheaper, eggs selling at 30c the doz., which is a decrease from that of last week. Butter was steady at 85c the 2 lb. roll.

DETLOR

(Intended for last week.)

Mr. Bailey's house and practically all the contents were destroyed by fire on Sunday, March 4th. Sympathy is extended to them and the neighbors are assisting in replacing part of what they have lost.

At the last U. F. O. business meeting, people whether members or not, elected Mr. Lorne Thompson as salesman, instead of Mr. M. McLean, who has served the club for some time past.

Mr. Rob Blakely, of Bannockburn, is staying for a time at the home of Mr. Frank Bradshaw, apparently engaged in helping to cut timber and pulpwood.

Owing to bad roads the expected social evening given by the U. F. O. Club was postponed indefinitely.

The R. R. section staff have the B. B. B. line opened up, and the train was in twice during this week and once last week to loading points east.

There is strong talk of several mining properties being opened up and developed this spring, if it is not all talk.

TRINITY UNITED CHURCH

Minister, Rev. G. W. Rivers

Sunday, April 1st

10 a.m., Sunday School and Bible classes.

11 a.m., Quarterly Communion Service, Subject "Following—Near or Far."

OBITUARY

MRS. CHARITY ANN WALKER

Mrs. Charity Ann Walker, an aged lady, passed away in Thurlow at an early hour March 26th.

The deceased was born in the township of Madoc seventy-nine years ago and had lived in this vicinity all her life. During her life time she was employed as a housekeeper. The deceased lady was a daughter of the late Mr. and Mrs. Marshall Bidwell Schrimshaw, of Tyendinaga.

MRS. FOSTER

In the death of Mrs. Phoebe Ann Foster, widow of the late J. G. Foster, which occurred Saturday, March 24th, at the home of her daughter, Mrs. H. E. Hudson, of Denholm, Saskatchewan, Moira lost a former resident who was always held in the highest esteem in the community. She was widely known and had been an active worker in the church and community affairs until her removal to the west about twenty-five years ago. News of her death came as shock to all who had known her.

Mrs. Foster was in her 81st year. She had not enjoyed the best of health for the past six months and only a week ago suffered a stroke of paralysis which was the direct cause of death.

The late Mrs. Foster was a daughter of the late Jacob and Matilda Salisbury, of Moira, and lived in that community until about twenty-five years ago when she and her husband went west to live at Myrtle, Man., and later at Denholm, Sask. Mr. Foster predeceased her fourteen years.

Surviving are three sons and three daughters, Mrs. H. E. Hudson, of Denholm, Sask.; J. B. Foster, of California; Lorne, of Denholm; Mrs. W. Allison, of Toronto; Mrs. G. Pereman, of Columbus, and George F. Foster, of Oshawa.

The remains will be brought to Moira for burial accompanied by Mrs. Hudson and the funeral will be held at Moira Church and the interment at Moira Cemetery, probably on Friday as it is expected the body will reach Moira on Thursday. —Belleville Intelligencer.

ROD AND GUN

Outdoor taste is well catered to in the April issue of Rod and Gun and Canadian Silver Fox News which is just published. The latest issue of this sporting magazine contains an interesting collection of stories of hunting, fishing and camping as well as many useful and informative articles concerning the various phases of outdoor life.

Helpful articles on the special subjects are included in Fishing Notes, edited by G. P. Sladen, Guns and Ammunition, edited by C. S. Landis, and Kennel, edited by C. G. Hopton and L. E. L. Taylor. The Canadian Silver Fox News section also contains useful articles both in English and French on the latest developments of the industry and the care and management of foxes.

Rod and Gun and Canadian Silver Fox News is published monthly by W. J. Taylor Limited, Woodstock, Ont.

Dame Fashion Decrees Style

Martha Says Up—Molyneux Says Down and Other Couturiers Say "Stay Just Where You Are"

Parish—Parisian courturiers are predicting a return to elaborate feminine fashions as a result of this season's showing of new fashions for the spring. Perhaps the wish is father to the thought for the, boyish simplicity fashionable for some time is not highly favorable to clothes extravagance. However that may be, they predict fluffier and more perishable garments and a total departure from the present distressing informality which enables a woman to appear in what is practically a sweater and a pleated skirt at all hours of the day or evening.

For evidences of this change in fashion the commentator points to the long hair of the American debutante and the success of Louise Boulanger's picture frocks.

For this dressmaker may be credited with a real renaissance of the mode. Working quietly for two or three years with a certain following the house gained an international success about a year ago with the type of evening gown which remained low waisted, but which replaced the skimpy skirts of the jazz age by graceful, full draperies which dip at back almost to the floor.

Madeleine Vionnet is another creator who has worked for the feminizing of fashion in a very modern way. Mme. Vionnet presents no plea for the return of high busts and tight waist lines but successfully rebelled against the "chemise" dress cut from two straight pieces and tied like a sack somewhere below the hips.

There are houses younger than these and houses a great deal older which have renewed their prestige, which have united this season in an effort to diversify line, to reinstate afternoon dresses, to relegate sports clothes to a definite niche, to revive formal materials and really to change the silhouette.

1880 Inspiration

Commenting on 'his collection, which comprised more than 400 models, Jean Patou admitted frankly taking inspiration from the period of 1880. Doing this, the results are quite different from our grandmothers' clothes, but his gesture of credit can be explained by little ruffled tiers that circle skirts and curve up toward the back, by draperies on evening gowns which hang at back in faint suggestion of bustles, and especially by the use of stiffer fabrics —satins, taffetas and moire.

Even in this choice of colors, a vivid red like sealing wax and an intense strong green are equally removed from the neutral beiges and bois de rose and the soft pastel tones which have distinguished recent collections of the house.

One of the greatest changes in the silhouette from that, say, of two years ago, for silhouettes never change radically from one season to another, is that of the satin or taffeta evening gown with a big rdapery of the crisp fabric over one hip, such as a butterfly bow or a big puff. Patou is one of several houses of authority to sponsor this outline.

Widening Sleeves

Lucien Lelong is another important dressmaker to proclaim approval of feminine fashions. Indeed, this couturier says definitely that the post-war period is over, that jazz is deadand that we have returned to the conventionalism of a conservative epoch. In the Lelong collection, an important place is accorded afternoon dresses and ensembles, lines are softened by bias cuts, tailored collars on coats replaced by graceful ends of fabric knotted to hang down the back, and sometimes the sleeves of coats depart from the simplicity of straight lines and widen below the elbow.

The waistline has been left out of this discussion, and this is because the waistline is still in the hands of the enemy.

Skirts are longer, a little for daytime and a lot for evening; skirts are fuller, decidedly; and clothes are softer, but only a few bold designers have dared to insist upon the higher waistline. There woman's comfort is threatened, and there, too, her grace of figure, for many of the women who can afford to buy clothes at smart dressmakers no longer have waistlines to define.

Natural Waist Lingers

The belt has unquestionably climbed a little higher, but most couturiers are clearly of the opinion it will take us another year or two to reconcile ourselves to the "natural curve."

Worth is the most courageous of all the big dressmaking houses, as many of his models have aw aistline indicated almost at normal. In his brochure describing his new collection, Jean Charles Worth says that some of the new clothes are reminiscent of the periods of 1830 and 1840, and goes on to explain just what this is, for the sake of those in the fashion business who do not know their history.

This, it seems, was a period between two hoop skirts, so to speak; and just before we burst forth into the crinolines which distinguished civil war days in America we contented ourselves with all sorts of flounces and tiers and ruffles to give our skirts the volume that the styles of the time required.

Puff Draperies Return

Sometimes this fullness is massed toward the back in big puff draperies; particularly effective when done in flowered taffeta with long points dipping the hemline at back. Even for the simpler daytime clothes the house of Worth mounts the girdle almost to the natural curve of the figure.

Molyneux, on the other hand—and this is also a house with authority in the fashion realm—is not yet converted to the higher waistline and, although subscribing to the dictum of the fuller skirt, likes to mount it on a flat hip yoke, a line undoubtedly becoming to the woman whose weight is beginning to trouble her.

All of which goes to prove that 1928 promises to be the most interesting year since the war from the viewpoint of evolution in fashion.

Dominion Wealthy

Canadians Buy Many Bonds in Own Industries

Toronto.—The appointment of four Canadian members to the directorate of the Noranda mine and smelter is not the only evidence of increasing wealth within the Dominion.

Not only do Canadians now hold the controlling intetrest in Noranda, but also they hold about 65 per cent. of International Nickel, while they have kept the control of Massey-Harris within the Dominion, and just now they have made sure that the British Empire Steel Corporation shall be kept chiefly in Canadian hands.

In 1927 Canadians purchased their own bonds to the value of $305,461,186, while United States investors bought the bonds issued by the Government, the municipalities, corporationsh and railways of the Dominion to the extent of $300,304,547. At the present time it is estimated that Canadians now own over 70 per cent. of their own Government and municipal bonds, in comparison with the mere 40 of such securities that they held immediately before the outbreak of the war.

At the same time, this country's investments abroad have increased until they are now estimated to be worth $1,200,000,000. These investments are chiefly in South America, the West Indies and the United States, although a considerable amount has been placed also in Europe.

The increasing interest in the development of their own country's resources as well as in the money-making possibilities of other lands has been due to the rapidly expanding aggregate income of the Dominion. The totatl Canadian wealth from all industries last year is estimated at $5,755,900,000, or $100,000,000 greater than the aggregate earnings of 1926.

Keep Minard's in the Medicine Chest.

IF YOU DRIVE YOURSELF

Relatively few people, it would seem, become expert drivers in every particular. No matter how skilled a man may be in handling his car, there is usually something he does wrong. He never gets the knack of easing his clutch in for a smooth start, he crashes his gears when shifting them, he accelerates unevenly or in some other way subjects his car and his passengers to unnecessary wear and tear. And that's the least of the matter. Serious accidents often result from the ignorance or incompetence of drivers in what, under ordinary conditions, appear to be little things.

Take, for instance, the practice of throwing the clutch out before applying the brakes. A careless driver does this some day on a slippery street, his brakes are not obsolutely equal, and a skid results. It may mean anything from a crumpled fender to a crushed-out life.

All drivers are supposed to know that skidding may be prevented, even if the brakes are not in perfect adjustment, by alternately applying and relieving the braking pressure while the car is still in gear. The clutch needn't be thrown out until the car has almost stopped moving. Many drivers, however, appear to forget this, or their anxiety about stalling makes them throw the clutch out too soon. If the latter, they should overcome anxiety with practice. Any one can learn the trick of braking down gradually if he'll only get out on a back road somewhere and try it a few times.

Starting on a Hill

There is, too, the business of starting a car up a hill. It is surprising how many otherwise competent drivers use the foot bake under these conditions. They race the engine, let in the clutch, and release the brake. Maybe they start with a frantic jump, and bump the car ahead, or maybe they stall and roll into the car behind. About the best one can hope for from this method of starting on a hill is a jerky, uneven get-away that puts an unnecessary strain on the engine and gears. It is possible, however, to start smoothly up a grade if the driver will use his emergency brake instead of the pedal. By holding the former in his hand and easing it forward as he lets in the clutch with one foot and feeds the gas with the other, he can move from a stationary position without jumping at all or rolling back a fraction of an inch. But this, too, is a matter of practice. The driver who has never tried it may find it awkward at first and insist that the foot-brake method is better, but this objecion can be removed by a few private trials of the hand brake on a hillside.

Braking and Blowing

A motorist of long experience and much observation once said he could pick out the expert drivers, on the road by the way they used their brakes and horns. There are times for both, of course, and there are distinctly times for neither. For instance, it is a common failing in many drivers to ride their brakes down a hill. The good driver keeps his car under contrql by alternately applying and relieving the brake pressure, or if the hill is too steep for that, he sensibly shifts to second. And he won't jam his brakes on for a sudden stop at an intersection when he knows half a block away that he has to make the stop or at least slow down.

He'll also use his horn intelligently. He won't blow it inanely in traffic jams nor with nerve-racking blasts when a single, wilder note will serve to warn a pedestrian or another driver of what he is going to do. Yet he will blow vigorously when about to make a sharp turn around a blind corner on a narrow road. In other words, he'll always make all the noise that may be necessary, but will never make noise needlessly.

Sale of Power

Quebec Evenement (Cons.): The Province of Quebec is opposed to the export of electrical power produced within its territory. But it is not opposed to the export of a certain part of its power to the neighboring province. But the latter is already exporting a certain amount of ready exporting a certain amount of electricity to the United States. If therefore the enterprise projected (Beauharnois Heat, Light and Power) proposes to sell a portion of its production to Ontario, the latter will take advantage of this for its own development and will continue to sell a part of its own electrical production the other side of the border. . . . Are there not therefore the gravest objections to the sale of our power to our Ontarian rivals?

"I've been in prison twice already, and I'm not ashamed of it," said a London defendant last week. I like a man who has the courage of his previous convictions.

Members of the younger generation to-day are alike in many disrespects.

BIG PRICE REDUCTION IN ROGERS BATTERYLESS RADIOS

Canadian Company Leads Field In Production of Batteryless Sets

Price reductions of $26, $45 and $50 on the new 1928 Models of the famous Rogers Batteryless Radios were announced recently by Rogers dealers. These drastic changes are not a price "cut" on special models, but constitute the creation of an entirely new and lower price level for all Rogers Radios from now on. These big reductions represent savings, passed on to the public, through economies in purchasing, production and distribution of Rogers Sets due to the tremendously rapid increase in sales during the past two years.

There can be no doubt but that the inauguration of these new prices will stimulate radio sales, for it is now possible for anyone to own a Batteryless Radio with all its advantages and economies at the price of an ordinary battery set.

As a representative of the G.R.S. Music Co., the Rogers distributors in Eastern Canada, expressed it: "Three years ago when the Rogers was first introduced it was the only Batteryless Radio on the market."

Not only does the Rogers eliminate all batteries, chargers, chemicals, attachments and complicated wires, so that all you have to do is plug it into your light socket and tune in, but it takes care of variations in line voltages in different localities and in the same locality during different times of the day, so there is no danger of burning out tubes. See your Rogers dealers for demonstration.

I would much rather that posterity should inquire why no statues were erected to me, than why they were.—Cato.

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. *But it's just as important to know that there is only one genuine Aspirin.* The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Joy in Australia At Hinkler's Safety

Aviator Who Flew From England Says He Feared Only Europe's Fogs

Aided By Arabs in Desert

London.—England, like Australia, was overjoyed at news which arrived recently that Bert Hinkler, the Australian airman reported missing after completing his record flight from England to the Antipodes, was safe.

According to a Weekly Despatch cable the tidings were received with jubilation in Sydney and announced in Bundaberg, Hinkler's native town by the ringing of joy bells.

The airman's destination after leaving Port Darwin on the Northern Australian coast, where he landed after his fifteen and a half days' flight from England, was Cloncurry—the half-way stage of a 1,600-mile trip to Bundaberg. He was forced by darkness and a blinding dust storm, however, to land near Brunette Downs cattle station. Through faced with a strong headwind he came down without mishap and resumed the long reach to Bundaberg the next day.

Slept Under a Windmill

He slept under a windmill until daylight flew to Alexandria, a cattle station, for breakfast and later reached Camooweal, a Queensland cattle centre, which has been made an airport.

The news of his safety was telephoned to Hinkler's mother at Bundaberg. She had waited all night at a friend's telephone for word of him. Bundaberg had prepared a great welcome for its hero when he arrived and "taxis his airplane up to the front gate of his mother's house."

In a dispatch to The News of the World Hinkler telegraphed that his first day's flight from London was the one he feared most and felt that success was certain if he could only clear Europe and its fogs. Rome was a welcome sight.

"After that," he says, "for a long time I seem to remember nothing but endless stretches of desert. Once I sighted a group of Arab tents with tethered camels. A whole day I was lost in Libya and as I was trying to clear a space in the desert for a take-off a party of Arabs cantered up. It was an anxious moment. There were friendly overtures on my part and then they helped me with the clearing. A few minutes later I was again pushing on over the desert and then at last came the stony wastes of Palestine.

Three Impressions of India

"Of India I remember three things—blistering heat, air currents that threw us about like a shuttlecock and endless crowds of kind-hearted people pressing hospitality upon us. Whenever the East Indies are mentioned I shall think of rainstorms and my gallant little machine plowing on through rain so heavy one couldn't see the ground.

"And then came the coast of Australia, a clearing in the jungle, a native hut and mosquitoes, droves and droves of them. There was a hasty filling up from a dump of gasoline tins and only 1,000 miles remained between me and home.

"The last stage from Bima to Port Darwin I will never forget. I flew for hour after hour over an unbroken expanse of sea with not a ship in sight, guided only by my compass and estimating the drift by guesswork. Almost to the minute I calculated the loom of land appeared on he starboard. It became sharper the near it grew until I saw Bathurst Island, the first glimpse of my native soil for eight years."

New Radio Station Proves Success

High-powered Broadcast Heard in Many Hither-to "Dead" Spots

Toronto.—Canada's new high-powered radio station CKGW made its debut recently. Several hundred telegrams, cablegrams and long distance telephone messages were received while the station was broadcasting stating that the program was coming through quite clearly and in good volume.

For the first time in the history of Canadian broadcasting, Hawaii reported by cable that they were getting good reception. Other points heard from were St. Johns, Newfoundland, the Maritime provinces, British Columbia, Los Angeles and San Diego, California, Fort Worth, Texas, and Miami, Florida, as well as innumerable intermediate cities.

A large number of "dead" spots in Ontario, which have so far been unable to get reception from Toronto and Montreal, also reported that the broadcast was clearly audible. In fact, the station covered all of the U.S. and Canada.

It operates on a wave length of 312.3 metres, with 5,000 watts capacity. The transmitting station is located at Bowmanville, and the studios are in Toronto.

The broadcasts to date have been away above the average for Canadian stations and the announcer has a real good voice but is inclined to be a bit officious.

London Has a Smash

Tram took a tumble and 30 people were injured in London when a tram from Tooting to the Embankment left the rails at Belham High Road and turned over.

Skipper Wins Acclaim by Gamble With Surf to Speed His Cargo

Hailed as West Coast Hero for "Easing" Lumber Ship Across Bar With Margin of 2 Feet Under Keel; Owners Enriched While Rival Carriers Waited

Hoquiam, Wash.—Over Grays Harbor bar the surf heaved and seven big lumber-laden carriers waited inside for a smooth channel across two miles of treacherous black water to the open sea—but one skipper, O. Bellesen of the West Mahwah, nosed toward the sand at half speed.

There was twenty-seven feet of water over the bar; the West Mahwah drew twenty-six. Captain Bellesen watched the swell rolling in. Before his ship could ride it he signaled for slow speed with helm over to make the wave broadside, to a slight degree. The lumber-loaded ship was eased quietly on again, until the next swell was met. On and on, for forty minutes, over the two miles of bar with but a couple of feet under the keel, the West Mahwah worked like an aggressive football team seeking yardage. Aground a million dollars worth of lumber would be useless in wild salt water; but safely over and fourteen hours ahead of its rivals the lumber carrier would be making money for its owners, so Captain Bellesen is rated along the West Coast as the newest hero.

British Deplore Big Prices Paid For Old Armor

Collection in Tower of London Suffers Because of Inability to Compete With American Bidders

Rare Pieces Come to U.S.

Only Recent Additions to English Store Gained by Transfer From Museum

While the other national collections are, year by year, enriched by the acquisition of works of art and historical specimens of great value, the armories of the Tower of London, for various reasons, have remained in statu quo for a considerable period, says "The Times," London. In the middle of the nineteenth century the admission fees to the armories were earmarked for a purchase grant, and from this pieces of great interest were acquired at sales, notably the Brocas sale in 1834, the Bernal sale in 1855, and at the dispersal of the collections of the Earl of Shrewsbury, 1857; of Baron Peuker, 1858, and of Baron de Cosson, 1893, the last purchase being a pistol at the Gurney sale in 1898.

Of later years the fantastic prices given by American collectors for armor and weapons have rendered competition in this respect quite impossible, and the magnificent armors of the Earls of Cumberland and Pembroke, made in English workshops by the great master Jacob Halder, of Greenwich, have been allowed to leave the country without protest, while during the same period large sums have been raised to preserve the work of foreign painters for our national collections. The last important additions to the armories were the fine pieces which formed part of armors already in the Tower that the King transferred from the Royal Armory at Windsor in 1914.

For nearly 100 years, the little-known Rotunda Museum on Woolwich Common has sheltered several examples of outstanding interest which were placed there at a time when the Tower was so overflowing with war stores that no room could be ound for any additions to the armories. These pieces were acquired early in the nineteenth century, and were added to by General Lefroy, who purchased some fine examples of fifteenth century armor at Rhodes in 1866.

Collection Transferred

During the present year the Committee of the Royal Artillery Institution, who have charge of the Rotunda, were approached with a view to transferring these specimens from the Rotunda, which is not easy of access, to the Tower, where they would be seen by large numbers of the general public. This transfer was agreed to, as the Royal Artillery Institution have rightly considered that in this respect they are trustees for the public, and that the education of the public in the best and most convenient manner is of the first importance.

The first acquisitions include a fine suit of the early part of the sixteenth century, russeted, with bands of gilding. It is considered to have belonged to the Duc d'Uze, and according to a tradition, for which no authority can be found, it was worn by the Chevalier Bayard. The leg armor is of exceptionally fine workmanship, but the whole suit is of such small proportions that it must have been made for a youth of slight build and can hardly have belonged to such a mighty champion as Bayard. Of the helmets in this section of the transfer the fluted armet of the middle of the sixteenth century stands out as a superb example of the armorer's craft and will rank with the finest specimens of its period. There are several other helmets of interest, and a great shield vamplate weighing over thirteen pounds, richly engraved. A very rare piece is the tailguard for a horse, originally fastened to the steel crupper. It is fashioned in the form of a monster's head, and the skill displayed suggests that it came from the workshop of one of the master armorers of Germany. There is also a fine chanfron, or armor for a horse's head, of the middle of the sixteenth century.

The weapons and firearms are good and useful acquisitions, especially the latter, which are skillfully inlaid and show engraved wheel locks of fine workmanship. The next item in the collection is one which has become a household word among all collectors and students of armor—the famous "Brocas" tilting helm of the first years of the sixteenth century, if not earlier. This was purchased at the Brocas sale in 1834 for $30, and at the present day its market value would run well into four figures. Baron de Cosson has described this helmet as "purely English and "perhaps the grandest jousting helm in existence," and certainly for practical construction and dignified lines and form it would be difficult to find its equal.

Other Rare Examples

The actual provenance of the Rhodes armor is vague, for from General Lefroy's autobiography we learn merely that it came from the Castle of Rhodes. It must have been the whole or part of a store left by the Knights Hospitallers when they were driven out by the Turks in 1522, for all the pieces may be dated in the fifteenth or early sixteenth centuries. The most important pieces are the sallades, of which there are four or five varieties, and an early armet, which is a rare example of such a helmet retaining the brass "vervelles," or studs, to which the camail of mail was attached. The sallades bear armorers' marks, one being that used by the famous Missaglia family of Milan. On these hedmets are found several original rivets fashioned in a distinctive fashion. There are also a large number of breast and back plates bearing the graceful fluting peculiar to the fifteenth century before Maximilian and his master craftsman Conrad Seusenhofer had introduced the deep chaneling which at the present day is known as "Maximilian." Of this latter type of armor there are three breastplates, one of which for sheer metal working is magnificent, the deep chaneling and the fine roping at the margins being undoubtedly the work of a master. The late Sir Guy Laking in his monumental work on European armor, writing of this breastplate, says: "The flouting and roping are superb, and the suit to which it belonged must have been unparalleled in its simplicity and boldness." There are also fine graceful leg pieces, elbow pieces and some early pauldrons, or shoulder defences, of Italian style, excellent and rare examples of the armor of the fifteenth century, and a splendid "Gothic" chanfron.

British Births are Falling Below Low Mark of 1927

London. — Not only was last year's birth rate in England the lowest on record, but the rate is still falling.

Detailed figures for the last three months of 1927 show that the births registered correspond to an annual rate of 15.4 per 10,000, which is 1.3 below that recorded in the corresponding quarter of the previous year. It is the lowest birth rate recorded for any quarter.

He Needs Inspiration.

Britain Builds Altitude Fighters

Challenges the United States to Turn Out Better Planes

3-TYPE MACHINE

Special Attention to Securing Fighting Airships with Machine Guns

London.—Great Britain has challenged the effort of the United States to build super-altitude fighting planes.

Already, as if in answer to the recent contract which the U.S. Air Service has placed with the Curtis Company for fighters capable of attaining an altitude of eight miles, the air ministry has inaugurated three competitions designed to improve fighting airplanes.

The three types of machines in the competition are:

The single-seated fighter.

The "interceptor fighter," whose special duty will be to deal with invading aircraft.

The multiple gun fighter.

To capture orders for these machines, every military aircraft company in Great Britain is busy on designs. In some cases construction of experimental machines already has begun. Firms which hitherto have concentrated on production of seaplanes and flying boats are turning their attention toward construction of fighting land planes.

Great Britain's fastest aircraft recently—the Schneider Cup race winner—is a seaplane. It maintained an average speed of 218.49 miles over a 200 mile race, while the Italian seaplane which holds the world's speed record averaged 296.94 miles an hour in four trials over a four-kilometer course. Both records are far in excess of any speed ever attained over similar courses by a land airplane.

"Higher and faster' is the watchword of the air ministry and firms which cannot produce fighting machines which, with full equipment, can attain a speed of more than 200 miles an hour and climb to 30,000 feet or more in a few minutes, are believed to have small prospects of getting government contracts.

Special attention is being given to production of fighters with five and six machine guns. These will be two-seaters in which the pilot will operate two guns, and the observer three or four. It is understood great progress is being made in the development of this class of fighter, but details of the new machines are being kept secret.

It is known, however, that their specifications are based on the expectation that they be used in air battles fought at altitudes of five, six and seven miles, and that all the planes will be fitted with super-charged machines that will enable them to maintain speeds of at least three miles a minute at these lofty altitudes.

Toot, Toot! We're Off!

"When is a hat not a hat? Don't know—give it up."

"When it becomes a girl."

Sensational Speed By Aero Engine

Italian Claims "Theoretical Speed" of 625 Miles An Hour

London.—Attaining 12,000 revolutions a minute, an aero engine, which will make a "theoretical speed" of 625 miles an hour, and an "effective speed" of 470 miles an hour, has been designed by Signor Narcisco Lonfihin, of Venice. Aviation experts are expecting interesting departures from the prevalent constructional details since no type of engine now known can be made compact enough to reach such a tremendous velocity.

London 'Pubs' Have Dropped 24 Per Cent. Since 1904

Eighteen hundred and forty "pubs" have been closed in the London area since the Licensing Act of 1904 went into effect. That is 24 per cent. of the "pubs," or saloons which existed in 1904.

The number continues to decline annually, to the discomfort of owners of licensed premises who are clamoring for the repeal of the act on the ground that further reduction is not necessary.

"Pub" owners are also endeavoring to have the closing hours altered in such a manner that they will be uniform throughout the London area. At present many public houses must close at 10 at night, while those in neighboring boroughs may remain open till 11.

FRIENDLY cushions, fashioned with the comfort of an easy chair, invite relaxation as your McLaughlin-Buick sweeps smoothly along.

Comfort that invites Relaxation

In the designing of McLaughlin-Buick for 1928, riding ease and comfort have been given unusual consideration. Lovejoy Shock absorbers on all four wheels absorb and cushion every road-shock and rebound. Rubber Engine Mountings prevent vibration from reaching the car-body. Extra deep, resilient seat cushions, beautifully upholstered, are specially shaped and tailored to fit, like an easy chair. The lower body-lines have been attained without any sacrifice of headroom. And in finish and appointments, McLaughlin-Buick establishes a standard of luxury which vies with your drawing-room or club.

The G.M.A.C. Deferred Payment Plan offers many advantages to buyers of McLaughlin-Buick cars.

Charming little Coats any little girl will love, all sizes and none are high in price.

SATURDAY SPECIAL. We expect a large shipment of Ladies' Dresses, a variety to choose from at a low price

at **CROSS & CO.,** of Madoc

Testing Children for Defective Hearing

The audiometer for determining the degree of hearing retained by deaf persons is one of the recent inventions of Bell Telephone Research Engineers. It has been found that to test the hearing of children in groups, rather than individually enables them to concentrate better on the hearing test. After the telephone receivers have been adjusted on the right ears of the children they are told to write down as many numbers as they can hear as the phonograph utters them. They hear numbers coming from the telephone receiver, the intensity of each successive number group being three sensation units less than that of the preceding group. The receivers are then changed to the left ears and the test repeated. Children's hearing can be much benefitted when defects are ascertained before it is too late.

CROOKSTON

(Intended for last week.)

The Irish Tea, held on Friday, 16, in Bethesda Church, was largely attended. A splendid supper was served. A most enjoyable program of Irish numbers was given.

Mr. S. O. Patterson has returned to Crookston.

Mrs. C. Moreland and daughters Patricia and Vera, spent Monday at Mr. Geo. Vincents.

Irvin Malloy is visiting friends at Coe Hill.

Miss E. Wickens spent a few days last week at Mr. Wesley Wickens.

Mr. and Mrs. M. J. Mahoney and son, Billie, left on Tuesday last for their new home in Toronto.

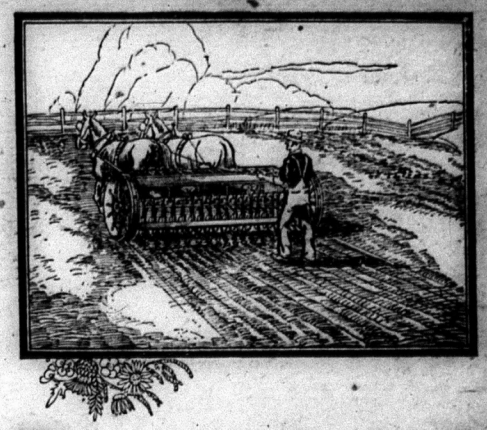
Mr. Allan Carswell spent the week-end with his family here.

Mrs. Arthur Jones, Jr., leaves on Tuesday for Lindsay where she will be delegate to Grand Lodge of the L. O. B. A., held on Wednesday, Thursday and Friday of this week.

Miss B. Blue, of Thomasburg spent the week-end at her home.

The many friends of Mr. S. Way, of Tweed, were shocked to hear of his sudden death in Toronto, last Friday.

Several from Crookston attended the party given by Mr. and Mrs. W. Wickens last week.



How many weeds are you sowing?

Recently one ounce of Alfalfa seed was found to contain approximately 900 weed seeds, which would have resulted in the distribution of almost a million weeds to every acre sown.

And such examples as this are not uncommon. Forestall the danger of ruined crops now! Take every precaution in selecting and cleaning your seed—because on them principally depends the ultimate success of your crops.

Under the Weed Control Act the destruction of noxious weeds is compulsory. Let us co-operate to end this menace.

Oatmeal Cod Liver Meal Cod Liver Oil

No Wonder Baby Chicks Thrive on Quaker FUL-O-PEP CHICK STARTER

The pure, fresh oatmeal of Quaker Ful-O-Pep Chick Starter is just the thing for the tender digestive tracts of baby chicks.

And authoritative tests prove OATMEAL more digestible (96% available) than any other grain product!

Cod Liver Oil in this complete feed provides valuable vitamines to build strong, big bones. Cod liver Meal tones up the birds' digestion so that all ingredients give more nourishment.
